Buy

Phoenix Mills (PHNX) has an operational history of more than 100 years. A textile manufacturer at inception, the company has reinvented itself as a retail-led mixed-use mall developer. Its diversified portfolio of businesses comprises: (a) Retail mall development (enjoys a leadership position in cities where it operates) and (b) Hospitality, Residential and Commercial (together contributed 35% of revenue as of FY17).

## The Specialist

## Carving a niche by tapping the untapped

- PHNX – a pioneer in developing and operating malls – has become a partner of choice for retailers in India due to its impressive track record of consumption-led growth and strong portfolio of eight malls (6msf) spread across the top cities in India. This apart, the company specializes in mall management, an area where its competitors lag. Thus, we believe that it offers a unique opportunity for any retailer (both domestic and global) looking to expand rapidly in India. All this makes PHNX a ‘specialist’ play on India’s promising consumption growth story, in our view.
- CPPIB has recently infused equity capital of INR16.6b (in tranches) in its subsidiary, Island Star Developers, and with leverage of 1:1, it will create a war chest of INR32b, gearing up the company for the next leg of growth. PHNX plans to acquire and build up to four new malls.
- We expect PHNX to generate cash flows from operations of INR23.8b over FY18-20. These cash flows can be deployed toward (i) acquiring ready/under-construction mall, (ii) unlocking development potential of 4.6msf in its existing land parcels and (iii) reducing debt.
- We expect PHNX to record a CAGR (FY18-20) of 15% in revenue, 16% in EBITDA and 37% in PAT. We value the company’s retail assets assuming a cap rate of 8%. We initiate coverage on PHNX with a Buy rating and an SOTP-based target price of INR732 (upside 21%).

## A partner of choice for retailers in India

PHNX is one of the leading mall developers and operators in India, with presence across six cities (~6msf of retail space). The company’s flagship High Street Phoenix Mall – which commenced operations in 1999 in Mumbai – has increased rental income at a 12% CAGR over FY13-17. Importantly, the company has been able to replicate this success in other major cities of India. Uniquely, PHNX participates over the entire lifecycle of malls (with specialization in mall management), which has helped it deliver robust consumption-led retail revenue CAGR of 16%, from INR4.2b in FY13 to INR7.7b in FY17. The company’s success in the mall business can largely be ascribed to its expertise in acquisition of attractive land parcels, mall design, tenant mix, identification of consumer trends, and data analytics. Thus, we believe that PHNX offers a unique opportunity for any retailer to expand rapidly in India. We expect retail leasing income to grow at a CAGR of 15% over FY17-20, post which growth is likely to be driven by the launch of new malls under the CPPIB platform.

**Stock Performance (1-year)****CPPIB deal – preparing for the next leg of growth**

CPPIB recently infused equity capital of INR16.6b (in tranches) in the company's subsidiary, Island Star Developers (for a 49% stake), which houses its Bangalore mall. CPPIB has infused capital by valuing its Bangalore mall at a 6.25% cap rate. With leverage of 1:1, Island Star will have a robust war chest of INR32b, through which it plans to acquire and build up to four new malls (recently acquired a land parcel in Pune with 1.8msf of development potential). Additionally, CPPIB will provide fees for mall management, project management and lease renewals, ensuring consistent cash inflows. All this should strengthen PHNX's position in India's malls segment.

**Expect strong cash flows from operations going forward**

With the next leg of growth being fully funded via the CPPIB deal and also minority buyouts now complete, PHNX's existing mall and commercial properties are expected to generate strong free cash flows. Over the last four years, PHNX has spent INR13.3b toward acquiring minority stakes in its subsidiaries, which operate various malls. Additionally, its residential projects of 3.3msf have already garnered an amount equal to its estimated total cost of projects. Therefore, unsold stock and pending collections should help generate strong cash flows. We expect PHNX to generate cash flow from operations of INR23.8b over FY18-20, which can be deployed toward (i) acquiring ready/under-construction malls, (ii) unlocking development potential of 4.6msf in its existing land parcels and (iii) reducing debt.

**PAT to grow at 37% CAGR to INR4b over FY18-20**

We expect PHNX to deliver revenue CAGR (FY18-20) of 15% to INR21.3b, mainly driven by retail segment revenue CAGR of 12% to INR13.3b, contributing 62% of total revenue in FY20. Growth in retail is largely attributed to (i) upcoming renewals across malls and (b) scale-up in commercial assets. We expect EBITDA CAGR of 16% and PAT CAGR of 37% over FY18-20. PAT is expected to grow at a faster pace, mainly due to a decline in interest cost from INR3.6b in FY18 to INR3b in FY20. Growth over the next two years is expected to be driven by the sweating of existing assets. Growth from the Pune mall (under CPPIB deal) will commence from FY22.

**Initiating with a Buy**

We see huge growth opportunity in India's retail industry, which is expected to reach a size of USD2t by 2020, growing at a CAGR of 12%. We believe that PHNX is a unique way to play India's retail growth story. Moreover, clarifications and issues surrounding REITs are now behind, and we expect India to attract strong inflows, where PHNX can become a great choice. We prefer PHNX due to its a) strong operational performance (which provides a competitive edge), b) scalability (through the CPPIB deal), and c) robust cash generation (leading to a reduction in gearing and providing opportunities to acquire new malls). The stock trades at a PE of 29x/23x FY19/20E, P/BV of 2.6x/2.3x FY19/20E and EV/EBITDA of 13.7x/11.4x respectively. We value retail assets based on NAV approach, assuming a cap rate of 8% and a discount rate of 13%. We initiate coverage on PHNX with a **Buy** rating and an SOTP-based target price of INR732 (upside 21%).

**Potential changes in regulations pose a key risk to our thesis**

Recent issues related to the Kamla Mills fire have raised a concern about fire & safety at public places. However, our interaction with management suggests that company already has processes in place to ensure that it is compliant with fire & safety and other regulatory (local authority approvals) norms. For example:

- PHNX gets third- party fire & safety audits done for every mall – this is reviewed on a regular basis by the board as well as Managing Director Mr Atul Ruia.
- PHNX houses large MNC retailers like Zara, GAP and H&M, which themselves have strict due diligence processes in place to ensure compliance with the global standards.

Despite this, we believe that food & beverages (F&B) outlets – due to their nature of operations – are still to some extent exposed to fire & safety risks. F&B occupies ~12% mall space across PHNX malls. However, we do not rule out potential systemic risk.

