Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI Listing Regulations, we wish to inform that 'India Ratings & Research' ("Ind-Ra") has re-affirmed the rating/outlook of Bank's Debt instruments (Basel III Tier 2 Bonds, Infrastructure Bonds and Non-Convertible Debt Instruments) amounting to ₹ 17,928 crore at '**IND AA+/Stable**'.

A detailed Rating Rationale for the above is enclosed herewith.

Request you to take the above on record.

Thanking you,

Yours faithfully,

For **IDFC FIRST Bank Limited**

**Satish Gaikwad**

**General Counsel and Company Secretary**

*Encl.: as above*

## India Ratings Affirms IDFC FIRST Bank’s NCDs, Bonds and Tier 2 Debt at ‘IND AA+’/Stable

Dec 09, 2025 | Private Sector Bank

India Ratings and Research (Ind-Ra) has affirmed IDFC FIRST Bank Limited’s (IDFCFB) debt instruments’ ratings as follows:

### Details of Instruments

Instrument Type	Date of Issuance	Coupon Rate	Maturity Date	Size of Issue (billion)	Rating assigned along with Outlook/Watch	Rating Action
Infrastructure bonds#	-	-	-	INR95.20	IND AA+/Stable	Affirmed
Non-convertible debenture*	-	-	-	INR4.08 (reduced from INR81.64)	IND AA+/Stable	Affirmed
Basel III Tier 2 debt*	-	-	-	INR80	IND AA+/Stable	Affirmed

\*Details in Annexure

#unutilised

### Analytical Approach

Ind-Ra continues to take a standalone view of IDFCFB to arrive at the ratings.

### Detailed Rationale of the Rating Action

The affirmation reflects IDFCFB’s continued franchise expansion, its experienced management, stable liability franchise, diversified product portfolio and improved capital buffers. The ratings, however, remain constrained by higher operating expenditure and credit cost, which have been impacting the bank’s internal accruals, which remains on the lower side compared to higher or similar rated peers.

### List of Key Rating Drivers

#### Strengths

- Sizeable retail franchise with diversified product lines
- Funding profile has seen sizable retailisation
- Capital buffers see improvement with recent capital raise

#### Weaknesses

- Higher operating expense remains drag on internal accruals
- Asset quality needs monitoring with current challenges in unsecured segment

## Detailed Description of Key Rating Drivers

**Sizeable Retail Franchise with Diversified Product Lines:** IDFCFB's retail, rural and small and medium enterprises (SME) book accounted for 80% of the total funded exposure in 2QFY26 (2QFY25: 83%). The bank intends to continue focusing on maintaining the current mix of its overall loan portfolio, with sustained focus on retail and SME loans, thereby driving its granular loan portfolio. This increased retailisation has helped the bank maintain its margins, considering its cost of funds are higher compared to larger banking peers. IDFCFB's net interest margin moderated to 5.59% in 2QFY26 (2QFY25: 6.2%) because of a decrease in the proportion of unsecured loans, including microfinance book, and the impact of sharp changes in the repo rate. The share of microfinance (MFI) loans in the overall loan book moderated to 2.7% in 2QFY26 (2QFY25: 5.6%) due to the current challenging operating environment. The bank has availed credit guarantee funds for micro units (CGFMU) cover for all its incremental microfinance loan disbursements since January 2024 and reached a coverage level of 77% of the MFI loan book by September 2025, which would aid recovery over FY27-FY28. The bank has been witnessing a recovery in growth in the corporate segment, largely in the emerging corporates and financial institutions segment, and this is likely to continue in the medium term, supported by the bank's strategy.

**Funding Profile Has Seen Sizable Retailisation:** IDFCFB's top 20 deposits-to-total deposits increased to 8.34% in 2QFY26 (FY25: 7.95%; FY24: 10.6%), thereby improving its overall granularity, in line with its peers. The current account saving account (CASA) ratio remained largely stable at 50.1% in 2QFY25 (2QFY25: 48.9%). In 2QFY25, IDFCFB's CASA deposits accounted for 43.6% (2QFY25: 40.5%) of the total liabilities (deposits + borrowing) and it has been on an improving trend compared to the industry. While the bank's cost of funds has moderated from the historical levels, its borrowing cost is likely to remain relatively high compared to its peers in the medium term, due to its higher share of borrowings in total liabilities, which have been moving down and are being replaced with retail deposits. As part of its strategy, the bank plans to maintain its higher saving rate until there is a moderation in the share of borrowings in the overall funding, post which there could be a reduction in the peak saving rate, providing a benefit.

