BSE-30: 39,908

June 2019 quarter earnings preview. We expect net income of the KIE coverage universe to increase 1.3% yoy in 1QFY20, led by the banking sector, which will likely report strong earnings growth due to a low base. Excluding the banking sector, we expect net income to decline 6.7% yoy. We expect robust yoy growth in the net income of (1) banks (stable operating performance, despite marginal qoq slowdown in loan growth), (2) construction materials (increase in realization papering over low volumes) and (3) capital goods (uptick in execution from base orders for L&T) sectors. We expect a weak quarter for (1) automobiles (lower sales volumes and margin compression due to increase in discounts), (2) metals & mining (decline in realizations) and (3) oil, gas & consumable fuels (weak refining margins and adventitious losses for downstream companies). We expect net income of the BSE-30 Index to grow 13.2% yoy while that of Nifty-50 Index to increase 1.3% yoy. We estimate 'EPS' of the BSE-30 Index at Rs1,975 for FY2020 and Rs2,353 for FY2021. Our 'EPS' estimates for Nifty-50 Index for FY2020 and FY2021 are Rs614 and Rs725.

We expect net income of the KIE universe to increase 1.3% yoy in 1QFY20

SECTORS-WISE EXPECTATIONS

Exhibit 1: We expect yoy decline in the net income of automobiles, metals & mining and oil & gas sector
 Sector-wise expectations for the June 2019 quarter results

| | Key points | Key points |
|---|--|---|
| Automobiles & Components | We expect a weak quarter for auto companies; revenue/EBITDA/net profit for companies under our coverage are likely to decline by 8%/24%/52% yoy. EBITDA margin will likely decline by 210 bps yoy due to an increase in discounts and negative operating leverage. | We expect auto component companies under our coverage to report a relatively better quarter with 6% yoy revenue growth due to exposure to steady aftermarket demand and increase in exports (for Bharat Forge) while EBITDA will likely decline by 3% yoy in 1QFY20. Battery companies will likely benefit from the recent decline in lead prices and will report 7-25% yoy EBITDA growth. |
| Banks | We expect banks under coverage to report stable operating performance and recovery in earnings though there are a few one-offs for the quarter: (1) BoB (with Dena and Vijaya) and IndusInd Bank (with Bharat Financial) will report merged financials, (2) treasury income support would be higher given the interest rate movement, (3) the base quarter had a one-off net interest income (Bhushan Steel). Loan growth has slowed to ~12% yoy which would put pressure on revenue growth and we expect the decelerating trends to be more visible in private banks with retail oriented loan books like HDFC Bank and IndusInd Bank. | We maintain our positive outlook on corporate banks (ICICI Bank and SBI) given their inexpensive valuations and visibility of steady progress towards RoE normalization in FY2020-21E. Yes Bank would face one of its most challenging quarters. There is likely to be a lot more focus on asset quality for IndusInd Bank and RBL Bank. Slowdown in revenue growth (loan and non-interest income) for banks like HDFC Bank is likely to dominate the discussion for the quarter. We see limited business concerns for Federal Bank and SFBs like Equitas, AU and Ujjivan which are seeing steady improvement in core performance. Sharp rise in ticket size and risks emerging from rapid growth in MFI AUMs in eastern India would be a key discussion area for banks which have a high share of MFI loans. |
| Capital Goods | The key themes in the industrial space are (1) continued weakness in greenfield private capex, (2) good support to capital goods companies from base orders for capacity augmentation, efficiency improvements, and specific large orders in hydrocarbon and urban infrastructure segments, (3) moderating PGCIL capex, (4) improving trends in execution for EPC companies and (5) some support to margin from operating leverage benefits and lower commodity prices. Within the EPC space, the recent uptick in the pace of execution will help L&T report ~10% yoy revenue growth for its core E&C business. KEC and KPTL will post strong double-digit growth driven by the railways and civil businesses. BHEL will likely focus on the strong executable backlog in the power segment and on diversification through new order wins in the industry segment. We expect revenues of ABB and Siemens to be driven by base orders as greenfield private capex is still weak. Thermax will report a good result, benefitting from recent momentum in execution and low yoy base of margin. | Roads: 1QFY20 will see weak execution trends for companies with limited executable order backlog (Sadbhav Engineering, Dilip Buildcon). IRB would grow construction revenues meaningfully over a low yoy base and Ashoka Buildcon would report steady growth given its large executable backlog. Companies with good execution track records such as Dilip Buildcon and Ashoka Buildcon are better-placed on this count, in our view. |
| Construction Materials | 1QFY20 witnessed a sharp increase in cement prices despite stagnant demand. Pan-India trade prices were up Rs35/bag (+11% qoq), North and East witnessed Rs30-50/bag (+11-16% qoq) hike, whereas prices in West and Central regions increased Rs30-35/bag (10-12% qoq). Blended prices for our coverage universe during the quarter are +8% qoq or Rs20/bag, factoring price discounts and smaller hikes in the trade segment. Industry cement volumes (per DIPP) increased by 1.8% for April-May 2019. However, our checks suggest weaker volumes during the quarter. We estimate volume decline of 1-3% yoy for our coverage universe in 1QFY20E. UTCEM and SRCM should witness 0-2% yoy volume growth with ramp-up of new capacity, whereas others would see 0-3% yoy volume decline in 1QFY20E. | We expect costs to increase sequentially due to negative operating leverage with weak volumes partially offset by lower variable costs. While pet coke prices were flat qoq, most companies consumed high cost inventory in 4QFY19 and should witness 0-2% reduction in fuel cost in 1QFY20E. Diesel prices were flat qoq implying stable freight costs. We estimate a sharp increase in EBITDA/ton across the sector led by higher prices across regions and stable costs. For our coverage, we estimate Rs250/ton qoq increase in EBITDA/ton or 27% qoq in 1QFY20E with higher expansion in North/pan-India players versus South focused companies. |
| Consumer staples | Even as we expect most companies in our coverage universe to report similar-to-4QFY19 yoy volume/revenue growth, aggregate growth is likely to be better than 4QFY19 on account of a positive swing in yoy revenue growth rates for names like Dabur, Page, PIDI, JYL and the alcoholic beverages names. The then-surprising sudden slowdown in the month of March 2019 continued in the first half of 1QFY20 for the staples pack. Some companies have indicated emergence of some green shoots in the month of June. We expect the urban-centric discretionary pack to continue to report better growth than the staples pack. We do note that the discretionary names under our coverage form a fairly wide spectrum and the aggregate does not mean much, to that extent, beyond the relative performance versus staples aggregate being a decent proxy of the urban/rural trends. Reasons being offered for the 'slowdown' remain the same – tight liquidity conditions and sluggishness in rural demand. | HUVR: We model 9% yoy revenue growth in domestic FMCG business led by 6% UVG and 3% price-led growth. On a segmental basis, we bake in 11.5% yoy revenue growth for Home Care and 7% yoy growth for Personal Care. Not building impact of Ind-AS 116, we expect EBITDA margin to expand 50 bps yoy, aided by operating cost efficiencies (including A&SP spends); expect gross margin to move up marginally (+20 bps yoy). Ind-AS 116 adoption to reflect in EBITDA uplift of Rs1 bn and a corresponding higher D&A and interest expenses; negligible impact at the PBT and PAT level. Our estimates do not bake in this impact. ITC: We model 5.5% yoy increase in cigarette volumes and 3% increase in realization (portfolio-level). We forecast 11% yoy growth in cigarette EBIT. We model 9%, 15% and 10% yoy growth in FMCG, hotels and agri-business. Expect strong margin expansion for these segments as well (except hotels where margins would be impacted as gestation costs of the new Kolkata property kick in). |
| Diversified financials | 1QFY20E will likely be a muted quarter for most non-banks with weak loan growth, stable to compressed NIM even as asset quality held on well in most segments. Slowdown across autos, weakness in rural cash flows and delay in government spending led to muted performance in vehicle finance. Retail home loan sales were likely stable but slowdown in developer/LAP segment affected overall loan growth for HFCs. Asset quality performance will likely be strong, in line with the trends observed over the previous few quarters. Rise in NPLs in the wholesale lending segment, especially developer loans, remains a major overhang on the sector. We hence expect non-banks to remain a bit cautious on liquidity and growth over the next few months; management commentary in this regard will be crucial. | While liquidity was not a constraint for most part of the quarter, concerns on impact of defaults and rating downgrades of NBFCs raised some anxieties and likely prompted NBFCs to get a bit cautious on select segments like developer loans. NBFCs are better placed to face any potential liquidity or credit crises (than August 2018) due to well matched ALMs and higher cash/liquidly assets on balance sheet. NBFCs have made conscious efforts to diversify their funding sources such as foreign bonds, retail NCDs etc; rise in loan securitization/assignment has also been a significant avenue. |
| Electric Utilities | Under-recovery of fixed costs, which has been a drag on earnings of NTPC in FY2019 will likely be addressed in forthcoming quarters on account of improvement in plant availability factor. We expect NTPC to report 5.5% qoq increase in PAT in 1QFY20. For Power Grid, we expect healthy growth in net profits (+27.1% yoy) on the back of asset capitalization of Rs192 bn in the trailing 12 months. | Realization for merchant capacities is expected to remain weak due to subdued demand in the short-term market. JSW Energy will benefit on account of the decline in spot prices of coal which have reduced to US\$64 as of June 2019. Tata Power will likely report lower losses at Mundra, though the benefit of the same will be lost to lower earnings contribution from the coal business. |
| Gas Utilities | We expect GAIL to report sequentially higher EBITDA, driven by (1) modest recovery in profits of LPG and petchem production segment, (2) lower operating costs and (3) steady profits of gas transmission and marketing segments. We expect PLNG to report qoq improvement in EBITDA led by (1) robust recovery in volumes and (2) seasonally lower operating costs. | CGD companies are expected to report robust profits led by (1) healthy growth in volumes, (2) sequential expansion in unit gross margins post the recent increase in CNG prices and (3) seasonal decline in operating costs. |
| Internet Software & Services | We expect Just Dial's growth to moderate to 14.5% yoy as base effect catches up. INFOE's core Naukri segment's yoy growth will be buoyant at 20% on improving hiring trends and collections growth. We expect 99acres' revenue growth to sustain at 40% yoy driven primarily by the secondary market. Despite decent revenue growth metrics, we expect margins for both companies to be flat-to-marginally-up on account of investments in tech (INFOE), and higher ad-spends (both INFOE and JUST). | |

