CMP: INR284 TP: INR350 (+23%) Buy Resilient portfolio; valuation comfort underpins Buy rating

Brief view on results and stock

- Marico's (MRCO) 4QFY20 sales were marginally below estimates on account of the COVID-19 led lockdown headwinds. However, EBITDA and margins were above estimates due to benign commodity costs and lower ad spends. Further, lower-than-expected tax rate led to the PAT beat.
- We believe that MRCO's relatively resilient portfolio of products should help it weather the impact on sales and earnings decline in FY21, unlike several of its peers. Valuations appear attractive at 32x FY22E EPS, below 3/5/10-year average for a business that has better earnings visibility compared to peers. Maintain **Buy**.

Small miss on topline, EBITDA and Profits ahead of expectations

- 4QFY20 consol. net sales declined 7% YoY to INR15b (v/s est. INR15.4b). Overall volume declined 4% YoY while EBITDA decreased 4.1% YoY to INR2.8b (v/s est. INR2.7b). PBT declined 3% YoY to INR2.6b (in-line). Adj. PAT declined 3.3% YoY to INR2b (v/s est. INR1.8b).
- 4QFY20 consol. gross margins expanded by 20bp YoY to 49.3%. EBITDA margin expanded 60bp YoY to 18.9% (v/s est. 17.4%) during the quarter.
- 4QFY20 standalone sales/EBITDA/adj. PAT declined 7.9%/4%/5.8% YoY.
 EBITDA margins expanded 80bp YoY to 18.4%. Domestic volume declined 3% (in-line).
- FY20 consol. sales/EBITDA/PAT growth stood at -0.3%/+10.9%/+13.4% YoY.
- **Domestic segmental performance:** Volume growth of Parachute Rigid/ Saffola (Refined Edible Oil)/ VAHO stood at -8%/+25%/-11% with value growth at -12%/+25%/-18% YoY.

Highlights from management commentary

- Primary volumes were expected in mid-single-digit if not for the COVID-19 impact. Parachute volumes had recovered in 4QFY20 (before the COVID-19 impact) compared to the previous two quarters.
- 90-95% of MRCO's portfolio gained market share displaying resilience.
- MRCO has recently attained 70-80% of normal working level (operations in plants) after being severely impacted in the second half of Mar'20.

Valuation and view

- MRCO has a more resilient portfolio of products than its peers to withstand the COVID-19 led sales and earnings decline in FY21. This is possible on account of (a) recovery in *Parachute* volumes before the COVID-19 impact, (b) successful turnaround and strong growth witnessed in *Saffola* edible oils and foods, and (c) better outlook for the international business compared to peers. Further, outlook on material costs is also better than the earlier expectation of a possible inflation.
- Longer-term growth trajectory and eventual rerating would be determined by the success of its new products (an area with limited success for now). Nevertheless, valuations appear attractive at 32x FY22E EPS, below 3/5/10-year average of 44.9x/43x/35.5x, for a business that has better earnings visibility compared to peers. Maintain **Buy** with TP of INR350.

■ Lower A&P expenses as a percentage of sales (down 110bp YoY to 8.4%; absolute A&P spends down 17.6% YoY) and staff cost (down 10bp YoY to 7.2%) were partially offset by higher other expenses (up 80bp YoY to 14.8%). This led to EBITDA margin expansion of 60bp YoY to 18.9%.

Exhibit 1: Overall volumes declined 4% while India business volumes declined 3% in 4QFY20

FY20 consol. sales/EBITDA/PAT growth stood at -0.3%/ +10.9%/ +13.4% YoY. EBITDA margin expanded 200bp YoY to 20.1%.

• On the consol. balance sheet front, for FY20, OCF increased 14.7% to INR12.2b and FCF increased 12.3% YoY to INR10.3b v/s PBT growth of 11.6%.

