Moratorium book broadly in line with other private lenders; Asset quality improves

TP: INR65 (+52%)

Credit cost to stay elevated as focus remains on strengthening PCR

- Federal Bank (FB) reported moderation in 4QFY20 business growth affected by the weak environment. The bank made higher COVID-19 related provisions of INR930m, which dragged earnings in the quarter. PPoP was strong at 27% YoY (aided by treasury gains) while moratorium book stood at 35%. Lower slippages (as FB availed dispensation given by the RBI) and higher provisions, resulted in overall improvement in asset quality/PCR.
- We have cut our FY21E estimates sharply by 19% as we factor in higher credit cost and slight moderation in business growth. However, we largely maintain our FY22E estimates. Maintain Buy.

PPoP beat led by treasury gains; Higher provisions impact earnings

- 4QFY20 PAT came in at INR3.0b (-21% YoY; MOSLE: INR3.9b) affected by higher provisions as FB made COVID-19 related provisions of INR930m. NII grew 11% YoY (INR12.2b) as margins expanded 4bp QoQ to 3%.
- Core fee income grew 13% YoY while higher treasury income resulted in total income growth of 28% YoY. Opex grew 28% YoY as the bank made additional employee cost provisions of INR1.2b. PPoP, thus, grew 27% YoY to INR9.6b. C/I ratio declined ~220bp QoQ to 50.2%. For FY20, NII/PPoP/PAT grew 11%/16%/24%.
- Loan growth moderated to 11% YoY, led by sluggish trends in corporate/SME, while retail loans grew 19% YoY. Within retail, housing and mortgage grew a robust ~18-19% YoY. Deposit base grew 13% YoY led by moderation in CASA deposits. CASA mix stood at 30.5% (-96bp QoQ).
- Fresh slippages stood lower at INR2.8b (1.1% annualized), as FB availed the RBI dispensation, which otherwise would have resulted in additional slippages of INR3b. GNPA/NNPA ratio, thus, moderated by 15bp/31bp QoQ while PCR increased ~810bp QoQ to 54.5% (72.5% incl. technical w/o). Total SMA book stood at INR8.4b (0.7% of total loans).

Highlights from management commentary

- Moratorium by value: The proportion of customers that have availed the moratorium for segments Agri (31%), Retail (38%), Business Banking (79%), Commercial Banking (53%) and Corporate (20%). Overall, 35% of the total portfolio in value have availed moratorium.
- NIMs would remain stable over the next two quarters while some pressure could be seen from 3QFY21, depending on the macro environment.

Valuation and view

FB has reported moderation in business growth, reflecting a challenging economic environment impacted by the COVID-19 outbreak. We expect overall loan growth to get affected due to reduced economic activity and the ongoing lockdown. Though the bank has lower quantum of stressed

assets, we nevertheless expect credit cost to stay elevated due to COVID-19 related provisioning. FB has been taking a cautious approach in building the loan mix toward high-rated corporates and retail loans. Also, the bank's liability franchise remains strong with CASA + Retail TD of 91% and one of the highest LCR amongst banks. We cut our FY21E estimates sharply by 19% as we factor in the higher credit cost and slight moderation in business growth while maintaining our FY22E projections. We estimate FB to report RoA/RoE of 0.9%/10.9% by FY22E. Maintain **Buy** with a revised TP of INR65 (0.8x FY'22E ABV).

Valuation and view

■ Net stressed loans decline to 1.8% of loans; credit cost to stay elevated: FB has reported sharp decline in net stressed loans (NNPA + standard restructured + net SRs) to ~1.8% of loans v/s 5.4% during FY16. Going ahead, the bank has no big ticket (>INR1b) accounts in its watch-list. However, the outbreak of COVID-19 has disrupted business activities across segments while the moratorium book of ~35% could witness further increase as the period gets extended by another three months. This could result in higher slippages while credit cost is likely to stay elevated at 1.5% for FY21 as the focus remains on strengthening the PCR.

- Strong liability franchise: CASA + retail TD constitute ~91% of total deposits. The bank has lower cost of funds' advantage compared to other mid-sized banks and is focused on cross-selling liability products to corporate clients to garner salary accounts, which could support margin in the near term. However, muted macro environment could result in some pressure on margins. Management has highlighted that the bank would witness some pressure 3QFY21 onwards.
- Lending toward better rated corporates; business growth to remain subdued: FB has been taking a cautious approach in building the loan mix toward high-rated corporate and secured retail loans. The proportion of retail loans has improved to ~31% in 4QFY20 from 27.4% in FY18. However, business growth is likely to remain subdued affected by the outbreak of COVID-19, which could moderate the overall operating performance.
- Buy with a target price of INR65: FB has reported moderation in business growth, reflecting a challenging economic environment impacted by the COVID-19 outbreak. We expect overall loan growth to get affected due to reduced economic activity and the ongoing lockdown. Though the bank has lower quantum of stressed assets, we nevertheless expect credit cost to stay elevated due to the COVID-19 related provisioning. FB has been taking a cautious approach in building the loan mix toward high-rated corporates and retail loans. Also, the bank's liability franchise remains strong with CASA + Retail TD of 91% and one of the highest LCR amongst banks. We cut our FY21E estimates sharply by 19% as we factor in higher credit cost and slight moderation in business growth while maintaining our FY22E projections. We estimate FB to report RoA/RoE of 0.9%/10.9% by FY22E. Maintain Buy with a revised TP of INR65 (0.8x FY22E ABV).