We expect yoy decline in the net income of automobiles, metals & mining and oil & gas sector

Sector-wise expectations for the June 2019 quarter results

| | Key points | Key points |
|--|---|---|
| IT Services | <p>We expect double-digit organic revenue growth on yoy comparison for TCS and Infosys powered by ramp-up of large deals and chunkier digital deal sizes. On sequential basis, we expect TCS and Infosys to deliver constant currency (c/c) revenue growth of 3.3% and 3.1%, respectively. HCLT will report a weak sequential quarter due to annual reset of productivity on a few IMS deals and high base of the earlier quarter. Tech Mahindra will disappoint with sequential revenue decline and muted low-single-digit growth on yoy comparison. We expect mid-tier companies to report deceleration in growth rates. We expect demand in the financial services verticals of IT services companies to moderate through the course of FY2020E. We expect volatility in growth in the vertical in the near term.</p> | <p>We expect 20-340 bps yoy decline in EBIT margins of tier-1 IT companies. Reasons for margin decline vary across companies although they can be categorized in the following buckets—(1) higher visa applications compared to the previous year, (2) shortage of talent in the US and decline in H-1B visa approvals have forced companies to rework their talent supply model. Changes in talent supply model, viz. higher localization and increase in subcontracting, have increased the cost structure, (3) investments in business. Infosys and HCLT have stepped up investments in digital through organic build-out and acquisitions and (4) transition costs of large deals won in the past 2-3 quarters. Some of the impact on margins is transient. We note that significant INR depreciation and acceleration in revenue growth provided a cushion for margins in FY2019. These factors are not available to offset headwinds in FY2020E. INR depreciation is critical to defend margins; else there are downside risks to profitability in FY2020E.</p> |
| Media | <p>Broadcasting and distribution: We expect a weak quarter from TV advertising standpoint for listed players (Zee and Sun) due to (1) slowdown in FMCG and auto categories, (2) significant decline in advertising revenue of FTA channels on withdrawal from DD Freedish platform, (3) impact of the drop in reach/viewership of select channels on implementation of TRAI's tariff order, and (4) higher-than-usual allocation of ad spends to the sports genre owing to the Cricket World Cup. We expect Zee/Sun to report 7%/2% yoy growth in advertisement revenues. The impact of TRAI's new tariff order will be visible in domestic subscription revenue growth. We expect Zee/Sun to report 25%/15% yoy growth in domestic subscription revenues. For Dish TV, we estimate 150K net subscriber additions and recovery in ARPU to Rs200 (pre-TRAI tariff order implementation levels).</p> | <p>Print media: Print media ad spends were muted during the quarter due to broad-based weakness in key categories such as auto as well as rural consumption. Further, we gather than the impact of the election code on government ad spends was not fully offset by higher political advertising. We expect DB Corp. and Jagran to report 5% decline and flat print ad revenues, respectively. Both companies would report a modest EBITDA decline despite some easing of newsprint price. We note that the full benefit of lower newsprint prices will flow through over the next two quarters.</p> |
| Metals | <p>Ferrous: (1) Domestic steel prices declined by 1-5% qoq, led by a fall in global prices. Quarterly average prices for flat segment were down by Rs300-500/ton qoq and Rs2,000/ton qoq in long product segment. On costs, we expect some respite for coking coal costs (\$5-7/ton) whereas Rs100-150/ton higher domestic iron-ore prices will impact non-integrated steelmakers. (2) Lower exports and contract volumes for JSW and TATA should partially offset the weak domestic prices in 1QFY20E. We expect EBITDA/ton for domestic steel companies to decline by 0-6% qoq—we estimate Tata Steel's India EBITDA/ton at Rs13,216/ton (-4% qoq), JSW Steel's EBITDA/ton at Rs10,078/ton (flat qoq) and Jindal Steel & Power's EBITDA/ton at Rs10,900/ton (-6% qoq). (3) On volumes, we expect strong growth for Jindal Steel & Power aided by ramp-up of Angul operations (-3% qoq, 15% yoy to 1.4 mn tons in 1QFY20). TATA and JSW, both face capacity constraints and were hit with weak off-take in June as per our channel checks. We estimate stagnant volumes (0-1% yoy) for both TATA and JSTL and (4) Overall, weak prices and muted volumes would keep earnings subdued for steel companies. We estimate TATA to report consolidated EBITDA of Rs55 bn with US\$40/ton margin in Europe division. JSW to report an EBITDA of Rs40 bn, and JSPL to report an EBITDA of Rs16 bn.</p> | <p>Non-ferrous: All-in aluminum prices declined 3% qoq to US\$1,900/ton while zinc prices increased 2% qoq to US\$2,755/ton in 1QFY20. Alumina prices declined by 7% qoq to US\$361/ton, which will provide some respite in costs to non-integrated aluminum producer (Vedanta). We expect Hindustan Zinc's EBITDA to decline by 12% qoq to Rs24.5 bn (-10% yoy) led by lower zinc metal volumes (-4% qoq). Vedanta's EBITDA will decline by 5% qoq to Rs58 bn (-8% yoy) led by lower production at Zinc India operations partially offset by higher EBITDA in Zinc International. Hindalco's standalone EBITDA (including Utkal) will decline by 8% qoq to Rs12.6 bn (-32% yoy) due to lower aluminum prices partially offset by favorable hedges. We estimate Nalco's EBITDA to decline by 22% qoq to Rs4 bn due to lower alumina and aluminum realizations and lower alumina volumes.</p> |
| Oil, Gas & Consumable Fuels | <p>Upstream: We expect OIL and ONGC to report a sharp sequential jump in EBITDA driven by (1) ~US\$5/bbl increase in global crude prices and (2) ~US\$0.4/mn BTU increase in domestic gas price; we assume that the government will continue to exempt upstream companies from sharing LPG subsidies. Downstream: We expect OMCs to report muted results led by (1) weak underlying refining margins with Singapore complex averaging US\$3.5/bbl and (2) accounting of adventitious losses amid ~US\$3/bbl decline in end-period crude price, which will be partly offset by higher-than-normal (+Rs0.5/liter) blended marketing margins on auto fuels.</p> | <p>RIL: We expect RIL to report a marginal qoq increase in standalone EBITDA led by modestly higher refining margins at US\$8.5/bbl (+US\$0.3/bbl qoq) and increase in crude throughput and petchem volumes, which will be partly offset by moderation in overall petchem margins. Consolidated EBITDA may still be lower qoq, as higher standalone and retail EBITDA will be offset by a decline in Jio's EBITDA (-Rs6.2 bn qoq) due to accounting of capacity cost pertaining to Jio's fiber/tower InvTs in lieu of interest and depreciation cost earlier; we have assumed these adjustments to be PBT neutral.</p> |