Key highlights of Domestic business (77% of turnover in FY20)

- The India business recorded volume decline of 3%, vastly affected by disruptions in the last fortnight of Mar'20 due to the COVID-19 led lockdowns initially enforced in some states and eventually all over the country. If not for this disruption, the domestic business would have delivered low-to-mid single-digit volume growth during the quarter.
- The company witnessed some encouraging signs for demand in its core portfolios until early-Mar'20, which sharply diminished as economic activity progressively slowed and adherence to social distancing norms became imperative. Stress in the personal care category heightened during this period. In contrast, foods and allied categories, which were growing healthily earlier as well, gained disproportionately as households stocked up these items in the days leading to the lockdown.
- Challenges for the traditional channel in rural and urban areas mounted during the quarter, while Modern Trade (MT) and Ecommerce grew healthily and gained higher salience in the India business.

Segmental

- Parachute Rigids: The brand declined 8% in volume terms in 4QFY20 (flat in FY20). Parachute posted low-single digit volume growth in the first two months of the quarter, as impending pricing corrections and consumer promotions hit retail shelves at the beginning of the quarter. However, volumes declined in Mar'20 owing to disruption in supply chain operations, which led to negligible sales in the last week. Overall, volume market share of the Coconut Oil franchise (includes Nihar Naturals and Oil of Malabar) expanded to 62% in 4QFY20.
- Value Added Hair Oils: VAHO was down 11% in volume terms in 4QFY20 (-2% in FY20), as primary sales plummeted in the second half of Mar'20 with cessation of sales in the last week. However, there was a modest decline in secondary volumes during the quarter. The mid and premium segments of the category continued to underperform. Despite the same, the franchise gained market share in both volume/value terms to 35%/~26%.

 In the medium term, MRCO aims to revive growth in this franchise by adopting a three-pronged strategy, which includes (a) aggressive participation at the pyramid's bottom on the back of its leadership position, (b) accelerating growth in the mid segment through pricing and brand renovation, and (c) aiming to gain market share in the premium segments (where the company is relatively underrepresented) through innovations that offer higher order sensorial/functional benefits and brand building.
- Saffola (refined edible oil): Saffola refined edible oils grew 25% in volume terms in 4QFY20 on robust base (+9% in FY20). The brand maintained its healthy growth run, topped up by households stocking up on food and essential items in the early stages of the COVID-19 outbreak. While the brand posted healthy growth in the traditional channel, higher salience in the new age channels of MT and Ecommerce enabled it to further outperform through the quarter. Growth was backed by significant media investments and in-store promoter programs.

Premium Hair Nourishment and Male Grooming declined 19% and 9% in volume terms, respectively, as discretionary personal care portfolios lost favor during the lockdown.

- ▶ Premium Hair Nourishment: Despite the decline in 4QFY20, Livon Serum posted high single-digit volume growth in FY20. While growth in bottle packs was led by new age channels (MT and Ecommerce), the 2.5ml sachet pack (priced at INR3) played its role as the key trial pack by expanding the brand's reach in General Trade.
- ➤ Male grooming: This declined during the quarter mainly due to near-zero sales in the last fortnight of Mar'20. The franchise (ex-deos) grew 5% in volume terms in FY20.
- Outlook for Domestic business: EBITDA margins are expected at 20% plus in the India business over the medium term.
 - ➤ **Parachute Rigids**: Volumes should grow in the range of 5-7% over the medium term.
 - **VAHO**: Company aims to revive volume growth in this franchise in the near term.
 - Saffola: Company aims to sustain high single-digit volume growth over the medium term.
 - ➤ **Healthy Foods**: 20% plus CAGR over the medium term.
 - ➤ Premium Hair Nourishment, Male Grooming and Skin Care: Value growth of 20% plus CAGR over the medium term. Though, in the near term, its expectations remain soft.

Key highlights of International business (23% of turnover)