**Capital Buffers See Improvement with Recent Capital Raise:** IDFCFB's capital buffers improved in 2QFY26, with its common equity tier-1 (CET1) ratio rising to 14.75% post the conversion of CCPS raised (FY25: 13.2%; FY24: 13.4%). The bank has shown the ability to raise capital at frequent intervals; this would continue to aid its growth until the growth in internal capital generation exceeds loan growth. The bank raised INR75 billion in 2QFY26 (2QFY25: INR32 billion), and this along with the recent merger of IDFC Limited led to an accretion of INR6.18 billion to the overall capital base. The capital raise provides adequate cushion. The guided growth being higher than the internal accruals would lead to higher absorption of capital, necessitating a capital raise in FY27 to maintain adequate capital buffers over the regulatory minimum, in line with similarly rated peers.

**Higher Operating Expense Remains Drag on Internal Accruals:** Despite the scaling up of its loan book, IDFCB's return ratios have moderated as the credit cost has remained elevated, primarily due to the microfinance industry crisis, which impacted its net interest margin and led to higher operating expense requirements. The return on assets stood at 0.4% in 1HFY26 (FY25: 0.5%; 1HFY25: 0.6%), with growth of 19.7% yoy in funded assets. IDFCFB's cost-to-income ratio (1HFY26: 70.9%; FY25: 71.8%) remains higher than that of its peers, largely due to slower growth in income, resulting from the reduction in high-yielding loan book, though the bank has substantially reduced the operating expense growth despite its investments for branch expansion, addition of manpower across product lines, and technology spends. Also, incrementally, as the bank lends more towards secured assets and better-rated borrowers with current calibration in unsecured lending, it could curtail margin expansion, though it would also reduce the operating expense growth, thereby neutralising the impact on the cost-to-income ratio in the medium term. Furthermore, the availability of leeway in the reduction of deposit cost could mitigate this impact on net interest margins. As per Ind-Ra, the improvement in internal accruals would be driven by a reduction in funding cost, higher loan growth calibrated with modest operating expense growth, and control and moderation in the overall credit cost, which remains a monitorable.

**Asset Quality Needs to be Monitored with Current Challenges in Unsecured Segment:** IDFCFB's overall gross non-performing assets (NPAs) remained flattish at 1.86% in 1HFY26 (FY25: 1.87%; FY24: 1.88%), with the provision coverage ratio rising to 72.2% (72.3%, 68.8%). The credit cost of average funded assets (annualised) remained elevated at 246bp for 1HFY26 (FY25: 249bp; FY24: 128bp), leading to a moderation in internal accruals. The credit cost was higher than the guided levels primarily because of the provision done in microfinance loan exposure; excluding this, the credit cost stood at 203bp. The management has guided to maintain overall credit cost for FY26 within 210bp, which remains a key monitorable. With the microfinance book reducing, incremental stress emanating from it would moderate, which could lead to normalisation of credit cost in 2HFY26.

Moreover, the share of the top 20 borrowers in terms of the overall advances fell to 4.47% in 2QFY25 (FY25: 4.89%, FY24: 5.66%). The bank's restructured book reduced to INR4.02 billion in 2QFY26, accounting for 0.15% of the funded exposure (FY25: 0.18%; FY24: 0.3%). Also, SMA 1 and SMA 2 as a percentage of retail, rural and MSME loans improved to 0.90% in 1HFY26 (FY25: 1.07 %). Incrementally, any pressure on borrowers' cashflows due to overleveraging or a broad economic slowdown, where the bank's ability to manage its asset quality is better than that of its peers, remain key monitorables.

## Liquidity

**Adequate:** IDFCFB's liquidity remained stable in 2QFY26, with its quarterly liquidity coverage ratio standing at 115% (FY25: 116.6%; FY24: 114%). Moreover, the bank's asset-liability tenure had minor gaps across shorter buckets at 2HFYE26. Also, it has 4.3% of net demand time liabilities as an excess statutory liquidity ratio, which provided an adequate buffer to meet its short-term funding requirements at 2QFYE26.

## Rating Sensitivities

**Positive:** A substantial improvement in the franchise size and scale, large granular retail funding in line with higher-rated banks, consistent profitability buffers and return ratios, maintaining stable through-the-cycle asset quality and stronger capital buffers could be key positive rating drivers.

**Negative:** The following events that could individually or collectively lead to a negative action:

- higher-than-expected credit costs or a weakening of the provision cover or diluted tangible capitalisation buffers.
- CET1 buffer falling and remaining below 12.5% on a sustained basis; and
- a material decline in the pace of granularisation of deposits in its funding mix or a sustained reduction of market share in advances or deposits

## About the Company

Incorporated on 21 October 2014, IDFCFB is a new-age private sector bank. IDFCB received a banking license on 23 July 2015, and it commenced banking operations on 1 October 2015. IDFCB later merged with Capital First Ltd to form IDFC FIRST Bank in December 2018. The recently announced merger of IDFC Financial Holding Company with IDFC Ltd and IDFC Ltd with IDFCFB has dissolved the promoter holding. Post the merger of IDFC Limited, the President of India's shareholding stands at 9.11%; the remaining stake remains diversified across public, financial institutions and foreign investors.