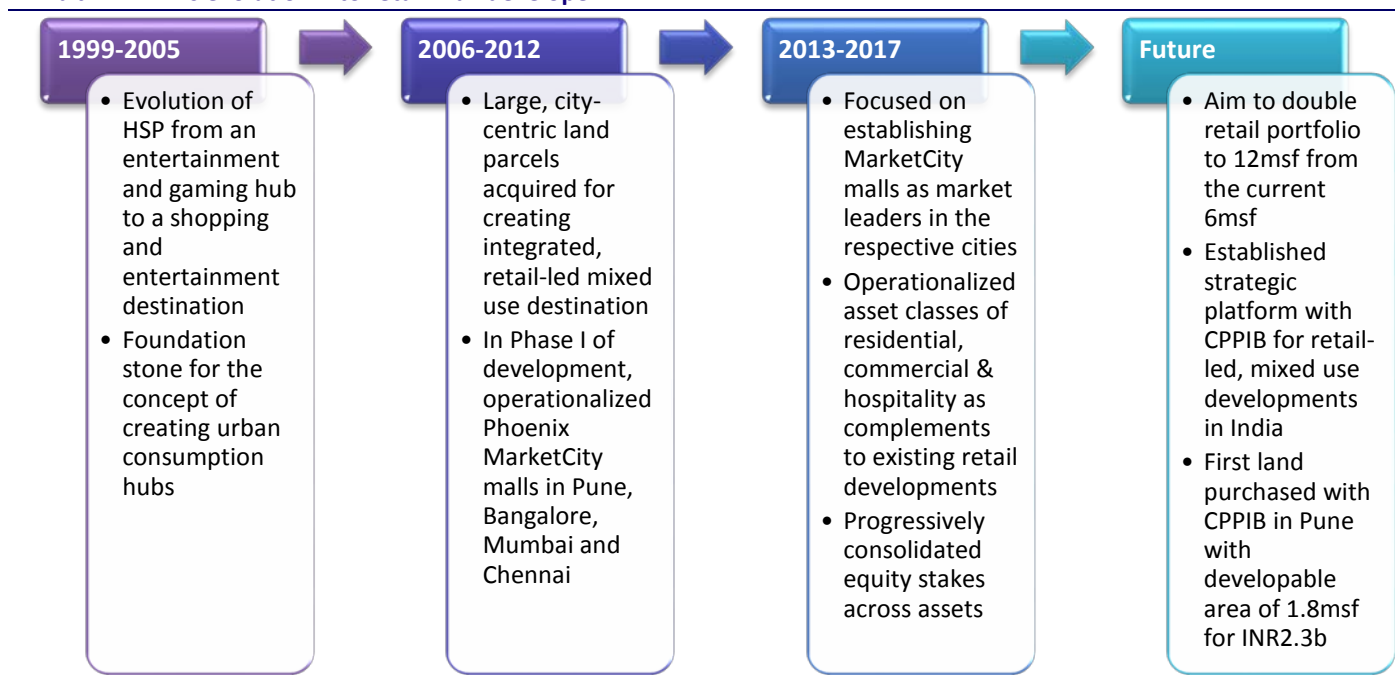

## Company overview

PHNX began operations as a textile manufacturing company in 1905 on 17 acres of land in Lower Parel (Mumbai). However, in 1987, PHNX largely exited the textile sector, and entered into Mumbai's real estate market with the development of the High Street Phoenix (HSP) center in 1999 on its textile mill property in Lower Parel. HSP was the first consumption center developed by the Phoenix Group in India. PHNX now has retail-led developments across India, and has also included hospitality, commercial and residential assets in its portfolio. Besides, the company has forayed into food & beverages with its brands 212, Shizu San and Bar Bar through its nine stores. PHNX now has a rental asset portfolio of ~6msf, comprising eight malls spread across six gateway cities.

PHNX's existing real estate development portfolio primarily comprises retail-led, mixed-use developments at prime locations, along with a number of other standalone residential/commercial developments. PHNX has presence across Mumbai, Chennai, Bengaluru, Pune, Lucknow, Bareilly and Agra. The company's operations typically encompass most functions of real estate development – from land acquisition, planning (including liaison and approvals), execution and marketing of projects, to management, maintenance and sales of the completed projects.

**Exhibit 1: PHNX's evolution into retail mall developer**

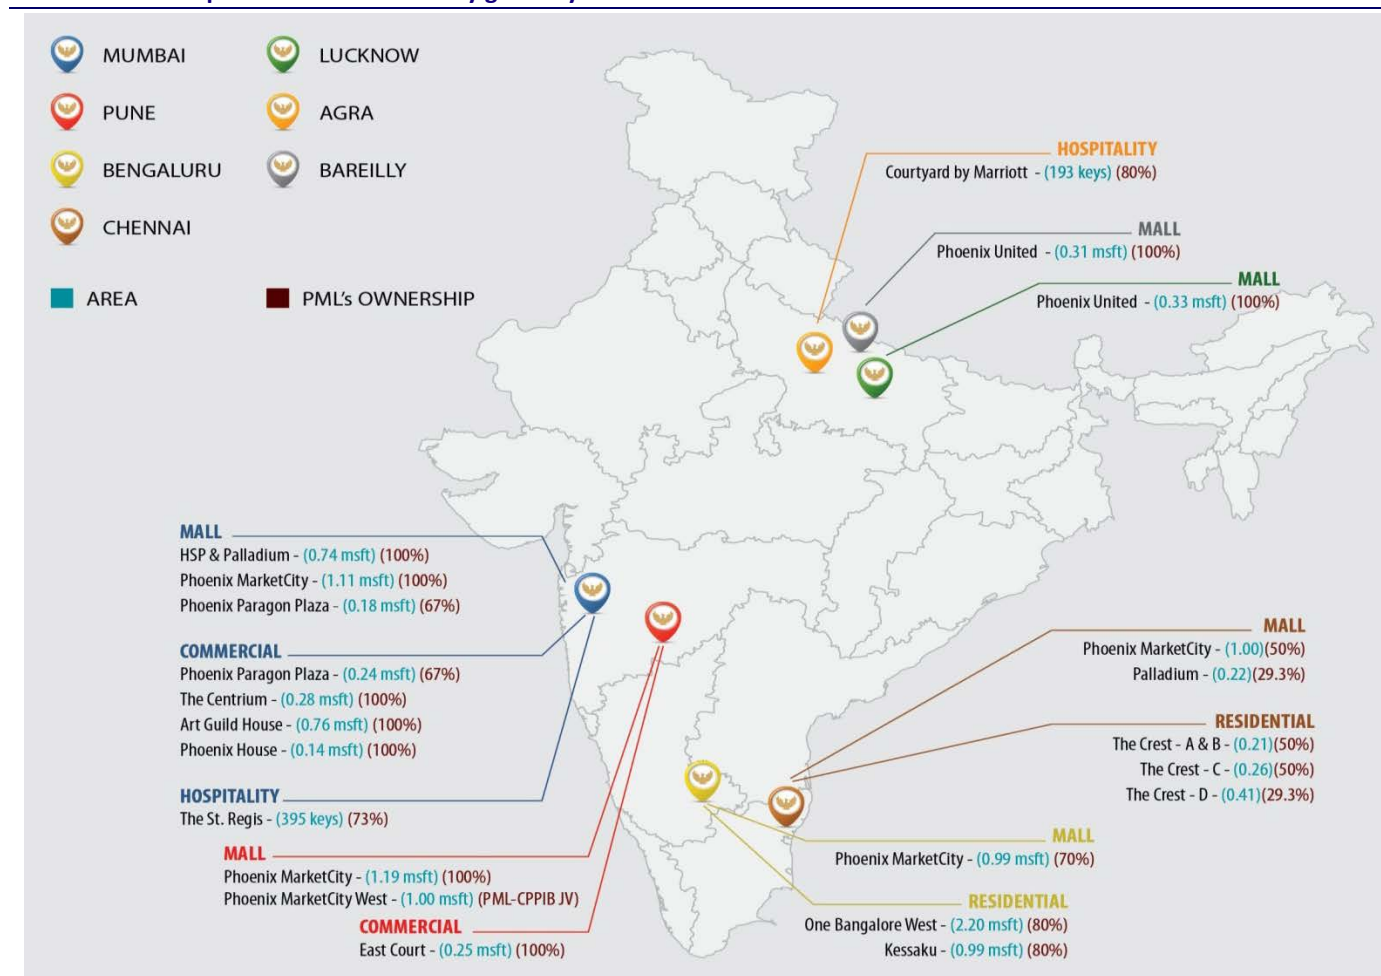

Source: Company, MOSL

PHNX has developed its asset portfolio primarily through joint ventures with strategic investors/regional developers to support growth of its asset-heavy malls. Historically, PHNX has also bought minority stakes in SPVs. The company has raised INR16.6b (in tranches) from CPPIB through equity infusion for a 49% stake in its Bengaluru SPV to fund brownfield/greenfield growth opportunities in the retail space. PHNX's strategy is to operate retail malls in city center locations, where it commands a leadership position.

## Real estate-backed retail play

**With ~6msf of mall area, PHNX is India's largest mall developer**

- PHNX is one of the leading mall developers and operators in India, with presence across six cities (6msf of retail space). The company's flagship 'High Street Phoenix Mall' in Mumbai has grown its rental income by 12% CAGR over FY13-17 to INR2.8b, and importantly, the company has been able to replicate this success in other major cities of India.
- Uniquely, PHNX participates over the entire lifecycle of malls (with specialization in mall management), which has helped it deliver robust consumption-led retail revenue CAGR of 16%, from INR4.2b in FY13 to INR7.7b in FY17.
- The company's success in the mall business can largely be ascribed to its expertise in acquiring attractive land parcels, mall design, tenant mix, identification of consumer trends, and data intelligence.
- Thus, we believe PHNX offers a unique opportunity for any retailer to expand rapidly in India, making it a partner of choice. We expect retail leasing income to grow at CAGR of 15% over FY17-20E, post which growth is likely to be driven by the launch of new malls under the CPPIB platform.

### PHNX - largest mall operator in India

PHNX is one of India's leading developers, owners and operators of retail assets. It also holds one of the largest retail portfolios among listed companies in India, with eight retail properties (~2,000 stores) across many large cities. PHNX has eight malls in six gateway cities in India. Consumption at its malls has increased at a CAGR of 22% to INR58b over FY13-17. Additionally, the company is coming up with a new mall in Wakad (Pune) by FY22, with 1msf of leasable area.

