*A Daily Report on Agricultural Commodities*

Wednesday, March 02, 2022

## TODAY'S PICKS

The views/strategies expressed in this today's picks are Pre- Market Open views/strategies i.e., BUY/SELL posted in the today's Picks are purely based on technical analysis and recommended for intraday trading. Fundamental factors, sudden currency volatility and other data/news events that have a bearing on price movements were not considered while preparing this report.

## AGRI BUZZ

- The Soybean Processors Association of India has criticised the Solvent Extractors' Association of India's suggestion to stop soybean cultivation in the country and use the 12 mln ha meant for soybean cultivation, to cultivate other crops, it said in a written statement .
- The government has raised the base import prices of all edible oils by \$18-\$44 per tn, the Central Board of Excise and Customs said in a notification.
- The conflict between Ukraine and Russia is likely to keep edible oil prices volatile as India's sunflower oil imports are being hit, said Atul Chaturvedi, president of Solvent Extractors' Association of India.
- The central government had bought 70.7 mln tn paddy as of Sunday in the 2021-22 (Oct -Sep) kharif marketing season, according to an official release.
- The government is working on setting up Farmer Producer Organisations, Farm Minister Narendra Singh Tomar said .

SPICES COMPLEX

Market Buzz

- Barring turmeric, other spices ended down on NCDEX on Monday. Markets were closed on Tuesday on account of Mahashivratri.
- According to the second advance estimates by Gujarat state agriculture department, jeera production is seen declining to 236980 tons in 2021-22, down 41 per cent year on year. Area is seen at 289000 ha as against 473800 ha a year ago. Coriander production is seen declining as well to 211680 tons compared to 221240 tons in 2020-21.
- Exports of spices from India during Apr-Sep declined 8% on year to 780,273 tn, according to data from the Spices Board India.
- Spices Board pegs Apr-Sep jeera exports at 139,295 ton, down 14%.
- Spices Board pegs Apr-Sep turmeric exports at 77,245 ton, down 26%.
- Spices Board pegs Apr-Sep pepper exports at 10,844 ton, up 24%.
- Spices Board pegs Apr-Sep small cardamom exports 4,240 ton, up 101%.
- Spices Board pegs Apr-Sep coriander exports at 24,459 ton, down 13%.
- India exported 299,000 tn of jeera in 2020-21, up 40% on year according to the Spices Board.
- According to Spices Board, Coriander exports from India were up 21% on year at 57,000 ton.
- Government sees 2020-21 coriander output at 720000 tons compared to 701000 tons a year ago.
- Spices Board sees exports of turmeric up 33% to 183000 tonnes in FY 2020-21 on yoy basis.
- Government sees 2020-21 turmeric output at 1.11 million tonnes compared to 1.15 million tons a year ago.
- Spices Board pegs FY21 small cardamom export 6,500 ton, up 251% on year.
- Output of small cardamom is seen rising by 100% on year to 22520 tons according to the Spices Board.

TECHNICAL VIEW

<p><b>DHANIYA NCDEX APR</b></p>	<p>A rise above 11320 is required for more upside. As long as this range caps may trade sideways to weak.</p>	
<p><b>TURMERIC NCDEX APR</b></p>	<p>A rise above 9550 is required for more upsides. As long as this range caps, may trade sideways to weak.</p>	