- International business' reported revenues declined 6% in constant currency (CC) terms. MENA and South Africa posted sharp drops while Bangladesh and Vietnam still ended in the green, given the relatively limited restrictions imposed in these regions in Mar'20.
- Bangladesh (49% of International business) revenues grew 6% in CC terms during the quarter despite the enforcement of a lockdown in the country in the last week of Mar'20.
- South East Asia majorly Vietnam and Myanmar (26% of International business) saw sales growth of 5% in CC terms in 4QFY20.
- Middle East and North Africa (12% of International business) revenues declined 50% in CC terms in 4QFY20. The business has recovered in Apr'20 and MRCO hopes that normalcy would return by end-1QFY21.
- South Africa (7% of International business) sales declined 26% in CC terms in 4QFY20 due to continued macro headwinds coupled with social distancing and other restrictions that were enforced to contain the COVID-19 outbreak in the region. The macros in the region remained weak. MRCO expects some revival in this business over the medium term on the back of a pipeline of new products.
- New Country Development & Exports (6% of the International Business) generated revenues of nearly USD14m in FY20 with expansion in adjacent markets such as Nepal and Bhutan, exports to diaspora and other markets. The business grew 2% in CC terms during 4QFY20 (33% in FY20).
- Outlook for International business: Organic broad-based double-digit constant currency growth with aim to maintain operating margins at 20% over the medium term.

- **Bangladesh**: Company is confident of delivering double-digit CC growth in this geography over the medium term. In FY21, however, the macro headwinds may indicate a higher single-digit CC growth.
- > South East Asia: Expect to deliver steady CC growth in this geography over the medium term.
- **MENA**: Cautious about Egypt and would be aggressive on cost management.
- > South Africa: In the context of macro headwinds in the region, MRCO remains cautious on the near term outlook for the business.
- New Country Development & Exports: The company remains positive on the future prospects of this business as it incubates new geographies to expand its franchise.

Outlook for Consolidated business

- While the company aspires to deliver 8-10% volume growth and 13-15% revenue growth in the medium term, the near term is currently unpredictable.
- Operating margin is expected to be maintained at 19%+ over the medium term.
- Capex: For FY21, it is likely to be ~INR 1.25-1.5b.
- Other expense is likely to range between 11-13% of turnover in the medium
- Tax rate: MAT credit as on 31st Mar'20 stood at ~INR1.33b and is expected to be utilized by the company in the coming years. The company would continue to recognize tax expense after availing exemptions/deductions as per the existing provisions of the Income Tax Act and would not opt for the revised rate structure.

Update on new launches

- **Personal care** Driven by the heightened awareness for personal hygiene led by COVID-19, MRCO launched hand washes and hand sanitizers across markets. It launched Mediker Hand Sanitizer in the domestic market in Apr'20. Marico Bangladesh launched Mediker SafeLife Hand Sanitizer and Hand Wash whereas X-Men Go Hand Sanitizer was launched in South East Asia markets.
- Hygiene Launched Veggie Clean, a first-of-its-kind fruit and vegetable cleaner across MT and Ecommerce channels in two SKUs - 200ml and 400ml for INR149 and INR289, respectively.

Conference Call Highlights

Holistic view

- The Jan-Feb'20 period was better than the previous two quarters before restricted movement and the subsequent national lockdown came into force.
- Mid-single-digit primary terms would have been witnessed if not for the COVID-19 impact. Parachute volumes had recovered before COVID-19 v/s the previous two quarters.
- 90-95% of MRCO's portfolio gained market share.
- The company has recently attained 70-80% of normal working levels.
- Saffola is doing well amid resurgence of at-home cooking and rising health awareness. This makes the company confident of double-digit growth in FY21. Value for money for consumers and focus on *Gold* and *Total* ranges (have higher realizations) are under focus. No panic buying was witnessed after the second

and third week of Mar'20 and yet Saffola is doing well.

 Other than discretionary part of its portfolio, the core part is trending well in the current quarter.

- Expect *kirana* stores and Ecommerce sales to be much higher this year as they provide quick and safe shopping experience. Premium personal care from chemist outlets would also be more prevalent. DIY personal care brand usage would also pick up in the absence of salons.
- Stronger brands with better distribution networks are doing better in the 'Red' zones declared by the government.

Other Category highlights

- Parachute is well placed to gain share from smaller players that have working capital pressures and weak access to distribution. Low unit packs (LUP) would be the key growth driver. The brand is trusted and untouched by hand, which are additional factors that would enable conversion.
- VAHO There has been a decline in the premium end of the market.
- VAHO Aloe Vera and Dry Fruit oil are doing well among new products.
- VAHO category has not witnessed decline in growth but there has been more of down-trading.
- As VAHO is crude linked, MRCO can pass on the savings in crude cost (due to recent correction in crude price) to regain market share from the lower end by providing value to customers.
- VAHO Non-sticky and premium segment is getting affected more by the current COVID-19 led disruption. MRCO has disproportionately lower share in this segment.
- Youth portfolio remained weak in April as well.