#### Exhibit 6: PHNX's mall portfolio is spread across 6.89msf (incl. upcoming)

### High Street Phoenix (HSP) - PHNX's flagship mall depicts management's mall management capabilities

HSP was among the first developments in India to combine retail & entertainment, commercial, hotel and residential properties into an integrated lifestyle destination. HSP's performance has been impressive, and the company is using its market expertise and brand name to replicate the success of HSP in other parts of Mumbai as well as other cities in India (via its Phoenix Market City, Phoenix United, residential, commercial and hospitality projects).

As a result of rapid development and its central location between South Mumbai and suburbs, Lower Parel emerged as a viable alternative to the South Mumbai business district for commercial and retail purposes. High Street Phoenix Mall, Palladium Mall, St. Regis Hotel and Phoenix Tower residential apartments are located on the 17 acre land parcel in Lower Parel. There are over 270 stores at High Street Phoenix and Palladium which are divided among distinct areas: Skyzone, Grand Galleria, Grand Galleria Annexe, Courtyard and Palladium. These areas were developed and operationalized in phases over a period of time, with the final retail space (Palladium) commencing operations in 2009.

**Exhibit 9: HSP mall trading density grew at a 16% CAGR over 2010-17**

**Exhibit 13: Rentals psf grew at 12% CAGR over FY13-17**

Source: Company, MOSL

**PHNX - a direct entry point for retailers to access key markets across India**

- With its malls located across India, PHNX acts as a key partner for retailers planning to enter/expand presence in India. The company's standing as a large pan-India mall operator makes it a preferred destination of choice for any premium domestic or global brand looking for a multi-city entry strategy. Association with a name like PHNX enables such brands to enter multiple key consumption centers of Mumbai, Pune, Bengaluru and Chennai. PHNX gives them the opportunity to capture discerning customers at a scale impossible for other retail centers to match.
- Retailers' confidence on PHNX is evident from the company's longstanding relationships with several domestic and global retail brands such as Zara, Diesel, Lifestyle and PVR Cinemas. Such relationships may help PHNX to secure retail clients for its new developments (especially for large spaces) at suitable rates. An anchor retailer typically occupies 45-50% of the mall space.
- PHNX's mall operations and management team's focus on increasing consumer spend by employing several marketing and promotional initiatives. We believe such steps ensure (i) higher footfalls in targeted categories and (ii) increased per capita spend.
- In our view, PHNX should be able to leverage the long-standing presence in this market segment and maximize the potential of a particular catchment area by bringing together appropriate retail clients.

### Lease agreements include variable components linked to retailer performance

PHNX regularly evaluates the retail client mix at its properties to ensure that it caters to the consumption and spending patterns of customers. **A majority of the leases across its retail properties are structured in a way that PHNX receives the higher of fixed guaranteed license fee/rental income, as applicable, or a percentage of revenue generated by the retail client, with such fixed guaranteed license fee/rental rate generally increasing on a percentage basis annually with a further higher percentage increase after, for example, three to five years. This assures the company of minimum guaranteed license fees/rental income, as applicable, across its retail properties, while aligning the company's interest with that of retail clients through revenue share arrangements.** With this model, PHNX's license fees and rental income collected, as applicable, can rise in tandem with consumption.

**Exhibit 14: Revenue cycle of mall; generally minimum lease guarantee escalates by 15-18% at the end of 3<sup>rd</sup> year and 5-7% annually**

### Not only a developer but also a mall manager – a key differentiator

A typical mall development cycle comprises three stages: (i) land acquisition, (ii) designing & development of mall and (iii) mall management. A typical real estate developer outsources mall management, but PHNX does this on its own, which, in our view, is a key differentiating factor.

### Why managing mall mix stands critical for a mall developer?

PHNX shelters top retail brands from India and across the globe. It could be inferred that the company has indirectly linked its revenue with retailers, as the rental income of the company also comprises of a variable component linked to tenants' consumption. Hence, it becomes important for mall developers to manage the tenant mix well and enhance the customer experience.

**Exhibit 19: Mall development cycle; typical RE developer exits post mall development**

Multiplex (Anchor)	7%
Food & Beverages (fine dining)	9%
Food court	3%
Family entertainment	8%
Inline stores	37%

Source: Company, MOSL

### Relocating, resizing and churning out of retailers to manage retail mix

PHNX's team continuously monitors retailers' performance. In case the performance is not as desired, the leasing team takes actions to improve it. The following steps taken by PHNX clearly depict its mall managing skills.

#### Churning out

PHNX annually churns out 5-10% of its mall space based on the performance of the retailer. For example, leading fashion store in HSP and Palladium, Mumbai was replaced by several small retailers, which led to an increase in rentals as well. Departmental store was replaced by H&M, which resulted in an increase in consumption by 2x and in rentals by 3x.

#### Relocating

PHNX relocated a designer labels brand to the first floor of the Palladium mall, which led to an increase in sales for the retailer. PHNX too benefited from higher rentals.

#### Resizing

Initially, a departmental store in PMC Pune Mall had ~75,000sf, which was resized to ~50,000sf and now it has ~30,000sf. However, rental stands at 1.5-2x of initial rentals.

### Initiatives taken by PHNX to attract crowd on weekdays as well

Malls usually witness low footfall on weekdays relative to weekends. PHNX has adopted several strategies to address this footfall gap between weekend and weekdays. Consequently, footfall now at PHNX's malls is higher by only 30-35% on weekends compared to weekdays. In comparison, other malls have 60-70% more crowds on weekends. Some initiatives taken to attract crowd on weekdays include:

- Mid-week events like performance by singers/dancers, and drawing competitions for children, among others. PHNX ensures that it has at least one such event in at least one mall on weekdays.
- PHNX had planned to build the PMC Kurla mall three years after the Mumbai metro becomes operational. However, the metro became operational three years after mall construction. This significantly affected the mall dynamics. To subside this impact, PHNX has taken various initiatives (such as discounts for ladies kitty parties/dinners) to encourage customers to spend time at the mall.
- Idea behind creating 212, Bar Bar and Shizu San was to occupy the mall space or else customers would have a negative impression about the mall. As a matter of fact, the mall saw great traction from the new food & beverages outlets, which led to higher rentals.
- PHNX has a clear objective of developing retail-led, mixed-use developments that complement each other. For instance, PMC Kurla mall has succeeded in attracting crowd on weekdays, as it has several commercial developments in the vicinity.

### Other key initiatives of PHNX that reflect its mall management skills

- PHNX invited artists to paint the parking walls in PMC Chennai so that customers experience something new whenever they visit the mall.
- PMC Kurla has dedicated spots where customers can click photos.
- Dedicated Uber and Ola desks for booking cabs.
- PHNX collects parking charges from customers upfront, but the same is reimbursed in the form of cash-back if the person shops.
- PHNX established CNG pipelines instead of LPG as they are safer and cheaper. For this, it received huge appreciation from food & beverages retailers.
- PHNX will establish solar panels in the PMC Bangalore mall, which will lead to 30-40% reduction in electricity costs for retailers.

### PMC Kurla – a laggard earlier has shown significant improvement

**Exhibit 21: Consumption grew at CAGR of 25% over FY13-17**

## Retail in India offers vast opportunities

### CPPIB deal - a key catalyst for growth

- Favorable demographics (47% of India's population <24 years) and shift in trade toward organized retailers should drive significant growth in the Indian retail sector (12% CAGR over FY15-20E), going forward.
- CPPIB deal could potentially add 4msf of mall space to PHNX's current portfolio of 6msf (i.e., increasing mall portfolio by ~70%).
- CPPIB has infused equity for a 49% stake in PHNX's wholly owned subsidiary, Island Star, by infusing INR16.6b (in tranches). Island Star operates the PMC Bangalore mall, which is valued at a 6.25% cap rate using one-year forward EBITDA.
- Post CPPIB's capital infusion, PHNX acquired a land parcel in Wakad (Pune) to develop a mall with an area of 1msf; it has further mixed development potential of 0.8msf.

### Multiple factors driving prospects for India's retail sector

India's retail market is expected to reach a size of USD1t by 2020 (as per FICCI and management consultancy PWC), growing at a CAGR of 12%. With increasing household income, discretionary spending too is gradually rising (consumers are increasingly vying for quality and premium products).