| Pharmaceuticals | <p>We expect the domestic formulations segment to see a moderate quarter with 7-8% yoy organic growth for the sector, with Torrent likely to be at the lower end at ~4%, given the change in its revenue recognition. We expect Lupin to lead the pack with ~10% yoy growth, and expect Cipla and SUNP to report 7-9% yoy growth. We expect US revenues to remain flat in the quarter, with LPC and CIPLA likely to be impacted by lower sales from Ranexa and Sensipar respectively, while DRRD should benefit from full quarter benefit of Suboxone and Propofol launches. We expect SUNP's US business to decline marginally, and expect limited sales from Ilumya, given the ongoing patient assistance program, even as the underlying trend suggests that the product is now annualizing US\$35 mn net sales. We expect healthcare services companies to have a healthy quarter with mature centers growing at 10% yoy and ramp-up of newly set up facilities aiding growth. We expect 14% yoy revenue growth for DLPL primarily led by volume growth.</p> | <p>We expect SUNP's EBITDA margin at 21.9%, while LPC's EBITDA margin is likely to decline to 16.1%, given lower Ranexa sales. We expect Cipla to report ~19% EBITDA margin given lower benefit from Sensipar sales. DRRD's EBITDA margin will likely remain stable at 21.1%, though, adjusting for the sale of proprietary products portfolio in 4QFY19, it indicates >300 bps qoq margin expansion. We expect a stable quarter for ARBP, with EBITDA margin at 20.2%. We expect margin improvement in hospitals driven by no addition/commissioning of facilities in 1QFY20. APHS's EBITDA margin will expand to 11.2% (+70 bps yoy), while HCG should benefit from lower losses across new centers. We expect DLPL's EBITDA margin at 25.0% (-70 bps yoy, +300 bps qoq) as revenue growth moderates to 14%</p> |
| Real estate | <p>Sluggish start to sales during the quarter on account of transition to new GST rates as well as clarity on applicable GST rates for under-construction projects. Exit month will likely see an improvement in sales towards the end of the quarter. Overall our industry-level data suggests some weakness in launches for residential projects, even as vacancy rates for commercial real estate remain at historical lows (especially in cities like Bengaluru).</p> | <p>DLF's dev-co will see residential sales of Rs6 bn from its completed inventory in the absence of launch of new projects. DCCDL will report revenues of Rs10.3 bn (+4% yoy) as its rental portfolio will witness stable occupancy. Sobha will see strong sales on account of new launches in NCR along with steady cash flows from its EPC business. Oberoi Realty will likely see a sharp drop in earnings (yoy) as 1QFY19 saw several projects achieve critical milestones for revenue recognition. Sunteck will continue to see strong sales momentum from Naigaon as witnessed in the previous quarters.</p> |
| Telecommunication Services | <p>We expect a steady and unexciting quarter for the Indian wireless players. Even as like-for-like pricing has been stable for the past few quarters, incumbents continue to see net negative impact of consumers trading up and trading down on the ARPU axis. 1QFY20 does not enjoy any sequential revenue uplift from minimum recharge construct, either, unlike 4QFY19. Deliberate strategy to smoothen the IC EBITDA glide path down to zero (from 4QFY20E) would continue to have a bearing on earnings. BHIN is likely to have another subdued quarter while TCOM is likely to report healthy yoy comps.</p> | <p>For Bharti, we expect consolidated 1QFY20E revenues and EBITDA of Rs210 bn and Rs67 bn, up 2% and 0.8% qoq, respectively. We expect a 1.6% qoq uptick in India wireless revenues; EBITDA for the segment will likely be down 3% qoq (and 10% yoy) on a reported basis to Rs24.9 bn. We expect a 2% qoq jump in ARPU to Rs127/month. For VIL, we expect revenues of Rs118 bn, broadly flat qoq. We do expect a sharp jump in EBITDA on the back of further progress on delivery of cost synergies. Net finance costs should see a sharp sequential decline on account of lower debt balance post the Rs250 bn rights issue. We expect an ARPU print of Rs114/month, up 9.6% qoq; sequential jump is optical thanks to the sharp decline in average subs base.</p> |
| Transportation | <p>Ports: Cargo tonnage at India's major ports grew 2.5% yoy in Apr-May 2019. We model a higher 16% growth for the portfolio, driven by strong growth in Mundra and Dhamra ports. This is partly on a low base. We model qoq flatish volumes. Our optimism is also based on better container market growth of 10% in Apr-May 2019 at India's major ports. For GPPV, we expect strong volume growth in containers due to new line additions and a ramp-up of existing lines; expect improvement in margin given recent increase in container tariffs. Logistics: For Concor, we build in a similar 6-7% exim volume growth as reported by Indian Railways over Apr-May 2019. We expect recent price increases to yield a higher 16% overall revenue growth, net of weak volumes for the domestic business. The recent 4% price hike with protection from price increases would drive a 200 bps+ sequential margin expansion. In 3PL, Mahindra Logistics will see 11% yoy growth in overall revenues, blend of a single digit growth in M&M group revenues and an acceleration in growth for M&M group revenues. EBITDA margin would be steady, though would decline yoy on account of a high base and ESOP/RSU charges.</p> | <p>Airlines: For Indigo, we forecast a sharp improvement in profitability on account of higher yields (we expect 6% yoy improvement in yields) on account of seasonal strength as well as the impact of termination of services by Jet Airways. Higher yields will drive healthy EBITDAR margins of 27.6% (+150 bps qoq). We forecast capacity growth of 30% yoy on steady addition of A320neo and ATR aircraft.</p> |