## COTTON COMPLEX

### Market Buzz

- The UK-based Cotton Outlook has scaled up its estimate for global production in 2021-22 (Aug-Jul) by 25,000 tn to 25.7 mln tn in its February report. The estimate has been revised upwards as production in Australia is expected to be higher. The agency has also raised its estimate for global consumption in 2021-22 by 25,000 tn to 25.95 mln tn. Global cotton ending stocks for the ongoing 2021-22 season are estimated at 254,000 tn.
- The Cotton Association of India has reduced its production estimate for the 2021-22 (Oct-Sep) marketing season to 34.3 mln bales from 34.8 mln bales projected a month ago. The reduced estimate can be attributed to some crop loss because of excess rain in November, in the key producing states which impacted crop quality. Of the total crop, around 19.2 mln bales had arrived in markets across India till January. Exports in the ongoing marketing year have been revised downward to 4.5 mln bales, as against 4.8 mln bales estimated earlier. India shipped around 2.5 mln bales of cotton till January. The association has also lowered its estimate for domestic cotton consumption to 34.0 mln bales and imports are maintained at 1.5 mln bales. The ending stock for the 2021-22 season has been estimated at 4.8 mln bales, as against 4.5 mln bales projected a month ago. Govt pegs 2021-22 cotton output at 34.1 mln bales vs 35.2 mln bales.
- A surge in prices in the domestic market has made India's cotton uncompetitive, weighing on exports of the commodity in the 2021-22 (Oct-Sep) season. Domestic prices have been at elevated levels due to tight supply, as a sharp rise in domestic mill consumption and a decline in production have led to a drop in ending stock estimates, market participants said. In the ongoing marketing year, around 2.6 mln bales of cotton were exported till January, lower than in the year-ago period. In 2020-21, India had shipped 2.9 mln bales during Oct-Jan, according to trade sources. Most consignments this season have been shipped to Bangladesh, followed by China, Indonesia and Vietnam. China isn't actively buying this year. Industry experts say cotton exports this season might stand at 4.0-4.5 mln bales. In the 2020-21 marketing year, India exported 7.5-7.8 mln bales of cotton, with Bangladesh, China and Vietnam being the major buyers.
- The US Department of Agriculture's Foreign Agricultural Service has further scaled down its estimate for cotton output in India in 2021-22 (Aug-Jul) to 27.4 mln bales (1 US bale = 218 kg) from 27.7 mln bales projected in January. The reduction in cotton output estimate is attributed to crop damage due to rains in late September in key producing regions of Telangana. Meanwhile, the agency has raised its estimate for India's cotton consumption in 2021-22 to 26.5 mln bales from 26.0 mln bales estimated a month ago. Trade sources indicate that mill consumption is being supported by robust textile and apparel exports. Mills are reporting good margins and making investments in additional spinning capacity for the long-term. Exports during the season are maintained at 5.9 mln bales with Bangladesh, Vietnam, China, and Indonesia being the top export destinations. Bangladesh continues to be the major buyer of Indian cotton with almost 60% export market share. The estimate for imports into India in the 2021-22 crop year has been maintained at 1.0 mln bales. The closing stock of cotton for the country has been pegged at 9.7 mln bales, compared with 10.8 mln bales estimated the previous month.
- The International Cotton Advisory Committee has marginally raised its price forecast of Cotlook A Index, a global benchmark for prices of raw cotton, to 104 cents per pound, up by 1 cent from the previous estimate. In 2021-22 (Aug-Jul) season, the committee estimated global ending stocks at 21.2 mln tn, higher than 20.4 mln tn in the previous season. Global consumption is seen almost steady at 25.6 mln tn, it said. The agency sees global export for the season at 10.3 mln tn, as against 10.6 mln tn a year ago. Global production for the ongoing season is estimated at 26.4 mln tn, compared with 24.3 mln tn in the previous season. The rise has largely been attributed to higher area and production in India, Brazil and the US. In the US, cotton production is estimated at 3.8 mln tn, against 3.2 mln tn a year ago. Output in India, is expected to be 6.2 mln tn, compared with 6.0 mln tn in the previous year.
- The new season for cotton which started on Oct 1, is expected to be good for farmers as the market price of the fibre is currently more than the minimum support price, due to firm demand and a rise in global prices.
- Sowing of cotton across the country has ended and farmers have sown the crop across 12 mln ha in the 2021-22 (Jul-Jun) kharif season, down 6% from a year ago, data from the farm ministry.
- India's cotton output in the 2021-22 (Oct-Sep) marketing year is seen at 36.2 mln bales (1 bale = 170 kg), as per the median of estimates of 13 prominent players in the cotton value chain polled by Informist.
- In the ongoing 2021-22 (Jul-Jun) season, cotton acreage across the country was 11.9 mln ha as on Thursday, down 5.8% from a year ago, data from the farm ministry showed.