Urbanization in India is expected to touch 40% in 2020, rising from 31% in 2015. By the same year, there could be more than 200 million nuclear households, representing 25-50% higher consumption per capita expenditure. Backed by robust economic growth and rising household income, consumer spending in India is expected to touch USD3.6t by 2020, increasing India's share in global consumption to 5.8% – more than twice the current level. India's average household income is expected to triple to USD18,500 in 2020, up from USD6,400 in 2010 - acting as a major driver in retail growth and leading to the evolution of new consumer segments. Notably, increasing disposable income levels and a rising number of sophisticated consumers have boosted demand for premium products.

### CPPIB deal to act as a key growth catalyst

In April 2017, PHNX announced a deal with CPPIB with a clear goal to create best-in-class retail malls in India via its wholly owned subsidiary, Island Star Mall Developers, which would own new malls under the said deal.

As part of the deal, CPPIB has infused equity capital of INR16.6b (in tranches) for a 49% stake in Island Star. Island Star owns the 1msf HSP Bangalore mall (also has 2msf of potential developable area under it). PHNX shall manage all developments and operational assets under this platform and earn a fee based income like property management fees (4% of gross rentals), commission for new leases and fees for acquisition of land & development.

PHNX will be able to add up to 4 malls to its current retail portfolio of 8 malls post the CPPIB deal. Also, equity infusion and rental income from the HSP Bangalore mall (INR1b in FY17) should help PHNX to invest toward adding four malls (with 1msf of retail space each). This, coupled with an increase in rentals from the existing malls, significantly strengthen the company's growth prospects. Along with CPPIB's capital infusion of INR16.6b, PHNX plans to borrow INR16b which shall be used towards constructing new malls.

### PMC Bangalore mall growth track record

**Exhibit 34: Consumption grew at CAGR of 28% over FY13-17**

**Exhibit 35: Footfall nearly doubled over FY13-17**

**Exhibit 36: Occupancy level over FY13-17**

**Exhibit 37: Rentals psf has grown at 12% CAGR over FY13-17**

**Exhibit 38: Equity valued at INR17b pre money (1<sup>st</sup> tranche)**

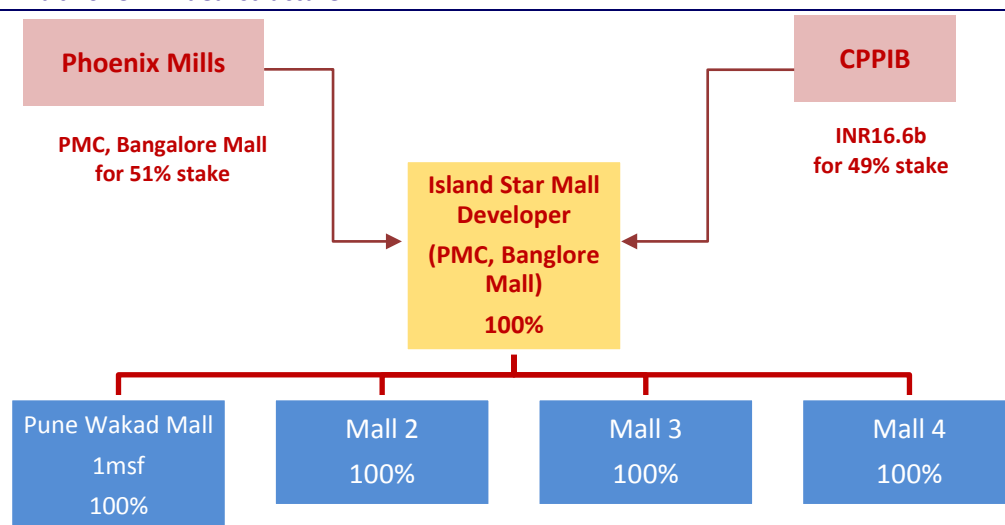

Particulars	INRb

**Exhibit 40: CPPIB deal structure...**

\*PHNX will add up to 4 new malls under CPPIB deal ; Source: Company, MOSL

**CPPIB has investment of USD10b in retail assets globally**

CPPIB, which manages assets worth over USD250b globally, has made an investment of USD10b in the shopping centers across Europe, America and Asia. Through this strategic investment platform, PHNX's aim is to develop retail-led mixed-use assets in the top cities of India.

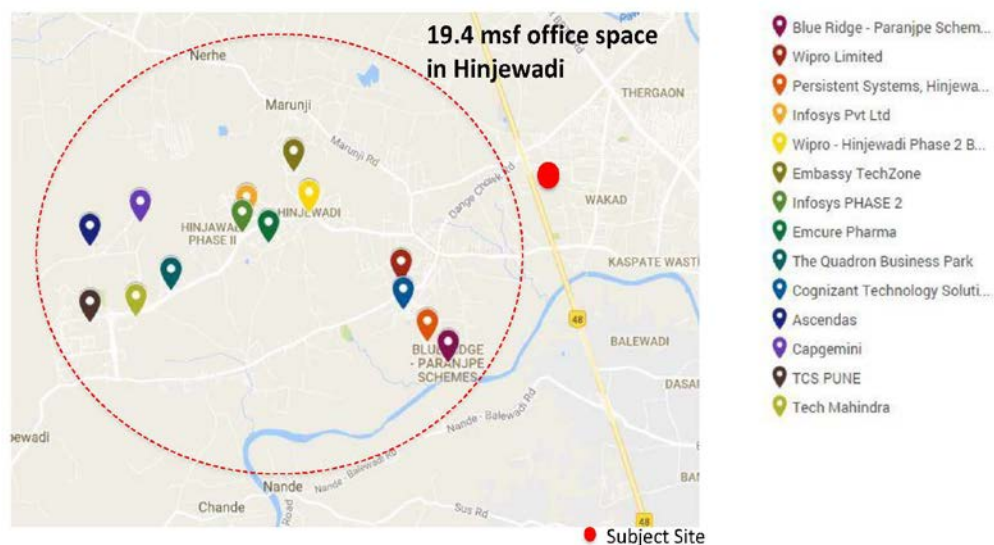

**Pune Wakad land acquisition marks first mall development under CPPIB platform**

Post capital infusion of INR7.24b (first tranche) from CPPIB, the company acquired a land parcel in Pune. The 13-acre land parcel in Wakad, Pune with 1.8msf of potential developable area was acquired for INR2.3b (including TDR) to develop a mall of 1msf; rest 0.8msf for mixed-use development.

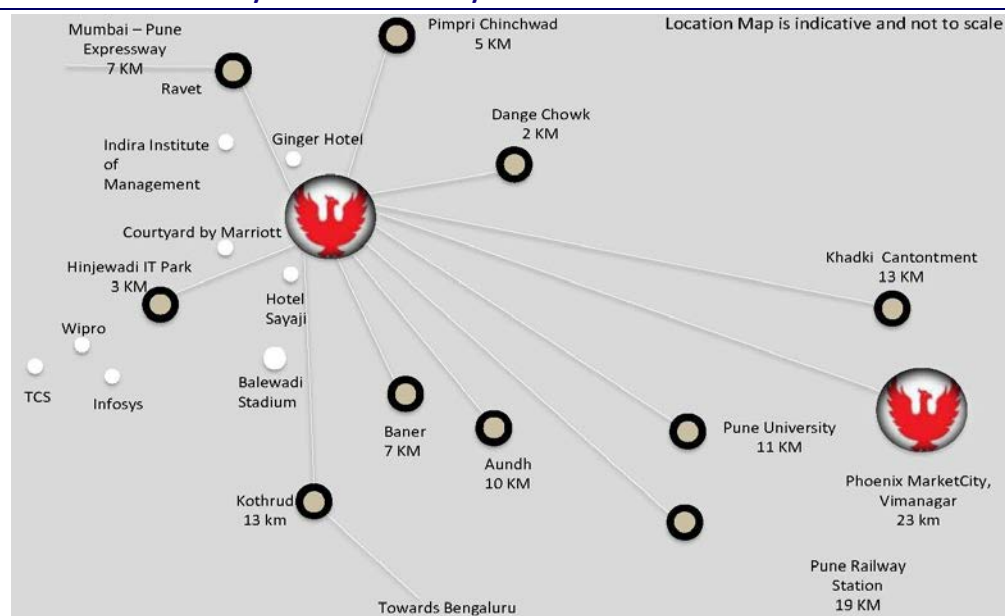

Wakad mall shall have strategic access to:

- Commercial areas such as Hinjewadi, Baner and Aundh
- Residential areas such as Wakad, Baner, Aundh, Balewadi, extending up to Kothrud in south-west of Pune
- Strong commercial catchment of 25msf in Hinjewadi (19msf and expanding) and Aundh/Baner (6msf and expanding)

- Very dense residential population of middle-to-high income group

**Exhibit 41: Commercial catchment - Hinjewadi**

Source: Company, MOSL

**Exhibit 42: Connectivity to Wakad from key locations**

Source: Company, MOSL

PHNX already has a PMC mall located in east Pune with 1.2msf of space (primarily caters to east and central Pune crowd). However, the recently acquired land parcel is in Wakad, which is in west Pune and 23km away from the existing PMC mall. The existing mall in Viman Nagar serves the CBD of Kharadi, as well as the surrounding residential areas like Kalyani Nagar, Boat Club, Koregaon Park, and neighboring towns (e.g. Ahmednagar).

