Indoco Remedies (INDR IN)

Rating: ACCUMULATE | CMP: Rs450 | TP: Rs480

Strong domestic show; Regulated markets to recover in H2

Quick Pointers:

- Reiterated US sales guidance of Rs2.5bn despite muted Q2
- Domestic formulation continues to register strong growth

Indoco Remedies' (INDR) Q2FY22 performance was muted in regulated market, but should recover with pick up in profit share from Brinzolamide in US and settling of logistics issues in EU markets. The domestic market continued to witnessed strong growth in therapies like anti-infective, GI, VMN and Opthal. We remain structurally positive on INDR on account of 1) MR productivity enhancement and higher penetration in North and East markets 2) new launches in US and 3) higher tender business in EU market. This will continue to sustain current margin trajectory at ~20%. We recommend 'Accumulate' with TP of Rs480 based on 20x Sept 2023E earnings.

- Acute segment drives the domestic market; US and EU underperformed: Domestic formulations business sales grew 22.3% YoY and declined 0.7% QoQ at Rs 2136mn. Most of the therapeutic segments of INDR reported strong double digit growth on YoY. Export formulations business declined 11% QoQ at Rs1355mn, impacted due to availability issues of containers in the export market, which company expects to continue in Q3 as well. API declined by 13.6% YoY mainly on increased captive consumption during the quarter.
- Export challenges to impact margins going ahead: INDR registered OPM of 22.3%. There was forex gain of INR120m booked in other operating income. Adjusted for this, OPM came in 19.4%, down 200 bps QoQ. Gross margins expanded by 40bps QoQ however down 60 bps YoY due to higher API prices. Other expenses grew by 14% YoY given normalization of marketing cost. R&D cost came in higher at 5.7% of sales; up 36% YoY. PAT grew by 63% YoY and 5% QoQ to Rs 417 mn.
- Key concall takeaways: (1) Company launched 4 new products in domestic market and 12 new products in US market. INDR also plans to launch 3-4 new product in opthal segment during H2. (2) Rate of attrition remains high in domestic formulation segment at 25-30%, while company kept in place buddy program along with monetary/non-monetary initiatives to reduce the attrition. (3) In anti-infective segment, legacy brands will register increased growth on seasonality, focusing on products like Aloja and Aloja M to create niche market with single player advantage in anti-diabetic segment. (4) Profit share from *Brinzolamide in US was Rs85mn in H1* 5) The average cost of borrowing is at 5.5% and company repaid its long term debt of Rs 130crs. (5) **Other Guidance:** a) annual capex of Rs 800mn in FY22, b) Recovery in US formulations from Q3; reiterated its guidance for US revenue of Rs 2500mn in FY22E and c) Company broadly maintains its earlier EBITDAM guidance at 19-20% in FY22.

Exhibit 1: 2QFY22 Result Overview (Rs m): Domestic formulations drives the growth