TECHNICAL VIEW

<p><b>KAPAS NCDEX APR22</b></p>	<p>Though short covering rallies witnessed yesterday unable to move above 2005 could see corrective moves towards 1970/1960 levels.</p>	
<p><b>COTTON MCX MAR</b></p>	<p>Short covering rallies are more likely to see towards 37300/37500 levels.</p>	
<p><b>COCUDAKL NCDEX FEB</b></p>	<p>If prices sustain to trade below 3010 could extend corrective selloffs towards 2950/2900 levels. Else, could see bargain buying.</p>	

OTHERS

Market Buzz

- Farmers across the country have sown chana across 11.49 mln ha in the 2021-22 (Jul-Jun) rabi season as of last Wednesday, up 4.1% on year, according to data from the farm ministry. Chana sowing so far has been higher in Madhya Pradesh, Maharashtra, Gujarat, and Uttar Pradesh, while it declined in Karnataka, Chhattisgarh, and Rajasthan. The acreage in Madhya Pradesh, the largest producer, was up 0.9% on year at 2.51 mln ha, and in Maharashtra, the second-largest grower, it rose 9.4% on year to 2.71 mln ha. The area in Gujarat rose significantly by 34.5% on year to 1.10 mln ha. On other hand, the acreage fell in Rajasthan by 1.0% on year to 2.04 mln ha, and in Karnataka by 6.1% on year to 1.10 mln ha.
- The Securities and Exchange Board of India has asked the National Commodity and Derivatives Exchange to not launch any new chana contracts on its platform till further notice, the market regulator said in a release on August 16, 2021.
- Government raises MSP for Rabi crops for season 2022-23. MSP for chana has increased by 2.5 % to Rs. 5230/qtl. against Rs. 5100/qtl previous year.
- India's guar gum exports increased in the month of December 2021 by 44.70% to 25,274 tonnes compared to 17,466 tonnes during previous month at an average FoB of US \$ 2466 per tonne in the month of Dec'2021 as compared to US \$ 2169 per tonne previous month. Further, the gum shipments were up by 43.24% in Dec'2021 compared to the same period last year. Of the total exported quantity, around 7,671 tonnes bought by US, Russia bought 6,964 tonnes, Germany 3,092 tonnes, China 1,036 tonnes, Australia 835 tonnes and Canada 687 tonnes.
- India's guar split exports too increased in the month of Dec'2021 by 24.73% to 3,268 tonnes compared to 2,620 tonnes previous month at an average FoB of US \$ 1,639 per tonne in the month of Dec'21 compared to US \$ 1,557 per tonne previous month. However, the guar split shipments gone up by 16.71 % in Dec'21 2021 compared to the same period last year. Of the total exported quantity, around 1,360 tonnes bought by China, US 960 tonnes, Mexico 528 tonnes and Switzerland 240 tonnes.
- According to Rajasthan govt 2021-22 second advance estimates, Guar seed production is seen a tad down at 1.1 mln tn. 2021-22 acreage stood at 21.13 lakh hectare as compared to 24.84 lakh hectare last year.
- According to Gujarat govt 2021-22 first advance estimates, Guar Seed production estimate pegged at 1.01 lakh tonne Vs 0.85 Lakh tonnes last year, Additionally, 2021-22 acreage stood at 1.21 lakh ha Vs 1.22 lakh ha. Yield pegged higher at 873 kg/ha Vs 699 Kg/ Ha last year.
- The International Rubber Study Group Secretariat has elected Dr K.N. Raghavan, Executive Director, Rubber Board of India as the new Chairperson of the IRSG Heads of Delegation. Dr Raghavan has been elected unanimously by the IRSG Member Governments' representatives and will stay in the position for two terms (2022-2024).
- Thailand is expecting to produce 4.9 million tonnes of natural rubber in 2022, up 1.82% from a year earlier, its rubber agency said. The Southeast Asian country also expects to export about 4.22 million tonnes of it this year, 2% more than in 2021, said Athiwee Dangkanit, an official at the Rubber Authority of Thailand.
- According to The Association of Natural Rubber Producing Countries, in its December release of the Natural Rubber Trends, despite the global economy was hit badly by Covid-19 pandemic in 2020, the natural rubber (NR) industry posted a strong recovery in demand with an 8.7% growth in 2021; while the production of NR recorded at 1.7% growth as compared to the previous year.