## PHNX to generate INR23.8b CFO over FY18-20

### Existing assets to provide 4.6msf of potential developable area

- PHNX's 6msf of retail mall portfolio provides it with strong cash flows. Growth going forward is also expected to be driven by renewals in HSP & Palladium and PMC, Chennai mall.
- Its residential projects of 3.3msf have already garnered an amount equal to its estimated total cost of projects. Therefore, unsold stock and pending collections are expected to help generate strong operating cash flows (INR23.8b over FY18-20, in our view).
- With the next leg of growth being fully funded via CPPIB deal and minority buyouts now complete, PHNX's existing mall and commercial properties are expected to generate strong free cash flows. PHNX has spent INR13.3b toward acquiring minority stakes in its subsidiaries, which operate various malls.
- We believe these free cash flows can be utilized to unlock commercial (office space) development potential of 4.6msf in its existing land parcels.

### Cash flow from retail and residential to aid growth ahead

We expect PHNX to generate CFO of INR23.8b (FCF of INR6.8b) over FY18-20, primarily contributed by its retail assets and residential segment. Its retail assets provide consistent cash flows. Growth in the retail segment is expected to be driven by upcoming major renewals in HSP & Palladium and PMC Chennai (more than 50% of leasable area).

PHNX has a residential portfolio of 3.3msf (comprising three projects), of which unsold inventory stands at 1.5msf (FY17). Construction cost for 'The Crest' project has already been incurred, and shall be recovered in the form of collections/sales. This implies that cash flows from receivables/balance inventory to be sold would be available at the company's disposal. The remaining two projects – Kessaku and One Bangalore West – are under construction; total construction cost for these is estimated at INR12.9b, while land cost (already been incurred) stands at INR3.5b. PHNX has already collected INR12.9b (3QFY18) from customers, and balance collection stands at INR2b (3QFY18). Further, unsold inventory for all the three projects is 1.5msf, and sales value from the said inventory is INR19.4b (assuming average realization), which shall be freely available at PHNX's disposal (likely to be deployed toward unleashing its potential developable area of 4.6msf).

#### Exhibit 43: PHNX has already covered construction cost from the customer's collections...

Residential Projects	Estimated Construction Cost (INR m)	Collections (INR m) (3QFY18)	Receivables from customers (INR m) (3QFY18)	Collections over and above cost (INR m)
One Bangalore West, Bangalore	9,500	10,528	1,018	2,046
Kessaku, Bangalore	3,400	2,353	987	-60
<b>Total</b>	<b>12,900</b>	<b>12,881</b>	<b>2,005</b>	<b>1,986</b>

Source: Company, MOSL

**Exhibit 44: PHNX to generate INR19.1 b CF (pretax) from residential projects**

Project Name	Unsold inventory (3QFY18)	Avg. Realization (INR psf)	Sales Value of inventory at avg realization (INR m)
One Bangalore West, Bangalore	1.01	11,724	11,841
Kessaku, Bangalore	0.35	17,970	6,290
The Crest, Chennai	0.10	9,771	977
<b>Total</b>			<b>19,108</b>

Source: Company, MOSL

**Exhibit 45: Sales volume to grow at 73% CAGR over FY17-20**

Source: Company, MOSL

**Exhibit 46: Sales value to grow at 80% CAGR over FY17-20**

Source: Company, MOSL

We expect higher sales absorption from One Bangalore West and Kessaku, which is expected to help drive higher sales in the residential portfolio.

**Internal accruals and debt to fund investment in developable area**

PHNX has acquired stakes from minority stakeholders by spending INR13.3b over FY14-9MFY18 (refer below exhibit).

**Exhibit 47: PHNX's progressive stake acquisition in subsidiaries**

Subsidiary	Development Name	2010	Dec-17
Offbeat Developers	PMC, Mumbai	24%	100%
Vamona Developers	PMC, Pune	59%	100%
Classic Mall	PMC, Chennai	31%	50%
Gangetic Hotels	Courtyard by Marriott, Agra	21%	100%
Pallazio Hotels	The St. Regis, Mumbai	53%	73%
Alliance	Fountainhead, Pune	58%	100%
Classic Housing	Crest A, B	34%	50%
Island Star	PMC, Bangalore	28%	70%
Palladium Construction	One Bangalore West & Kessaku	70%	100%
Big Apple Real Estate (BARE)	Phoenix United – Lucknow, Bareilly	73%	100%
Graceworks Realty & Leisure	Phoenix Paragon Plaza, Mumbai	44%	67%

Source: Company, MOSL

High free cash flow is expected to provide huge headroom for growth, as minority buyouts have already been completed. Hence, cash flows will be available for deploying toward 4.6msf of potential developable area.

**Exhibit 48: FCF to improve going forward**

Source: Company, MOSL

With low cost of debt, PHNX can capitalize on further opportunities in its existing assets. Since, the land cost has already been paid for only the construction cost is required to be incurred.

**Exhibit 49: Gross debt breakup (3QFY18)**

Source: Company, MOSL

**Unlocking value in existing assets by exploring other opportunities**

HSP was among the first developments in India to combine retail & entertainment, commercial, hotel and residential properties into an integrated lifestyle destination. The company is using its market expertise and brand name to replicate the success of HSP in other parts of Mumbai as well as other cities in India (via its Phoenix MarketCity, Phoenix United, residential, commercial and hospitality projects).

**4.6msf of potential developable area for PHNX across existing assets**

PHNX has 4.6msf of potential developable area, which shall be added to its portfolio. With this development potential, PHNX will not be required to incur any land cost. Only construction cost has to be incurred.

**Exhibit 50: 4.6msf potential developable area from its existing assets**

Asset Name	Tentative Development	City	Potential Developable (msf)
HSP & Palladium	Retail and Commercial	Lower Parel, Mumbai	1.0
PMC Mall	Commercial	Viman Nagar, Pune	0.4
PMC Mall	Commercial	Wakad, Pune	0.8
PMC Mall	Commercial, mall and hotel	Bangalore	2.0
PMC Mall	Commercial	Chennai	0.4
<b>Total</b>			<b>4.6</b>

## REITs shall usher much-needed liquidity in RE sector

### REITs shall bring back real estate sector into focus

#### What is REITs and what does it imply for the RE sector...

REIT is an investment vehicle that owns and operates real estate-related assets, and allows individual investors to earn income produced through ownership of commercial real estate without actually having to buy any assets.

An underdeveloped capital and debt market, coupled with limited options for raising funds, has resulted in significant cash blockage for developers owning assets. REIT as an investment vehicle is expected to infuse much-needed liquidity in the sector, helping scale up investments.

REITs are modeled after mutual funds, and provide their investors with all types of income streams and benefits of long-term capital appreciation. A REIT also trades on major stock exchanges and provides investors with a highly liquid stake in real assets typically offering high yields.

Over the last decade, globally, REITs have developed into a mature market force, providing easy access to high-quality assets, along with stable return on investments. To illustrate – as of 2016, there were over 500 REITs operating across various countries, with total market capitalization of more than USD900b.