1QFY20/2QCY19 EARNINGS PREVIEW FOR KIE UNIVERSE

Company-wise earnings of the KIE universe (₹ mn)

| | Jun-18 | Mar-19 | Jun-19E | Change (%) | | Comments |
|------------------------------|--------|---------|---------|------------|----------|---|
| | | | | yoy | qoq | |
| Automobiles | | | | | | |
| Amara Raja Batteries | | | | | | |
| Net sales | 17,787 | 15,667 | 17,431 | (2.0) | 11.3 | We expect revenues to decline by 2% yoy, led by (1) 12% yoy volume decline in the auto OEM segment due to decline in industry production, (2) flattish volumes in overall industrial segment, (3) 8% yoy volume growth in the automotive replacement segment and (4) 4% negative impact due to price cuts done to pass on the benefit of decline in lead prices in non-replacement segments (50-55% of overall revenues). |
| EBITDA | 2,203 | 2,421 | 2,759 | 25.2 | 13.9 | |
| EBIT | 1,573 | 1,738 | 2,069 | 31.5 | 19.0 | |
| PBT | 1,695 | 1,783 | 2,151 | 26.9 | 20.7 | We expect EBITDA margin to improve by 40 bps qoq to 15.8% (up 340 bps yoy) largely due to improvement in gross margin led by benefit of decline in lead prices. LME lead prices have declined by 4% qoq in rupee terms in 1QFY20 (assuming 1.5-month lag in prices due to inventory). As per our channel checks, the company has not taken price cuts in the automotive replacement segment (40-45% of overall revenues; RM cost benefit normally gets passed on in other segments), which should aid margins. Having said that, it is difficult to predict the exact quantum of benefit from lead prices on quarterly basis due to (1) lead-lag impact owing to quarterly variations in RM and finished goods inventory levels and (2) volatility in lead prices in a quarter even as we work with averages. |

| Apollo Tyres | | | | | | |
| Net sales | 42,880 | 42,737 | 44,231 | 3.1 | 3.5 | We expect standalone revenues to increase by 3% yoy, driven largely by some price increases taken during the year. Volumes will likely be flattish yoy as growth in the replacement market due to market share gain (~10% yoy) will be offset by around 18-20% yoy volume decline in the OEM segment. We expect standalone EBITDA margin to improve by 30 bps qoq (down 170 bps yoy) led by the lagged benefit of lower RM costs. Marketing spend will likely be higher this quarter due to advertisement campaigns done during the cricket world cup. |

| Reported PAT | 2,518 | 840 | 1,550 | (38.5) | 84.6 | We expect Europe revenues to grow by 2% yoy in 1QFY20, led by (1) 7% yoy revenue growth in EUR terms in manufacturing operations led by ramp-up of the Hungary plant, (2) marginal yoy decline in Reifencor revenues (distribution business) and (3) negative impact of INR appreciation versus EUR. We build in negative EBIT margin of 2% in our estimates in 1QFY20 (negative EBIT margin of 3.8% in 4QFY19 and EBIT margin of 2.2% in 1QFY19); note that this is a seasonally weak quarter for the company and overall manufacturing revenues will likely be flattish qoq. Yoy decline in EBIT margin is due to increase in fixed overheads and higher depreciation expenses associated with the Hungary plant. |

LME lead prices have declined by 4% qoq in INR terms in 1QFY20 (assuming 1.5-month lag in prices due to inventory). As per our channel checks, the company has not taken price cuts in the automotive replacement segment (35-40% of overall revenues; RM cost benefit normally gets passed on in other segments), which should aid margins. Having said that, it is difficult to predict the exact quantum of benefit from lead prices on quarterly basis due to (1) lead-lag impact owing to quarterly variations in RM and finished goods inventory levels and (2) volatility in lead prices in a quarter even as we work with averages. |

| | | | | yoy | qoq | |
| SKF | | | | | | |
| Net sales | 7,550 | 7,484 | 7,851 | 4.0 | 4.9 | We expect revenues to grow by 4% yoy, led by (1) 12-13% yoy growth in automotive replacement and overall industrial segments (~65% of revenues) aided partly by market share gain and (2) 10-11% yoy decline in the automotive OEM segment and exports (35% of revenues) due to decline in domestic automotive industry production and weakness in global markets. |
| EBITDA | 1,160 | 1,110 | 1,190 | 2.6 | 7.2 | |
| EBIT | 1,043 | 994 | 1,072 | 2.8 | 7.8 | |
| PBT | 1,251 | 1,268 | 1,287 | 2.8 | 1.5 | |
| Reported PAT | 809 | 822 | 849 | 5.0 | 3.3 | |
| Extraordinaries | — | — | — | — | — | We expect EBITDA margin to decline marginally on a yoy basis (down 20 bps yoy but up 30 bps qoq) largely due to adverse impact of a weaker product mix (auto segment is more profitable for the company) on the company's gross margins partly offset by its cost-reduction efforts and some softness in commodity prices. |
| Adjusted PAT | 809 | 822 | 849 | 5.0 | 3.3 | |
| EPS (Rs/share) | 15.8 | 16.0 | 16.6 | 5.0 | 3.3 | |
| EBITDA margin (%) | 15.4 | 14.8 | 15.2 | -22 bps | 32 bps | |
| Tata Motors | | | | | | |
| Net sales | 670,813 | 864,220 | 562,778 | (16.1) | (34.9) | We expect standalone revenues to decline by 22% yoy, led by decline in volumes across segments while ASPs will be flattish yoy. We build in standalone EBITDA margin of 4.2% in 1QFY20 (6% in 4QFY19 and 8% in 1QFY19); the yoy decline is due to increase in discount levels, a weaker mix and negative operative leverage. |
| EBITDA | 54,307 | 80,193 | 31,448 | (42.1) | (60.8) | |
| EBIT | (4,265) | 26,662 | (21,952) | 414.7 | (182.3) | |
| PBT | (15,770) | 19,418 | (35,152) | 122.9 | (281.0) | |
| Reported PAT | (19,024) | 11,175 | (35,512) | 86.7 | (417.8) | |
| Extraordinaries | (10,073) | (6,769) | — | — | — | JLR's UK P&L volumes will likely decline by 9% yoy (assuming 31,000 wholesale volumes in June 2019; up 4% yoy). ASPs will likely decline by 0.5% qoq due to a weaker mix. We expect reported EBITDA margin to decline by 80 bps yoy as the benefit of lower hedging loss will be offset by a weaker mix, pricing pressures and negative operating leverage. We build in hedged forex loss of GBP115 mn in our estimates for 1QFY20 (GBP158 mn in 4QFY19 and GBP212 mn in 1QFY19). |
| Adjusted PAT | (11,973) | 16,252 | (35,512) | 196.6 | (318.5) | |