TECHNICAL VIEW

<b>CASTOR NCDEX MAR</b>	As prices cleared the upside resistance of 7000 could see more upside moves targeting 7100/7250 levels.	
<b>GUARSEED NCDEX MAR</b>	May trade sideways to weak unless 6010 is breached convincingly upside.	
<b>GUARGUM NCDEX MAR</b>	As long as 10500 holds downside, may inch up. However, a voluminous rise above 11050 is requires for more upsides.	
<b>RUBBER MCX MAR</b>	May trade with a mild positive bias as long as support at 16300 is held downside.	

## OILSEED COMPLEX

## Market Buzz

- India's oilmeal exports fell 64.7% on year to 176,815 tn in January, according to data released by The Solvent Extractors' Association of India. For Apr-Jan, exports of oilmeal were down 34.5% on year at 1.94 mln tn. Soymeal exports plunged to 315,108 tn during Apr-Jan, compared with 1.17 mln tn a year ago, because of the higher price of the Indian variant in international markets. India's exports are unlikely to be competitive in the next two-three months due to high domestic prices of soybean seed, it said. Lower crushing of soybean also led to higher import of crude soybean oil. Mustard meal exports in Apr-Jan fell 26.4% on year to 729,757 tn, while exports of castor meal were down 13.5% on year at 317,606 tn. Currently, availability of mustard seed for crushing is almost over, and the new crop will arrive around February-end or early March.
- India's vegetable oil imports in January rose 16% on year to 1.27 mln tn, according to SEA. Edible oil imports were at 1.25 mln tn in January against 1.07 mln tn a year ago, and for Nov-Jan the edible oil imports stood at 3.61 mln tn, as against 3.49 mln tn year-on-year. In January, import of crude palm oil was at 407,620 tn, as against 767,836 tn during the same month last year. As on Feb 1, 654,000 tn of edible oil was at ports, against 657,000 tn a year ago, while 1.21 mln tn was in the pipeline, against 1.13 mln tn during the same period last year.
- The government cut agriculture cess on crude palm oil and extended the lower customs duty on edible oils by six months till Sep 30 to cool domestic prices. The government cut Agriculture Infrastructure and Development Cess on crude palm oil to 5.0% from 7.5%, a finance ministry notification said. The Centre had in October slashed import duty on key edible oils till Mar 31. This has now been extended till Sep 30, the notification said.
- Soymeal exports in January fell sharply by 68.2% on year to 100,000 tn, the Soybean Processors Association of India said in a release. During Oct-Jan, soymeal exports slumped to 362,000 tn from 1.0 mln tn a year ago, the release said. In January, soymeal production fell to 519,000 tn from 998,000 tn a year ago, while during Oct-Jan, output was at 2.2 mln tn, lower than 3.7 mln tn during the same period a year ago. Soybean arrivals in spot markets were pegged at 800,000 tn in January, down from 1.2 mln tn last year. During Oct-Jan, arrivals declined to 4.8 mln tn from 6.4 mln tn during the same period last year. By the end of January, mills, traders, and farmers were left with around 8.4 mln tn of soybean stock.
- The government will implement a comprehensive scheme to increase domestic production of oilseeds to reduce the country's dependence edible oil imports, according to the Union Budget presented by Finance Minister Nirmala Sitharaman in the Lok Sabha.
- Farmers have sown mustard across 9.16 mln ha in the country, up 25.3% on year, in the ongoing 2021-22 (Jul-Jun) rabi season as of Friday, according to the farm ministry's data. The government fixed the minimum support price of the crop at 5,050 rupees per 100 kg for the 2022-23 (Apr-Mar) marketing season, as against 4,650 rupees in the previous year.
- The Solvent Extractors' Association has urged the Centre and the Securities and Exchange Board of India to resume futures trade in mustard seed on the National Commodity and Derivatives Exchange.