**Taking a closer look at REITs globally...**

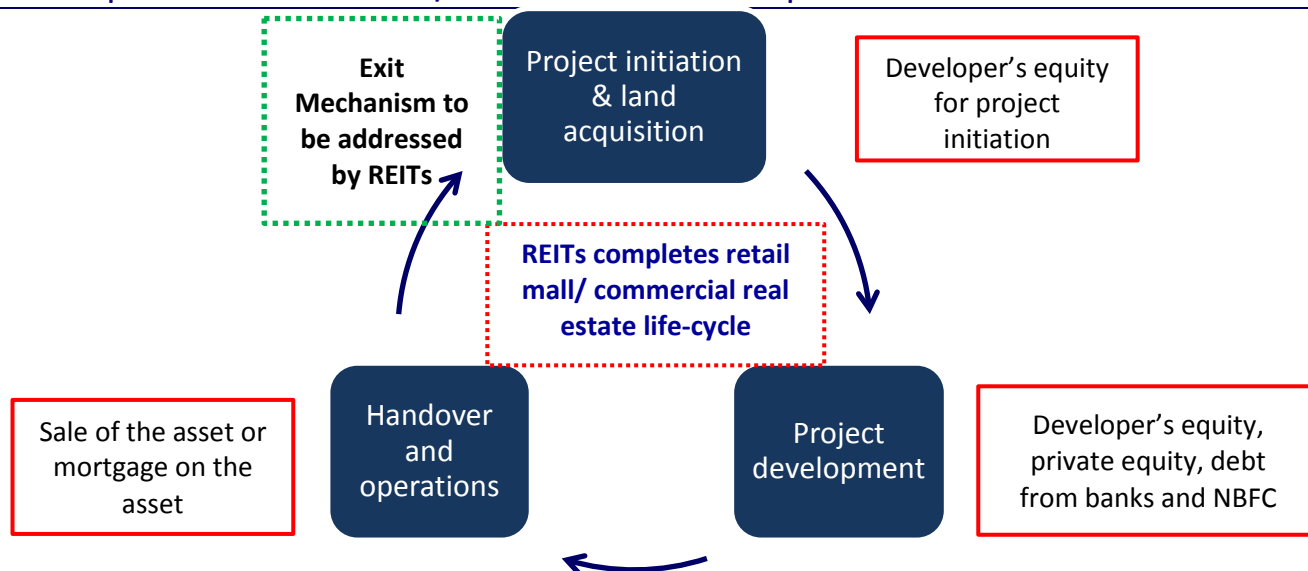

- **USA:** The US Congress created the Real Estate Investment Trust (US-REIT) in 1960 to make large-scale, income-producing real estate investments accessible to smaller investors. Since then, US-REIT has dominated the market, and has a market capitalization which grew from USD 1.4943 billion in 1971 to USD 1 trillion by 2016.
- **Singapore:** Since the launch of the first Singapore REIT in 2002, the REIT sector has become one of the biggest success stories of the Singapore Stock Exchange (SGX). Singapore REITs have since grown into a USD 53 billion market. Currently, the total 'REITable' stock available in Singapore's CBD is 2.687 million sqm.
- **Australia:** The first REIT in Australia was the General Property Trust – a listed property trust started in 1971. A-REITs are the largest REIT MARKET in Asia with a total market capitalization of almost €72 billion, accounting for 9.36 percent of the global REIT market capitalization. The Sydney CBD market has 3.060 million sq. m. of REITable stock.

### Importance of REITs in retail mall/ commercial real estate development

REITs, which complete the retail/ commercial real estate project cycle, is expected to provide an exit route to developers from the completed retail mall/ commercial assets as it is expected to help attract investors seeking investment in high-quality investment grade properties. Additionally, REITs has also opened up the avenues to get funding for under construction properties which shall also help to foster the development process of the assets.

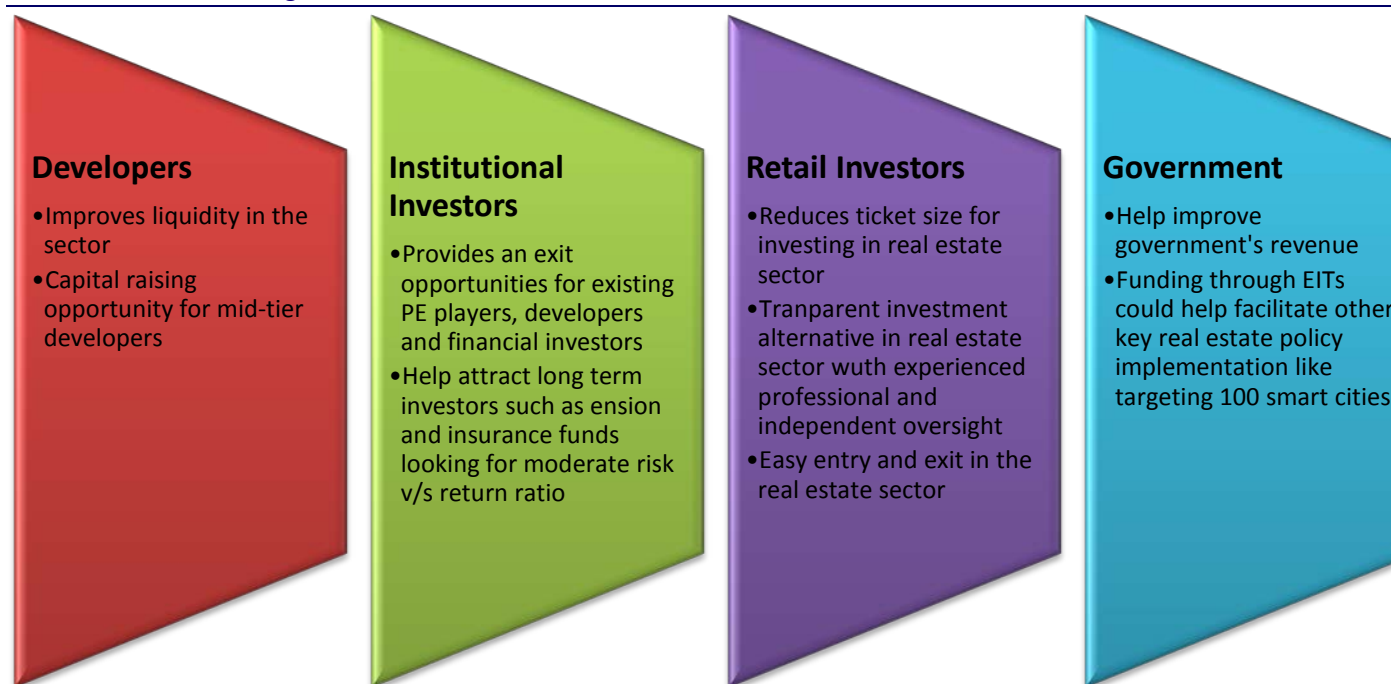

Exhibit 56: Importance of REIT in retail mall/ commercial real estate development