| Timken | | | | | | |
| Net sales | 3,834 | 4,480 | 4,332 | 13.0 | (3.3) | We expect revenues to increase by 13% yoy, led by (1) 4% due to consolidation of ABC Bearings (note that ABC was consolidated from May 1, 2018), (2) strong double-digit growth in industrial, aftermarket and export segments (growth in exports will be driven by ramp-up of exports from ABC's plants and execution of new order wins from non-US markets) and (3) 12% yoy revenue decline in the CV segment due to decline in industry production (~30-33% of overall revenues). We note that 9% organic revenue growth is higher than peers due to lower exposure to the auto OEM segment and focus on growing exports of railway and CV bearings from India. |
| EBITDA | 593 | 1,012 | 780 | 31.5 | (22.9) | |

| Reported PAT | 316 | 572 | 417 | 31.9 | (27.1) | |
| Extraordinaries | — | — | — | — | — | We expect EBITDA margin to normalize from higher levels of last quarter but still improve by 250 bps yoy due to price increases from customers, recent decline in commodity prices and benefit of backward integration. |
| Adjusted PAT | 316 | 572 | 417 | 31.9 | (27.1) | |
| EPS (Rs/share) | 4.2 | 7.6 | 5.5 | 31.9 | (27.1) | |
| EBITDA margin (%) | 15.5 | 22.6 | 18.0 | 253 bps | -460 bps | |
| TVS Motor | | | | | | |
| Net sales | 41,685 | 43,840 | 44,923 | 7.8 | 2.5 | Volumes declined by 1% yoy possibly led by (1) 2% growth in exports and (2) 1% yoy decline in domestic markets. We expect revenues to grow by 8% yoy in 1QFY20 largely led by 8% yoy increase in ASP. |
| EBITDA | 3,212 | 3,081 | 3,493 | 8.7 | 13.3 | |
| EBIT | 2,279 | 2,050 | 2,461 | 8.0 | 20.0 | |

| Reported PAT | 1,466 | 1,338 | 1,640 | 11.9 | 22.5 | |
| Extraordinaries | — | — | — | — | — | We expect EBITDA margin to increase by 9% yoy, which is likely to remain in line with revenue growth. We expect net profit to increase by 12% yoy. |
| Adjusted PAT | 1,466 | 1,338 | 1,640 | 11.9 | 22.5 | |
| EPS (Rs/share) | 3.1 | 2.8 | 3.5 | 11.9 | 22.5 | |

| Varroc Engineering | | | | | | |
| Net sales | 29,435 | 31,534 | 29,284 | (0.5) | (7.1) | We expect consolidated revenues to decline by 1% yoy, led by (1) 5% yoy decline in India business revenues as growth in production of Bajaj Auto (accounts for 50-55% of India revenues) will be more than offset by double-digit decline in production of other two-wheeler OEMs and (2) 5% yoy EUR revenue growth in VLS (3% yoy growth in INR terms due to INR appreciation versus EUR) driven by new business wins particularly from VW Group even though global industry volumes are under pressure. |
| EBITDA | 2,411 | 2,931 | 2,692 | 11.7 | (8.2) | |
| EBIT | 1,347 | 1,402 | 1,152 | (14.5) | (17.8) | |

| Reported PAT | 1,004 | 1,500 | 882 | (12.2) | (41.2) | |
| Extraordinaries | — | — | — | — | — | We expect consolidated EBITDA margin to improve by 100 bps due to 230 bps yoy margin expansion in VLS business led by lower launch costs, Ind-AS impact and potential improvement in operational efficiency, which will be offset by 120 bps yoy margin decline in India business due to negative operating leverage. |
| Adjusted PAT | 1,004 | 1,500 | 882 | (12.2) | (41.2) | |

| | | | | yoy | qoq | |
| Banks/Diversified financials | | | | | | |
| AU Small Finance Bank | | | | | | |
| Net interest income | 2,864 | 3,869 | 3,992 | 39.4 | 3.2 | We expect AUM growth to remain strong at ~45% yoy and off-balance sheet loans to decline further. There would be focus on the progress and NIM improvement as there has been revenue pressure in recent quarters due to change in loan mix and pricing. |
| Pre-provision profit | 1,524 | 2,157 | 2,154 | 41.3 | (0.1) | |
| Loan-loss provisions | 210 | 190 | 200 | (5.0) | 5.0 | |
| Adjusted PAT | 768 | 1,182 | 1,147 | 49.3 | (3.0) | We expect cost-income ratio similar to 4QFY19 levels at ~60%. Liability side should see further improvement on deposit contribution but the mix should be a bit more favorable on wholesale side. Gross NPL ratios should see a marginal increase qoq, especially on the retail side. |
| EPS (Rs/share) | 2.6 | 4.0 | 3.9 | 48.1 | (3.0) | |
| NIM (%) | 5.8 | 5.1 | 4.8 | -101 bps | -37 bps | |
| Axis Bank | | | | | | |
| Net interest income | 51,668 | 57,056 | 58,978 | 14.1 | 3.4 | We expect loan growth at 13% yoy with greater focus on retail, and NIM at 3.5% (unchanged qoq but there is a positive bias as pricing environment has been favorable for banks). |
| Pre-provision profit | 43,720 | 50,144 | 49,943 | 14.2 | (0.4) | |
| Fee income | 21,170 | 30,200 | 27,521 | 30.0 | (8.9) | |
| Treasury income (net) | (320) | 30 | 3,000 | NM | 9,900.0 | We expect slippages of Rs25 bn (2% of loans) mostly from 'below investment grade book'. Expect more traction on recovery as well from the write-off pool. No major concerns on asset quality. |
| Loan-loss provisions | 30,660 | 16,380 | 15,561 | (49.2) | (5.0) | |
| Adjusted PAT | 7,011 | 15,051 | 16,946 | 141.7 | 12.6 | |
| EPS (Rs/share) | 3.0 | 6.4 | 7.2 | 141.7 | 12.6 | |
| Bajaj Finance | | | | | | |
| Net interest income | 22,455 | 27,382 | 29,800 | 32.7 | 8.8 | We expect loan growth to remain strong at 37% yoy, marginally lower than 41% in 4QFY19. |
| Pre-provision profit | 16,241 | 22,209 | 24,410 | 50.3 | 9.9 | |
| Loan-loss provisions | 3,268 | 4,093 | 4,500 | 37.7 | 10.0 | NIM will likely expand qoq by 10 bps to 9.8%, in line with seasonal trends; we expect the cost-income ratio to improve to 55% from 57% qoq due to higher contribution from the consumer business. |
| Adjusted PAT | 8,359 | 11,761 | 12,942 | 54.8 | 10.0 | |
| EPS (Rs/share) | 15.3 | 21.5 | 23.7 | 54.8 | 10.0 | |
| Bandhan Bank | | | | | | |
| Net interest income | 10,372 | 12,575 | 14,062 | 35.6 | 11.8 | We expect loan growth at ~40% yoy resulting in strong revenue growth of ~32% yoy. NIM will be flat qoq at ~9.5% of AUM. |
| Pre-provision profit | 8,205 | 11,532 | 11,602 | 41.4 | 0.6 | |
| Fee income | 1,485 | 2,879 | — | — | — | We expect stable trends on asset quality. Commentary on loan growth and borrower indebtedness in key markets would be key monitorables. |

