Factoring demand recovery

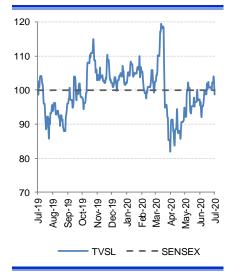

- TVS Motors (TVSL) Management has acknowledged the near term pain in the domestic and export business owing to the impact of COVID-19 pandemic but remains hopeful of recovery in the 2W segment led by increased preference for personal mobility and improvement in rural sentiment.
- Management expects the economic impact of COVID-19 to be more pronounced in the markets of LATAM, whereas the African countries seem to be less impacted, and the core demand may return sooner.
- In 2W segment, the company has lost market share by ~100 bps to 13.8% led by strong competition in entry level by incumbents in motorcycles and weak demand in mopeds. However, we believe TVSL's extensive product portfolio, strong dealer network in rural areas to help the company to capitalize the rural recovery.
- The company ROCE (post-tax) declined further to 16% in FY20 (from 22.7% in FY19) as volume and margin weakened led by multiple factors (increase in 2W price led by BS-VI transition insurance cost and mandatory safety regulations).
- Investment in subsidiaries and associate increased by Rs 13.83bn in FY20 led by further investment in its financing arm TVS credit services and TVS Motor (Singapore) Pte. Ltd. Net Profit from subsidiaries and associate reduced slightly to Rs 338 mn vs Rs. 370mn in FY19.
- Standalone net Debt increased to Rs 16.95bn (vs Rs 13.6bn in FY19) with an increase in net Debt/Equity to 0.5x in FY20 from 0.4x in FY19. However, company has managed it working capital cycle efficiently and Cash conversion cycle improved -13 days in FY20 against -7 days in FY19.
- Standalone operating cash flow increased by 27% YoY to Rs. 13.96bn in FY20 and free cash flow has improved to Rs. 6.85bn in FY20 from Rs. 3.69bn in FY19
- Recent acquisition of Norton Motorcycles (all-cash transaction for a consideration of GBP 16mn) will help TVS to widen its product line-up and launch more premium products in the future.
- Despite a positive outlook for 2W, we continue to remain cautious on TVSL given (1) its relatively weaker margin structure (2) contracting market share in the bike segment (3) higher marketing spend with new model launches and competition.
- At CMP, the stock is trading at 26x on FY22E earnings, which appears expensive compared to its peers. We roll forward our valuation from FY22E to FY23E, and raise our target price to Rs 355 (based on 18x of FY23E EPS+ value of TVS Credit Services at Rs.17/share).

Rural market to drive 2W demand

While management expects the slowdown to continue due to the Covid-19 disruption, recovery in rural demand and increased preference for personal mobility are key silver lining. The management is hopeful of recovery in 2HFY21 in the 2W segment. Also expects to outperform the 2W industry growth rates, due to its diversified product portfolio. It expects premium products (Apache and Ntorq) to do better than other segments, and expects these products to outperform the industry

- TVSL domestic 2W volumes declined 23% YoY in FY20, higher than the industry decline of 18% YoY. The company has lost market share by ~100 bps to 13.8% led by strong competition in entry level by incumbents in motorcycles and weak demand in mopeds. In motorcycles, the company's market share dropped 63 bps YoY to 6.7% led by underperformance in the entry segment (8.6% market share, versus 9.7% in FY19).
- The underperformance was driven by 1) cannibalization with entry level models, with the launched of Radeon and 2) sharp competitive pressure from Bajaj and Hero MotoCorp. In premium motorcycles, especially in Apache, TVS also witnessed 21% YoY fall in volume due to sharp jump in prices caused by the transition from BS-IV to BS-VI and strong competition. However, the company is continuing to strengthen its market shares in scooters. Market share in Scooter segment remain flat 18% in FY20

During the year company has made various launches mostly upgradation of its existing product portfolio. TVS has launched upgraded version of its successful product Ntorq 125 and Jupiter. In Moped it has upgraded its XL100 with bundle of new features such as On-Board Diagnostics Indicator (OBD I) located on the instrument cluster new Comfort i-TOUCH start feature with better fuel efficiency. Company has also expanded its product offering with launch of its first electric Scooter, TVS iQUBE.

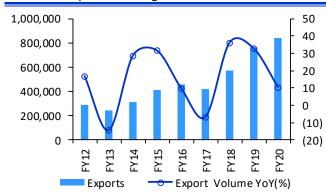

Outlook for export looks uncertain

2

Export of two-wheelers is likely to see a decline during the initial part of the year as pandemic CoVID-19 is affecting most countries across the globe. A sustained trend of low crude prices may also impact export market growth in oil dependent economies of Africa. Management expects the economic impact of CoVID-19 to be more pronounced in the markets of LATAM, whereas the African countries seem to be less impacted, and the core demand may return sooner. The situation in the export markets is gradually improving and will take more time to return to normal levels. The Company's two-wheeler exports grew by 9.2% YoY at 678k units in FY20. Three-wheeler exports reached 162k in FY20, grew by 15.9% YoY.