Source: KPMG, MOSL

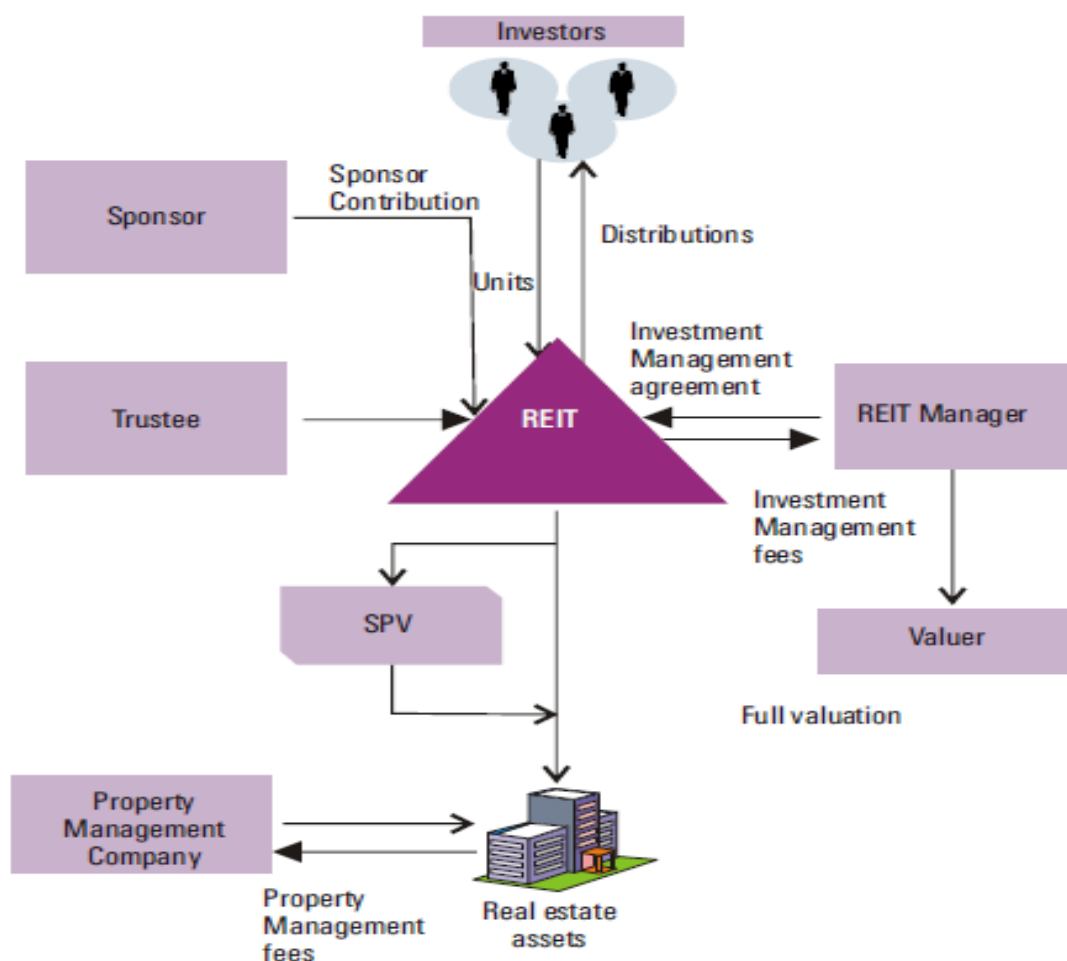

### Advantages of REITs to various stake holders

Exhibit 57: REITs advantage to various stakeholders

Source: KPMG, MOSL

Exhibit 58: A typical REITs structure

Source: KPMG, MOSL

### Recent key changes made by SEBI in REITs

- Allowing REITs to invest in two level holding structures with, inter-alia, following conditions:
  - a. REIT shall hold or proposes to hold controlling interest and not less than 51% of the equity share capital or interest in the underlying holdco/SPVs. Further, a holdco as well shall hold controlling interest and not less than 51% of the equity share capital or interest in the underlying SPVs.
  - b. Majority of the Board of SPV and Holdco to be appointed by Investment Manager, in consultation with the trustee.
  - c. Ultimate holding interest of the REIT/InvIT in the underlying SPV(s) is not less than 26%.
- Rationalizing the definition of associates and related parties and aligning them in line with the SEBI (Listing Obligations and Disclosure Requirement) Regulations.
- Allowing REITs to invest upto 20% in under construction assets
- Removing the cap on the number of sponsors and allowing concept of sponsor group.

## SWOT Analysis

- ✓ Presence in six key consumption centers in India
- ✓ Single entry point for any retailer entering India
- ✓ Mall management skills help PHNX to deliver growth from existing assets by continuously churning retail tenants

# S

## STRENGTH

- ✓ PHNX's flagship mall HSP & Palladium cannot increase its leasable despite making rentals of INR311psfp, due to space constraints
- ✓ Slow movement in Bangalore's residential projects

# W

## WEAKNESS

- ✓ Shift from unorganized to organized retailer to act as key growth driver
- ✓ Grade A mall vacancy at all-time low, which shall provide mall developers with huge opportunities
- ✓ 47% of Indian population is below 24 years of age, which provides PHNX's malls huge potential to act as consumption centers

# O

## OPPORTUNITY

- ✓ E-commerce could dampen consumption at malls, leading to lower rentals
- ✓ Although fire & safety checks are in place, any unforeseen event can dampen the brand of the company

# T

## THREATS

## Bull & Bear case

### Bull case

- ☑ In case of retail malls, we have assumed a lower vacancy rate and higher rentals per month at INR159pm (avg.) (FY19) and a cap rate of 7.5% vis-à-vis our base case rental of INR153pm (avg.) (FY19) and a cap rate of 8%. We have assumed rentals to grow at an average CAGR of 9% vis-à-vis our base case average CAGR of 8% over FY18-22E. In case of commercials, we have assumed INR102pm (FY19) (avg.) as the rental for all commercial assets vis-à-vis our base case rental of INR98pm (FY19) (avg.). Hence, we increase the NAV of retail and commercial assets by 23%.
- ☑ In case of hotels, we have assumed a lower vacancy rate and higher room rentals per day at INR9,035 (avg.) (FY19) vis-à-vis our base case average room rental of INR8,569 (avg.) (FY19).
- ☑ Target price in the base case is INR732. However, as per our bull case scenario the target price would stand at INR899, 23% above the base case NAV.

### Bear Case

- ☑ In case of retail malls, we have assumed a higher vacancy rate and lower rentals per month at INR146pm (avg.) (FY19) and a cap rate of 9% vis-à-vis our base case rental of INR153pm (avg.) (FY19) and a cap rate of 8%. We have assumed rentals to grow at an average CAGR of 7% vis-à-vis our base case average CAGR of 8% over FY18-22E. In case of commercials, we have assumed INR96pm (FY19) (avg.) as the rentals for all commercial assets vis-à-vis our base case rental of INR98pm (FY19) (avg.). Hence, we decrease the NAV of retail and commercial assets by 26%.
- ☑ In case of hotels, we have assumed a higher vacancy rate and lower room rental per day at INR8,164 (avg.) (FY19) vis-à-vis our base case average room rental of INR8,569 (avg.) (FY19).
- ☑ Target price in the base case is INR732. However, as per our bear case scenario the target price would stand at INR538, 27% below the base case NAV.

**Exhibit 59: Scenario Analysis – Bull & Bear Case**

Particulars	Bull case			Base Case	Bear case		
	INR m	Per Share (INR)	%		INR m	Per Share (INR)	%

<b>Up/down</b>		48%		<b>21%</b>		-11%	

Source: MOSL

## Expect PAT CAGR of 37% to INR4b over FY18-20

Net debt to equity ratio to come down to 0.7x by FY20 from 1.6x in FY17

- PHNX is expected to deliver revenue CAGR (FY18-20) of 15% to INR21.3b, primarily driven by retail and residential revenue CAGR of 12% and 42%, respectively.
- Retail is the key segment contributing 65% of revenue in FY18. Within retail, the HSP & Palladium mall contributes 41% of revenues. We expect HSP & Palladium to grow at 14% in FY19, mainly led by an increase in occupancy to 96% from 91% in FY18 and a rise in rentals by 8% to INR396psf per month.
- We expect the EBITDA margin to expand by 140bp over FY18-20, leading to EBITDA CAGR of 15%. The expansion in margins is expected to be driven mainly by higher rentals via an improved tenant mix. However, we expect PAT (after MI) CAGR of 37%, mainly due to a decline in interest cost from INR3.6b in FY18 to INR3b in FY20.
- We expect PHNX to generate CFO of INR24.1b over FY18-20, which is likely to be utilized for debt repayment, leading to lower a net debt to equity ratio of 0.6x by FY20 v/s 1.6x in FY17.

### Revenue to grow at 15% CAGR over FY18-20

We expect PHNX to deliver revenue CAGR (FY18-20) of 15% to INR21.3b, mainly driven by retail revenue CAGR of 12% to INR13.3b and residential revenue CAGR of 42% to INR2.8b. We expect PHNX's office leasing and hospitality segments to deliver revenue CAGR of 33% and 7%, respectively, over FY18-20. De-growth of 11% in FY18 revenue is on account of change in accounting treatment of PMC, Chennai mall. For FY18 and onwards it has been classified as an associate company as against subsidiary company earlier.

**Exhibit 60: Revenue to grow at CAGR of 15% over FY18-20E**

Source: Company, MOSL

**Exhibit 61: Segmental revenue breakup (INRb)**

Source: Company, MOSL

**Exhibit 62: Revenue contribution from each segment**

Source: Company, MOSL

The retail segment is the key segment contributing 65% of revenue in FY18E. Growth in the segment over FY18-20 is likely to be driven by its existing mall portfolio. Within the retail segment, HSP and Palladium are key malls (41% revenue contribution). We expect HSP and Palladium to grow at 14% in FY19, mainly led by an increase in occupancy to 96% from 91% in FY18 and a rise in rentals by 8% to INR396psf per month (growth is mainly driven by 13 new small stores that have replaced the anchor tenant, which shall help in pushing rental yields).

**Exhibit 63: Retail income (excluding Chennai Mall) to grow at 4% CAGR over FY17-20E**

**Exhibit 64: Retail income (including Chennai Mall) to grow at 12% CAGR over FY17-20E**

Residential income is expected to grow at a CAGR of 42% over FY18-20, as its key residential projects One Bangalore West and Kessaku are nearing completion. Office leasing income will be driven by commissioning of new office space of 0.2msf in FY19 (The Fountainhead, Pune). Hospitality and other income include income from hotel rooms, banquets and restaurants income. We expect St. Regis (Hotel) to continue operating at optimum level of occupancy (75%) and drive revenues.