| Bank of Baroda | | | | | | |
| Net interest income | 43,811 | 50,670 | 67,703 | 54.5 | 33.6 | This would be the first quarter with the merged financials of BoB, Vijaya and Dena Bank. The bank has given an opening balance sheet but the net worth for 1QFY20 would be closely watched. YoY changes are not comparable given the recent changes at the bank level. |
| Pre-provision profit | 30,056 | 38,608 | 47,982 | 59.6 | 24.3 | |
| Fee income | 7,680 | 9,620 | 8,448 | 10.0 | (12.2) | |
| Treasury income (net) | (3,830) | 7,600 | 4,500 | NM | (40.8) | We expect fresh slippages at <2% (balance sheet post M&A) with negligible surprises from Vijaya or Dena Bank. Coverage ratio will improve qoq. Progress of the merger would be discussed. |
| Loan-loss provisions | 17,597 | 55,500 | 33,300 | 89.2 | (40.0) | |

| Canara Bank | | | | | | |
| Net interest income | 38,829 | 35,002 | 33,736 | (13.1) | (3.6) | We expect 10% yoy loan growth but ~10 bps qoq decline in NIM (one-off) to 2.4%. The base quarter has one-off interest income from recovery of a bad loan. We expect to see a higher contribution from treasury this quarter. |
| Pre-provision profit | 29,328 | 29,735 | 27,907 | (4.8) | (6.1) | |
| Fee income | 3,460 | 2,960 | 3,463 | 0.1 | 17.0 | |
| Treasury income (net) | (1,970) | (1,780) | 5,223 | NM | NM | We expect slippages of ~2% of loans and mostly from non-corporate loans but NPL decline would be slower as there were no major resolutions during the quarter. Coverage ratio will improve qoq. |
| Loan-loss provisions | 23,240 | 51,518 | 23,183 | (0.2) | (55.0) | |

| EPS (Rs/share) | 3.8 | (7.3) | 3.8 | (2.1) | NM | |
| Cholamandalam | | | | | | |
| Net interest income | 8,190 | 8,990 | 9,353 | 14.2 | 4.0 | We expect loan growth to moderate to 23% from 26% on the back of slowdown in CVs. Credit cost is seasonally high in 1Q. |
| Pre-provision profit | 5,374 | 5,170 | 5,801 | 8.0 | 12.2 | |
| Loan-loss provisions | 980 | 560 | 800 | (18.4) | 42.9 | Competition in CV finance and high liquidity on balance sheet will put pressure on NIM. |
| Adjusted PAT | 2,854 | 2,920 | 3,251 | 13.9 | 11.3 | |
| EPS (Rs/share) | 18.2 | 18.7 | 20.8 | 14.0 | 11.3 | |
| City Union Bank | | | | | | |
| Net interest income | 3,748 | 4,206 | 4,223 | 12.7 | 0.4 | We expect loan growth to slow down to ~15% yoy for the quarter. NII growth will be marginally lower than loan growth at 13% yoy. NIM would decline ~10 bps at 4.3%. |
| Pre-provision profit | 2,994 | 3,378 | 3,374 | 12.7 | (0.1) | |
| Fee income | 759 | 777 | 835 | 10.0 | 7.5 | |
| Treasury income (net) | 48 | 256 | 306 | 536.9 | 19.4 | We expect gross NPLs at ~3% (higher qoq); slippages are expected at ~2.2% of loans, mostly from small-ticket loans. |
| Loan-loss provisions | 673 | 754 | 829 | 23.3 | 10.0 | |
| Adjusted PAT | 1,616 | 1,751 | 1,829 | 13.1 | 4.4 | |

| DCB Bank | | | | | | |
| Net interest income | 2,730 | 3,009 | 3,123 | 14.4 | 3.8 | We expect revenue growth at 14% yoy on the back of 14% yoy NII growth and 17% yoy loan growth. NIM would be unchanged qoq but there is some easing of pressure (portfolio level) on product segments, which compete with NBFCs. Cost of deposits will be stable qoq. Performance in LAP would be the key monitorable given rising NPLs at the sector level. |
| Pre-provision profit | 1,414 | 1,853 | 1,749 | 23.7 | (5.6) | |
| Fee income | 626 | 846 | 738 | 17.8 | (12.7) | |
| Treasury income (net) | 153 | 90 | 143 | (6.6) | 58.8 | We expect PAT growth at 27% yoy led by operating leverage. RoE progression for FY2020 would be the key monitorable as the progress in FY2019 has been impressive. |
| Loan-loss provisions | 299 | 330 | 363 | 21.4 | 10.0 | |
| Adjusted PAT | 695 | 963 | 879 | 26.5 | (8.8) | |

| | | | | yoy | qoq | |
| Equitas Holdings | | | | | | |
| Net interest income | 2,544 | 3,331 | 3,568 | 40.2 | 7.1 | We expect AUM growth of ~45% yoy led by SME and auto loans. NIM to be unchanged qoq at 9%. Operating expenses are likely to be flat yoy resulting in an improvement in cost-income ratio to ~65-68%. The progress on deposits, especially on wholesale and retail term deposits, would be a key monitorable. |
| Pre-provision profit | 761 | 1,263 | 1,370 | 80.1 | 8.5 | |
| Loan-loss provisions | 209 | 249 | 350 | 67.5 | 40.7 | We expect impairment ratios to show further improvement with gross NPLs <3% on the back of strong loan growth and normalized slippages trends. Progress on listing would be discussed as not much has happened since March 2019. |
| Adjusted PAT | 354 | 687 | 663 | 87.3 | (3.5) | |