- In its January report, the US Department of Agriculture has scaled down its estimate for global soybean production in 2021-22 to 372.6 mln tn from 381.8 mln tn pegged in the previous month's report. The lower estimate is largely attributed to a decline in output in South American countries, including Brazil. The department lowered the soybean production estimate for Brazil for 2021-22 by 5 mln tn to 139 mln tn because of dry weather conditions in south Brazil in December. The estimate for global ending stocks for 2021-22 has been scaled down to 95.2 mln tn from 102 mln tn pegged the previous month. The global soyoil production estimate for 2021-22 has been revised downwards to 61.3 mln tn from 61.6 mln tn. Similarly, the global soyoil export estimate for 2021-22 has been revised marginally lower to 12.5 mln tn from 12.7 mln tn estimated the previous month. Also, the estimated global soymeal output for 2021-22 has been revised downwards to 255.9 mln tn from 257.6 mln tn, according to the report. The estimate for global exports of soymeal in 2021-22 has been cut marginally to 69.9 mln tn from 70.8 mln tn in December. According to the report, global oilseed production in 2021-22 is seen lower at 619.2 mln tn against 627.6 mln tn pegged in December, due to a decline in soybean output in Brazil. Global vegetable oil output in 2021-22 is estimated at 213.9 mln tn, against a projection of around 215.0 mln tn in December.
- The Solvent Extractors' Association has urged the government to exempt soyoil from genetically-modified labelling requirement as it may lead to a rise in prices, it said in a letter. Last year, according to reports, the Centre had asked states to enforce separate labelling for genetically-modified soyoil to help consumers make informed decision.
- The Centre has included soymeal under the Essential Commodities Act with immediate effect till Jun 30 to regulate production, stocking, and distribution of the commodity.
- The government has reduced the basic import duty on refined, bleached, and deodorised palm oil, to cool domestic prices, the finance ministry said in a notification. The new duty rates will be in place till Mar 31, the ministry said. The effective basic import duty on refined, bleached, and deodorised palm oil has been reduced to 12.5% from 17.5% earlier. With the new duty cut, the duty difference between crude palm oil, which is a raw material, and refined, bleached, and deodorised palm oil, which is the finished product, has reduced to 5.5% from 11.0% earlier.
- The Securities and Exchange Board of India asked exchanges not to launch new contracts of some farm commodities, including those of soybean and its derivatives, and crude palm oil. The restrictions come into effect immediately and shall be applicable for one year.
- The Central Organisation for Oil Industry and Trade has estimated India's mustard output in the 2021-22 (Jul-Jun) rabi season at 10-11 mln tn because of increase in acreage, it said in a release. In 2020-21 the country produced around 8.5 mln tn of mustard, which is a crucial oilseed sown in the rabi season during Sep-Oct and harvested from February.
- India's 2020-21 (Jul-Jun) mustard output is seen rising 22.6% on year to 8.95 mln tn, according to a joint survey by the Central Organisation for Oil Industry and Trade and the Mustard Oil Producers' Association.
- The government reduced the effective import duty on CRUDE PALM OIL to 8.25% from 24.75%, and the effective import duty on REFINED SOYOIL to 19.25% from 35.75%
- India's soybean acreage in the 2021-22 (Jul-Jun) kharif season remained unchanged at 12.2 mln ha, agri ministry.
- The government allowed the import of 1.2 mln tn of genetically-modified soymeal till Oct 31 to augment supply in domestic markets, the Directorate General of Foreign Trade said in a notification.
- Malaysia's crude palm oil output fell 13.5% on month to around 1.3 mln tn in January, data from the Malaysian Palm Oil Board showed. Export of palm oil in January fell nearly 19% on month to 1.2 mln tn, and those of outbound shipments of biodiesel rose sharply by 91.5% on month to 29,375 tn. The total palm oil stocks in the country decreased 3.9% on month to around 1.6 mln tn as of Jan 31.
- Malaysia's palm oil exports during Feb 1-20 were estimated at 818,293 tn, up 29% on month, data by cargo surveyor AmSpec Agri Malaysia showed.
- Acreage under oil palm in north-eastern states is likely to increase by 50-60% by 2025 depending on the availability of seedlings, a farm ministry source said.
- Indonesia's crude palm oil output is expected to rise 2.6% next year to 51.01 million tonnes from a 2021 estimate of 49.71 million tonnes, head of the Estate Crop Fund Eddy Abdurrachman said.