**Exhibit 65: Residential income to grow at 42% CAGR over FY18-20E**

**Exhibit 66: Commercial income to grow at 33% CAGR over FY18-20E**

**Exhibit 67: Hospitality segment to grow at 7% CAGR over FY18-20E**

Source: Company, MOSL

**PAT growth to outperform EBITDA growth due to declining interest cost**

We expect the EBITDA margin to expand by 140bp over FY18-20, leading to EBITDA CAGR of 16% (largely in line with revenue CAGR of 15%). The expansion in margins is expected to be driven mainly by higher rentals via an improved tenant mix.

However, we expect PAT (after MI) CAGR of 37%, mainly due to a decline in interest cost from INR3.6b in FY18 to INR3b in FY20. The decline in interest cost is expected to be mainly driven by huge cash surplus (CFO of INR23.8b) generated over FY18-20 from its existing assets across segments. Thus, we expect its debt to decline from INR37.8b in FY18 to INR27.3b in FY20. Expansion through new malls will be funded through equity infusion of INR16.6b under the CPPIB deal. This will also lead to an increase in RoE from 8.5% in FY18 to 10.6% in FY20.

**Exhibit 68: EBITDA margin to expand by 140bp over FY18-20E**

Source: Company, MOSL

**Exhibit 69: PAT to grow at 37% CAGR over FY18-20E**

Source: Company, MOSL

**Exhibit 70: Net DE ratio to come down to 0.7x by FY20E**

Source: Company, MOSL

**Exhibit 71: Debt repayment would lead to lower interest**

Source: Company, MOSL

**Exhibit 72: PHNX to generate CFO of INR23.8b over FY18-20**

Source: Company, MOSL

**Exhibit 73: RoE and RoCE to show an improving trend**

Source: Company, MOSL

We expect working capital cycle to reduce by 39 days over FY17-20E from 193 days in FY17, mainly with revenue recognition from the residential segment leading to lower inventory.

**Exhibit 74: WC cycle is higher due to inventory build-up of residential business**

Source: Company, MOSL

## Valuation and view

### Initiating with Buy

#### PHNX well placed to ride on India's consumption story

- India's retail industry is at an inflection point, with its market expected to reach a size of USD1t by 2020, growing at a CAGR of 12%. Multiple MNC retailers have entered the Indian market, and many more are expected to participate in this growth story. We believe that PHNX offers a unique way to play this retail growth story via its efficient operations and multiple functions under one roof.
- We estimate that PHNX's retail annuity income (excluding CAM charges) will grow steadily from INR7.7b in FY17 to INR11.5b in FY20, largely led by (a) upcoming major renewals in HSP and Palladium (54% of lease area) and PMC Chennai (53% of lease area) and (b) scale up of Palladium Mall, Chennai and commercial assets. Our earnings estimates suggest that, over FY17-20, PHNX will post (a) revenue CAGR of 15%, (b) EBITDA CAGR of 16% and (c) PAT CAGR of 37%. PAT is expected to grow at a faster pace, mainly due to declining interest outgo. PHNX is expected to generate CFO of INR23.8b, which, in our view, will be utilized for debt repayment. Thus, debt is expected to decline from INR36.3b in FY17 to INR24.3b in FY20. Growth over the next two years is expected to be driven by sweating of existing assets only. Growth in the Pune mall (under CPPIB deal) will start kicking from FY22.
- We believe that PHNX is a unique way to play India's retail growth story. Moreover, with clarifications and issues surrounding REITs now behind, we expect India to attract strong inflows, where PHNX can become a great choice. We prefer Phoenix Mills based on a) strong operational performance providing advantages over competition, b) scalability through CPPIB deal and c) robust cash generation leading to a reduction in gearing and providing opportunities to acquire new malls. The stock trades at a PE of 29x/23x FY19/20E, P/BV of 2.6x/2.3x FY19/20E and EV/EBITDA of 13.7x/11.4x respectively. We value retail assets based on NAV approach, assuming a cap rate of 8% and a discount rate of 13%. We initiate coverage on PHNX with a **Buy** rating and SOTP based target price of INR732 (upside 21%).

#### Exhibit 75: Initiate with an upside of 21%

- Apart from the planned addition of four new malls under the CPPIB deal (wherein land acquisition for one mall is already done), PHNX has 4.6msf of development potential from its existing assets. It is important to note that the said development potential shall have an outflow of construction cost only as land cost has already been paid for. We have not factored in 4.6msf of

development potential in our valuation, which could act as a next trigger for growth.

- PHNX acquired partly completed mall for INR2,310m (excluding stamp duty) in Indore (FY17) in an online auction conducted by the bank. PHNX has already paid INR580m and is waiting to get a clean title on land from the bank. Company has focused on planning the mall during the said period of one year and once the possession of the property is given within 30-36 months before the company will be able to complete the remaining construction, the interior works and get the mall operational. Additional construction cost to be incurred for the mall is INR3,750.
- Of the total 17 acres land parcel in Lower Parel Mumbai, PHNX has balance land parcel of 3 acres (adjacent to HSP Mall), with a development potential of 1msf. The same offers an optional value of INR102 per share, which we have not included in our target price.

**Exhibit 76: Optionality value of INR102/share on Lower Parel land**

Optional Value	
Potential leasable area (in msf)	1
Lease psf pm	280
Total income pa (INR m)	3,360
Maintenance cost @ 5% (INR m)	168
Net Lease Income (INR m)	3,192
Cap value @ 8% (INR m)	39,900
PV @ 13% disc rate and 5yrs (INR m)	21,656
Construction cost @ INR4500psf (INR m)	4,500
Other FSI and approval cost (INR m)	1,500
Total Outflow (INR m)	6,000
Net Value (INR m)	15,656
Value per share (INR)	102

## Key risks

---

### Operational risks

Securing government approvals is crucial in project development. Any delay in approvals can hamper project dynamics significantly. Also, post RERA implementation, regulations have become stricter than ever, with severe penalties imposed for project delays. All this could affect economic viability of projects, and thus, brand credibility.

### Threat from e-commerce

PHNX's rental incomes are indirectly linked to consumption or sales made by the tenants. In recent times, the trend of online shopping in India is increasing rapidly. This could possibly affect sales of the tenants, leading to lower rentals for PHNX.

### Macroeconomic factors

Any decline in property prices could exert pressure on the real estate market. Also, modifications in government policies, varying market movements and changing consumer preferences could considerably damage players operating in the real estate sector.

### Increasing land cost

The largest cost incurred by an entity in the real estate sector is toward land acquisition. As land prices increase, the impact shall be felt on the margins and financials of the company.

## Management overview

---

### **Ashokkumar Ruia, Chairman & Managing Director**

Mr. Ruia is a graduate from Cambridge and has pursued an active career in both business and sports. He has the unique distinction of representing the country in two sports, Bridge and Golf, demonstrating an inimitable desire to excel in whatever he undertakes. He has been on the Board of PHNX since 1963. He has vast experience in managing the company's affairs and over the years has contributed significantly to its growth. He is actively involved in mentoring the leadership team and in various aspects of the company's expansion plans.

### **Atul Ruia, Jt. Managing Director**

Mr. Ruia is a graduate in Chemical Engineering from the University of Pennsylvania and holds a degree in Business Management from the Wharton School of Finance. He joined the Board of PHNX in 1996 and is the key visionary, pioneer and force behind the development of High Street Phoenix, Mumbai's first retail-led mixed use destination. It was under his aegis that the Company embarked upon a pan-India asset creation strategy with the flagship brand of 'Phoenix MarketCity'.

### **Shishir Shrivastava, Jt. Managing Director**

Mr. Shrivastava graduated from IHM, Bengaluru and has been associated with the Phoenix Group since 2000 in various capacities. While he was instrumental in shaping up High Street Phoenix to its current reputation, he also laid the foundation for the service and advisory verticals and seen through the successful culmination of the Palladium Hotel and Phoenix Marketcity projects, launched in phases. As Joint Managing Director, he continues to drive strategy and oversee several critical functions of the Company.

### **Pradumna Kanodia, Director – Finance**

Mr. Kanodia is a qualified Chartered Accountant and Company Secretary. He has over 27 years of experience in corporate management, finance and commercial matters, fiscal and strategic planning, budgeting and cash flow management. He heads the finance and accounts teams and plays a key role in fund raising and liaising with banks for debt funding.

Analyst ownership of the stock	No

A graph of daily closing prices of securities is available at [www.nseindia.com](http://www.nseindia.com), [www.bseindia.com](http://www.bseindia.com). Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO".