| Federal Bank | | | | | | |
| Net interest income | 9,801 | 10,965 | 11,067 | 12.9 | 0.9 | We expect loan growth to be slower than past few quarters at ~17% yoy though retail and SME businesses should see solid traction. NIM would be flat to marginally positive. |
| Pre-provision profit | 6,029 | 7,548 | 6,851 | 13.6 | (9.2) | |
| Treasury income (net) | 190 | 500 | 412 | 116.7 | (17.7) | |
| Loan-loss provisions | 1,662 | 1,530 | 1,377 | (17.1) | (10.0) | We expect slippages at ~1.5% of loans though we await to see if there is further stress from Kerala floods. RoA progression for FY2020 would be a key monitorable. |

| HDFC | | | | | | |
| Net interest income | 27,367 | 31,611 | 30,835 | 12.7 | (2.5) | We expect HDFC to deliver 17% retail loan growth; this will drive 15% growth in overall loans. |
| Pre-provision profit | 30,897 | 40,889 | 49,335 | 59.7 | 20.7 | |
| Adjusted PAT | 21,900 | 28,616 | 32,772 | 49.6 | 14.5 | Pressure on retail home loan rates will likely lead to marginal compression in NIM to 2.6% (2.8% in 4QFY19); high PAT growth will be driven by capital gains of Rs19 bn from stake-sale in Gruh Finance. |
| EPS (Rs/share) | 13.0 | 16.6 | 19.0 | 46.4 | 14.5 | |
| HDFC Bank | | | | | | |
| Net interest income | 108,136 | 130,895 | 129,579 | 19.8 | (1.0) | We expect loan growth to slow down to ~17% yoy resulting in NII growth at ~20% yoy. Retail loan growth slowdown is on account of weak volume growth in auto and a more cautious approach towards unsecured loans. Fee income growth from MFs is expected to be slower yoy due to changes in regulations, while asset and payment fees will grow at a slower rate. |
| Pre-provision profit | 86,478 | 108,436 | 106,904 | 23.6 | (1.4) | |

| Adjusted PAT | 46,014 | 58,851 | 55,140 | 19.8 | (6.3) | We expect gross NPL ratio (1.5% of loans), which is a marginal increase on a qoq basis. Growth in credit costs, especially from rural loans, would be a key monitorable. |
| EPS (Rs/share) | 17.7 | 21.6 | 20.2 | 14.6 | (6.3) | |
| ICICI Bank | | | | | | |
| Net interest income | 61,019 | 76,201 | 72,519 | 18.8 | (4.8) | We expect core earnings (base quarter had stake sale gains of ICICI Life) trajectory to remain strong at ~15% yoy, led by healthy loan growth (~15% yoy) and better NII growth (19% yoy). NIM will decline qoq by ~10 bps due to lower one-offs. |
| Pre-provision profit | 58,084 | 62,334 | 61,943 | 6.6 | (0.6) | |
| Fee income | 27,540 | 31,780 | 31,946 | 16.0 | 0.5 | |
| Treasury income (net) | 7,660 | 1,560 | 4,250 | (44.5) | 172.4 | |
| Loan-loss provisions | 59,713 | 54,514 | 46,300 | (22.5) | (15.1) | We expect reduction in gross NPLs on the back of write-offs. Credit costs will decline qoq led by lower slippages (~<1.7% of loans, primarily from agriculture). Below investment grade portfolio would decline qoq and coverage ratio would improve qoq. |
| Adjusted PAT | (1,196) | 9,691 | 13,931 | NM | 43.8 | |
| IIFL Finance | | | | | | |
| Net interest income | 5,144 | 6,935 | 5,558 | 8.1 | (19.8) | We expect IIFL Finance's loan growth to be depressed at 2% qoq, due to slowdown in the real estate business; the loan book will be down 5% yoy due to sell-down of the CV business in 4QFY19. |
| Adjusted PAT | 1,949 | 2,586 | 1,013 | (48.0) | (60.8) | |
| EPS (Rs/share) | 6.1 | 8.1 | 3.2 | (48.0) | (60.8) | NIM (excluding one-offs) will likely remain stable qoq at 8.3%. |
| IndusInd Bank | | | | | | |
| Net interest income | 21,224 | 22,324 | 27,716 | 30.6 | 24.2 | We are incorporating the merged financials of BHAFIN for the current quarter and hence, the yoy numbers are not comparable. There would be no immediate benefits of the merger as the transaction, though effective from January 1, 2018, was consummated only on July 4, 2019. |

| Loan-loss provisions | 2,348 | 4,058 | 2,840 | 21.0 | (30.0) | We expect fresh impairment ratios to decline sharply as IL&FS exposure has been fully reported. Movement of the restructured loan (5% of loans) would be the key monitorable along with any lumpy slippages due to change in management in the current quarter. |

| EBITDA | 3,105 | 9,290 | 4,098 | 32.0 | (55.9) | |
| EBIT | 2,416 | 8,358 | 3,106 | 28.5 | (62.8) | We model EBITDA margin of 17% in 1QFY20, much lower than 24% reported in FY2019 which was driven by better product mix and delivery of indigenous products such as VVPAT. Such mix advantage will be absent in FY2020. Also the start of execution of projects like LRSAM will lead to margin impact due to higher import content in the initial stages of execution. |

| BHEL | | | | | | |
| Net sales | 59,355 | 102,972 | 63,592 | 7.1 | (38.2) | We expect overall 6% revenue growth in 1QFY20 led by ~5% growth in Power segment and a stronger 11% growth in Industry segment. Despite a strong order book in Power segment, we are cautious on execution pace in FY2020 given flattish topline guidance and likely delays in starting new projects due to recently concluded elections. Industry sector orders may have, however, been executed at a normalized pace as these are short cycle and mostly product-supply orders with less dependence on government clearances for execution. Margin remains a function of execution stage. We expect ~30 bps yoy decline in EBITDA margin due to higher employee cost as well as likely uptick in RM cost as import content, if any, is higher in early stages of a project's execution cycle and we note large projects such as Rs35 bn Sagardighi project in West Bengal won in Dec-2018 that may contribute to such impact as its execution starts. |

| Net sales | 6,343 | 7,021 | 6,999 | 10.3 | (0.3) | We expect a weak start to the year in abrasives (+8% yoy), as industrial activity (IIP up 3.5% in April) and weakness in automobile sector point at persistent weakness in manufacturing activity. Ceramics and EMD segments will likely grow at double digit given their B2B, annual-contract nature of business, closer to ~12% growth that the management has guided for FY2020 in their bear-case, Rs30 bn topline, scenario. Overall consolidated sales growth is thus expected to be ~10% in 1QFY20, lower than our 13% estimate for FY2020. We model qoq flat EBIT margin in abrasives as the volumes are unlikely to have picked up materially to support any price hikes. In ceramics, hit by input cost increase in 4QFY19, we model ~100 bps qoq margin improvement assuming some B2B contracts may have seen price reset in this period. For EMD, we model yoy flat margins as the segment has been running at full capacity and 1QFY19 margins indicate normal operations before the Kerala floods led to closure of hydel power plant and subsequent margin decline. The hydel power plant has now been operationalized again. |