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near-term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

**Trading Strategy based on EMA**

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.

**Intraday and Overall view** The section is consist of both Intraday and Overall view. The Intraday view is calculated by netting out of POSITIVES/NEGATIVES/FLAT signals formed in the short term trend. On the another part, Overall view is calculated by netting out number of POSITIVES/NEGATIVES/FLAT signals formed in the short, Medium and long term trend.

**Volatility** is a measure for dispersion of price of a financial instrument over a period of time by using Standard deviation and annualised actual volatility. Standard deviation is used to calculate one day volatility. Whereas, Annualized Actual Volatility (AAV) is measured as annualized standard deviation of the continuously compounded daily returns of the asset. Generally the thumb rule is that, higher the volatility higher the risk of the asset. See the table below the range risk ratings.

Annualised Volatility >	Risk %	Ratings	Risk %	Ratings	Risk %	Ratings	Risk %	Ratings	Risk %	Ratings
>	> 35%	Very High risk	27 to 34%	High risk	20 to 26%	Moderate risk	11 to 19%	Low risk	1 to 10%	Very Low risk

## GENERAL DISCLOSURES & DISCLAIMERS:

### CERTIFICATION

I, Anu V Pai, employees of Geojit Financial Services Limited (GFSL), author of this report, hereby certify that all the views expressed in this research report (report) reflect my/ our personal views about any or all of the subject issuer or securities/ commodities.

### DISCLAIMER

This report has been prepared by GFSL and the report & its contents are the exclusive property of GFSL and the recipient cannot tamper with the report or its contents in any manner and the said report, shall in no case, be further distributed to any third party for commercial use, with or without consideration.

GFSL has taken steps to ensure that facts in this report are based on reliable information but cannot testify, nor make any representation or warranty, express or implied, to the accuracy, contents or data contained within this report. It is hereby confirmed that wherever GFSL has employed a rating system in this report, the rating system has been clearly defined including the time horizon and benchmarks on which the rating is based. Descriptions of any Commodity or Commodities mentioned herein are not intended to be complete and this report is not, and should not be construed as an offer or solicitation of an offer, to buy or sell any commodity or other financial instruments. GFSL has not taken any steps to ensure that the commodity/(ies) referred to in this report are suitable for any particular investor. This Report is not to be relied upon in substitution for the exercise of independent judgment. Opinions or estimates expressed are current opinions as of the original publication date appearing on this Report and the information, including the opinions and estimates contained herein, are subject to change without notice. GFSL is under no duty to update this report from time to time.

### RISK DISCLOSURE

Geojit Financial Services Limited and/or its Affiliates and its officers, directors and employees including the analyst/authors shall not be in any way be responsible for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. Investors may lose his/her entire investment under certain market conditions so before acting on any advice or recommendation in these material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. This report does not take into account the specific investment objectives, financial situation/circumstances and the particular needs of any specific person who may receive this document. The user assumes the entire risk of any use made of this information. Each recipient of this report should make such investigation as it deems necessary to arrive at an independent evaluation of an investment in the Commodity/(ies) referred to in this report (including the merits and risks involved). The price, volume and income of the investments referred to in this report may fluctuate and investors may realize losses that may exceed their original capital.

The investments or services contained or referred to in this report may not be suitable for all equally and it is recommended that an independent investment advisor be consulted. In addition, nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to individual circumstances or otherwise constitutes a personal recommendation of GFSL.