Five factors that Marico would focus on in FY21

- MRCO's focus would be to realign its portfolio more toward nutrition and hygiene.
- MRCO is proactively looking at new last-mile options including direct sales model (through tele-calling and mobile app), retail aggregators and initiatives like saffolastores.in. It would scale up some of these channels eventually.
- The company would be selective with ad-spends on core business and would focus more on digital media.
- Cost savings would be a key focus area for the company to deal with the current challenging situation.
- New millennial way of working would be accelerated in the post COVID-19 era.

Overseas business

- Bangladesh and Vietnam (70% of overseas sales) did well. Outlook on both these markets is good from FY21 perspective as well.
- Bangladesh is likely to open up soon from the lockdown, which in itself was less stringent than India. Skin care and baby care are doing well in addition to VAHO. Non-Parachute is 30% of the portfolio and is likely to be 40% in two years.

Other points

For 4QFY20, ad-spends seem lower YoY due to higher NPD spends in the base quarter with ad-spends on *Kaya*, *True Roots* and *Crème*.

7

Work from Home is for only 3-4% of the population and rest of the workforce would have to go to their workplaces post-lockdown. So it is unlikely that VAHO would get impacted after the removal of the lockdown.

- MRCO is supporting channel partners through lower inventory, selective credit, COVID insurance for third-party employees, sanitization of their facilities and using third-party transporters to help distributors.
- Copra costs may be slightly deflationary in the short term.
- MRCO is exploring all means for cost reduction but its first priority would be to protect jobs.
- In FY21, ad-spends could decline by 100bp and still share of voice (SOV) would be higher. For the next 6 months, no shooting of advertisements is likely to happen. Similarly, field sampling is also likely to be low for the next few months.
- Extension of temporary credit to trade, higher proportion of MT toward the year-end and increase in receivables from CSD channel led to an increase in receivable days by 3 days. Control over inventory and higher payables offset this growth, which meant that OCF at ~14.7% and FCF growth at 12.3% was ahead of the ~11.6% increase in PBT.

Valuation and view

What has happened in the last 10 years?

- In MRCO's key categories like Coconut Oil and Value Added Hair Oil (VAHO), the company reported healthy sales growth with volume growth in *Parachute* actually improving in recent years.
- In Saffola Foods (oats), the company was able to establish and successfully grow the Masala oats category.
- Growth in *Saffola* the edible oil brand, has tapered off in recent years, partly due to strategic mistakes on pricing and partly owing to the company being unable to cater to the recently emerged super-premium segment of the market.
- Similarly, brands acquired from Paras/Reckitt i.e. Livon, Set Wet and Zatak have not scaled up to the expectations despite high category growth potential.
- Top line and earnings growth have nevertheless been healthy over the past 10 years with CAGR of ~11% for top line, 15% for EBITDA and 16% for PAT. While growth has been healthy over the past five years, it has tapered off compared to the past with sales/EBITDA/ PAT growth at ~5%/11%/~13%.

Our view on the stock

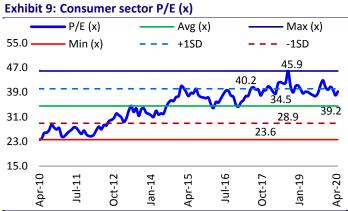

MRCO has a more resilient portfolio of products than its peers to withstand the COVID-19 led sales and earnings decline in FY21. This is possible due to (a) recovery in *Parachute* volumes before the COVID-19 impact, (b) successful turnaround and strong growth witnessed in *Saffola* edible oils and foods, and (c) better outlook for the international business compared to peers. Further, outlook on material costs is also better than the earlier expectation of a possible inflation. Longer-term growth trajectory and eventual rerating would be determined by success of new products (an area in which success has been limited for now). Nevertheless, valuations appear attractive at 32x FY22E EPS, below 3-year/5-year/10-year average of 44.9x/43x/35.5x for a business that has better earnings visibility compared to peers. Maintain **Buy** with a TP of INR350.
