Lower sales volume largely offset by firm pricing...

Sagar Cements reported a robust performance with EBITDA, PAT growth of 10%, 22%, respectively, in a challenging Q1FY21. The results were ahead of our estimates mainly on account of a sharp increase in cement prices in AP, Telangana aided by lower fuel prices during the quarter. Revenues fell 23.3% YoY to ₹ 264.1 crore (broadly in line with our estimated revenue of ~₹ 271 crore. Sharp fall in sales volume (down 32.5% YoY to 0.55 MT was largely offset by a sharp rise in cement prices (up 13.8% YoY, 31.6% QoQ to ₹4775/t) in AP, Telangana region. The company outperformed our expectations on the margins, profitability front, reporting EBITDA margins of 32.9% (up 1010 bps YoY) for the quarter, which is highest ever margins reported so far during the quarter by any cement company. Drop in petcoke prices also helped it to reduce power & fuel cost by 24% YoY to ₹ 805/t. Capacity utilisation for the quarter was at 37%. With gradual unlocking of economic activities, we expect utilisation to improve, going forward.

Moving ahead with capex; to achieve 10 MT capacity by FY25E

The company is aiming to reach 10 MT capacity by FY25E. In the first phase, it is adding 2.5 MT capacity (1 MT in MP, 1.5 MT in Odisha) for capex of ₹ 800 crore. These capacities will likely get commissioned by end of Q2FY22. Post these expansions, total capacity will increase to 8.25 MT. Having already spent ~₹ 200 crore on these two plants, the company expects debt to peak ~₹ 800 crore and D/E to peak at 0.6x in FY22E. The company has the backing of promoters and international investor, providing comfort.

Lower CoP, firm pricing to support margin expansion

The company's cost of production (CoP) is one of the lowest in the south market. In the past three years, the company has also initiated further cost efficiency measures like setting up of coal based CPP of 18 MW at its plant in Mattampally, Nalgonda and expansion of grinding unit in Bayyavaram to 1.5 MT. This, in turn, has helped the company to reduce lead distance and power costs. For fuel requirement, the company also uses 100% petcoke, prices of which also fell 24% YoY leading to further reduction in CoP by 1.1% YoY to ₹ 3,200/t despite lower sales volume offtake on account of lockdown during the quarter. Going forward, we expect the company to broadly maintain the CoP at optimum levels, which would help it to improve margins on a YoY basis despite factoring in the softening of cement prices after a sharp rally due to supply disruptions.

Valuation & Outlook

While the full benefit of new capacities would start flowing in from FY23, we expect expansion led revenue CAGR of 14.2% in FY20-22E. On the valuation front, the company is available at an FY20 EV/t of \$51, implying a considerable margin of safety to the replacement cost of \$100-110. Further, with strong management profile, cost efficiency and healthy BS, we maintain BUY rating with a revised target price of ₹ 650 (i.e. at 7x FY22E EV/EBITDA).

RATING RATIONALE

ICICI Direct endeavours to provide objective opinions and recommendations. ICICI Direct assigns ratings to its stocks according to their notional target price vs. current market price and then categorizes them as Buy, Hold, Reduce and Sell. The performance horizon is two years unless specified and the notional target price is defined as the analysts' valuation for a stock

Buy: >15%

Hold: -5% to 15%;

Reduce: -15% to -5%;

Sell: <-15%
