

The Blue Star AR while addressing the covid-19 impact talks about company's focus on constant innovation, product expansion and dealer engagement. The company revamped its products and brand with Virat Kohli as the brand ambassador in FY20. The company has implemented the BlueStar@80 FY24 strategy; management continuity, constant innovation and cash conservation form the main pillars.

New FY21-24 strategy in place

It has a strategic plan for FY21-24, with three objectives- grow faster than market, improve profits by scale and backward integration, deepen distribution through conventional and E-com channels. This ties in with what they have been consistently saying- increase their manufacturing component and deepening distribution. This strategy focuses on backward integration, liquidity maintenance, and network expansion. The company is set to shift its operating model from a physical to hybrid 'phygital' model for post covid-19 scenario. The current contribution from e-commerce to total sales is 5%; Blue Star aims to increase this contribution to 20% of sales by FY24.

Innovating on product and distribution

Blue star continues to inch up its market share in the main AC business. Its market share in RAC has very marginally gone up by 20bps to 12.5%. It was 12.3% in FY19. However, over the past two years, it has gone up 100bps from 11.5% in FY18. In FY20, Blue Star forayed into the 'Premium-Yet-Affordable' segment by rolling out a range of ACs with integrated air purifiers and smart wi-fi enabled 5-star ACs. The Company also launched a new range of air coolers and RO/RO+UV range of water purifiers in the entry/mid-level segment for e-commerce platforms. On the distribution, the company has gotten 508 new dealers on board. Blue star focused on increasing market reach in Tier 3 and 4 cities, it obtained an edge in marketing by appointing Virat Kohli as its brand ambassador. The company has also expanded international presence by inaugurating new flagship store in Dubai in FY20. It has increased market share in VRF by 200bps to 18% and 500bps in ducted systems to 45%.

Strong balance sheet with focus on cash.

As per Blue Star's strategy for FY24, conserving cash has been the main focus with maintaining a close watch on receivables in order to keep WC in check. It has also raised Rs3.5bn NCDs to infuse enough cash in its books, cash balance for FY20 went up from ~Rs.1bn levels in FY19 to almost ~Rs.3bn in FY20. The net receivables fell by 25% to Rs.8.4bn in FY20. WC decreased marginally by Rs.320mn, which was Rs.6.2bn as on 31st March, 2020.

Management continuity should aid new strategic plan

Management continuity will be another key positive as Blue Star seeks reappointment for its MD B Thiagarajan for another five years from FY22-27. The senior management team remains unchanged with Mr. Shailesh Haribhakti as chairman, Mr. Vir Advani as vice chairman and MD and Mr. Thaigarajan as MD at the forefront. This should help its current strategic plan from FY21-24.

- EBIT grew to Rs.543mn in FY20 compared to Rs.478mn in FY19; driven by major orders in the data security solutions business and growth in Industrial Systems. The segment contributed to 16% of profits due to higher EBIT margins at 20%.
- The International business grew steadily in the Middle East, SAARC and Africa markets. With a stable margin of 4% to 5% in FY20, continued to contribute to ~10% of total revenues.
- The Infra Security business, won some video surveillance orders. The Communication Systems business secured a few orders for radio frequency, microwave, avionics test and measuring equipment from the Defense, Space and Aerospace sectors.

Strategy & Outlook

The spread of Covid-19 and nationwide lockdown in India has taken place during the product business peak sales months of March, April and has extended to May trickling revenue impact into Q1FY21 and is expected to impact overall revenues and bottom line in FY21. Positively, the Covid-19 crisis has enhanced the market potential for Healthcare, Pharmaceutical, Food Preservation and Home Delivery sectors.

Company will soon launch its new range of central air conditioning solutions claiming capability of killing the COVID-19 virus; along with a plan to scale up retrofit solutions. The work-from-home practice is expected to continue post lockdown and demand is expected to rise for unitary products.

The company's strong focus is on adding new dealers in metros and Tier 3,4 and 5 cities and establishing brand in e-commerce channels. Company will leverage AI, Big Data analytics and Augmented Reality technologies through the 'phygital' mode, thereby widening the addressable market.

The Professional Electronics and Industrial Systems business also stands to benefit with increased thrust on digital payments providing impetus to data security solutions. Affordable healthcare is going to receive a huge investment which company will leverage this as it specializes in low-cost solutions for the Healthcare Technology business.

The Company with a proposal to raise funds and optimize costs, will continue to focus on cash flow and capital employed in these challenging conditions.

Company will continue to invest in R&D and manufacturing in order to remain ahead of the curve. Blue Star has an undeterred focus on indigenous sourcing through the Aatmanirbhar Baharat Abhiyan and expanding its export operations.

Opportunities

- With the e-commerce market being valued at Rs.2.6tn (USD 35bn), growing online sales due to social distancing norms, will create demand for its unitary products and commercial cooling products due to increasing demand for warehouse space.
- Only 5% of Indian population has access to air conditioners, as compared to 50% and more in the developed markets. This is likely to fuel demand for room air conditioners over the next few years.

- Increased opportunities from the Pharma, Healthcare and Processed Food sectors offers tremendous opportunities for growth of the Company's Commercial Refrigeration business.
- The company believes that water purifiers will witness market size expansion, with the growing awareness on health and enhancing levels of human immunity to infectious diseases.
- Increasing digital interaction by banking and financial services sector as an outcome of social distancing will open up new opportunities for the Data Security Systems business.
- Government's spending allocation towards Healthcare Systems is also expected to create opportunities for the Company's Healthcare business.

Threats

- Along with being cyclical in nature, the international operations are also exposed to geo-political risks such as changes in tax regime and political unrest.
- The company also faces competition from international and domestic players due to widespread market operations.
- The Company's product businesses are seasonal in nature, which can spell doom for the company as dealers tend to over or under-stock in order to forecast unforeseen weather patterns.
- The company with its international presence and imports of components faces risk of volatile foreign exchange and commodity prices which are a sensitive factor in the current economic environment.
- Key components for manufacture of the Company's products such as compressors, copper tubes, electronic parts, indoor units for split air-conditioners and inverter drives are sourced from vendors in China and other countries. Any disruption in supply caused due to geo-political reasons, imposition of non-tariff barriers or COVID-19, may significantly impact the company.