| Net sales | 6,587 | 7,876 | 7,848 | 19.1 | (0.4) | Based on opening shipbuilding order book of Rs82 bn, we expect revenues of over Rs62 bn in 1QFY20 versus Rs55 bn and Rs66 bn reported in 3QFY19 and 4QFY19, respectively. Ship repair is expected to see a yoy dip due to completion of INS Vikramaditya re-fit order. Overall, we expect a strong 19% revenue growth in 1QFY20. We expect EBITDA margin of 19% for the quarter, in line with that reported in FY2019 and stable margin guided for FY2020. However, we note the risk of quarterly volatility in margin due to execution stage of specific projects even though final annual numbers may come out as per the guidance. |

In BOT, we expect 2% revenue growth based on weak sequential trends. We model 1QFY20 margin of 22% in construction segment (20% for the full year versus 23% yoy) and 87% in BOT segment. We highlight here that construction segment margin varies from quarter to quarter depending on execution stage and job mix. Increasing relevance of HAM projects would be key overhang on construction segment margin. |

| Net sales | 138,780 | 159,899 | 160,145 | 15.4 | 0.2 | We expect constant currency revenue growth rate of 1.55% of which 1% will be organic with the balance contribution from Strong-Bridge Envision acquisition. We forecast cross-currency headwind of 55 bps. Revenue growth will be impacted by productivity adjustment for select clients in IMS and high base of earlier quarters due to transformation revenues booked from large IMS deals. We have not baked in any revenues from proposed acquisition of select products of IBM due to delay in closure by a month from the expected date of end-May 2019. EBIT margin decline will be steep on account of delay in closure of acquisition of select IBM products. Note that the company has invested in people, infrastructure, systems and processes to integrate select IBM products' acquisition for the entire quarter even as the consummation of the acquisition has been delayed a tad. |

| Extraordinaries | — | — | — | — | — | We expect the company to retain 14-16% revenue growth guidance despite delay in consummation of the acquisition by a month. We expect the company to also retain organic revenue growth guidance of 7-9% and EBIT margin guidance of 18.5-19.5%. Expect investor focus on - (1) revenue growth from digital which has shown promising signs in the last two quarters, (2) capital allocation in light of aggressive product acquisitions, (2) M&A strategy given that the company has started making a few digital acquisitions, (3) EBIT margin direction in light of the recent reset and (4) deflationary impact from renewal of legacy IMS deals. |

We expect Mobiquity acquisition to contribute US\$3.1mn to revenues. We expect a modest recovery in banking and financial services vertical. Growth will likely be driven by professional services and healthcare & insurance verticals. We expect EBIT margin of 13.4% a decline of 35 bps qoq on account of visa costs, marginal rupee appreciation. We do not bake in one-time transaction cost for Mobiquity acquisition. |

We expect financial services vertical to report robust growth. Revenues include one month of revenues from the Stater acquisition. Expect EBIT margin decline of 110 bps due to - (1) wage revision for 85% of employees that will impact margin by 100 bps, (2) higher H-1B visa applications relative to the previous year that will result in additional costs and (3) Rupee appreciation impact of 30 bps. We forecast organic revenue growth of 0.6% and contribution of 0.5% from full quarter consolidation of acquisitions done in the earlier quarter. We expect revenue decline from top client to continue and to weigh on performance. In addition June is a seasonally weak quarter for India business contributing to overall weakness. |

The impact will be partly offset by operational improvements. We forecast Fx gains of Rs651 mn, up from Rs334 mn in March 2019 quarter. Expect investor focus on (1) implications for LTI from the intention of the parent to acquire Mindtree, (2) large deal momentum, (3) outcome of annual client budgeting process and its implications for growth, (4) growth outlook from the top client, and (5) status of the hedge book after the recent Rupee appreciation. |

Revenue growth has slowed down to a trickle on yoy comparison. We forecast sequential revenue decline of 2.5% in the telecom business, pretty much along expected lines and due to seasonal weakness in Comviva. Enterprise segment will disappoint with modest 0.5% growth in c/c. Weakness in BFSI and manufacturing will contribute to weak numbers, while healthcare segment will recover a tad. |

We expect robust new deal signings with good spread across enterprise and telecom segments. We expect investors to focus on (1) timelines for 5G deal flow and impact of US ban on Huawei on 5G adoption, (2) health of enterprise business especially in the manufacturing vertical where the company has high exposure to the auto sector, (3) reasons for slowdown in revenue growth in the enterprise segment, and (4) M&A strategy and capital allocation. |

On reported basis revenue growth will be lower due to divestment of Workday business that impacted revenues by US\$9 mn. Note that Wipro had guided for revenue decline of 1% to revenue growth of 1% for June 2019 quarter. EBIT margin will likely decline due to wage revision effective June 1, marginal appreciation of Rupee against USD and weak revenue performance. |

| EBITDA | 6,029 | 3,829 | 6,336 | 5.1 | 65.5 | We forecast modest 2% yoy growth in advertisement revenues (including slot sales) given the weak ad spend environment and viewership share. We estimate 15%/15% yoy growth in domestic DTH/cable subscription revenues aided by ongoing digitization in the Tamil Nadu market. We model (1) Rs300 mn revenues from the movie production business (nil in the base quarter) pertaining to satellite/digital rights of Petta, and (2) Rs3.1 bn from IPL. |

| Net sales | 1,031 | 1,079 | 3,412 | 230.9 | 216.1 | Financials are not comparable yoy as rail subsidiary financials will now get consolidated line-by-line after the recent buyout of the Blackstone stake. Container cargo at major ports grew 10% yoy in Apr-May 2019 whereas EXIM container tonnage for Indian Railways grew ~7% in the same period. This would imply a volume growth higher than 7% for road CFS. We expect a higher ~11% revenue growth in CFS revenues for the quarter. Rail volumes had disappointed last quarter on the back of (1) divergence in pricing by road and rail operators hampering competitive positioning of rail and (2) disruption caused by the ongoing track maintenance and doubling work on the northern corridor. We thus expect modest yoy growth in rail logistics revenues for GDPL. |

| Net sales | 1,760 | 1,802 | 1,766 | 0.4 | (2.0) | We expect a healthy 18% yoy growth in container volumes and a modest 7% yoy growth on an overall basis, dragged down by a decline in bulk and LPG volumes. We expect sequentially improving realization per tonne, net of recent price increase in container and lower share of bulk in the revenue mix. Yoy realization will still decline on a high base (favorable currency) and increase in share of transshipment volumes yoy. Revenue growth will thus remain subdued for the quarter. |
