Dear Sir/Madam,

Sub.: Press Release

Please find enclosed the press release titled “Tata Power Renewable Energy Limited secures 120 MWh BESS Battery Energy Storage Purchase Agreement from NHPC Limited for Kerala State Electricity Board Limited”.

This is for your reference and records and is disclosure in terms of the requirements of Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Yours Sincerely,
For **The Tata Power Company Limited**

Tata Power Renewable Energy Limited secures 120 MWh BESS Battery Energy Storage Purchase Agreement from NHPC Limited for Kerala State Electricity Board Limited

- This is the Company's first Battery Energy Storage Purchase Agreement (BESPA)
- Project to support grid stability and energy transition goals in Kerala

National, July 18, 2025: Tata Power Renewable Energy Limited (TPREL), a subsidiary of The Tata Power Company Limited, one of India's leading renewable energy players, has **signed its first Battery Energy Storage Purchase Agreement (BESPA)** with **NHPC Limited (NHPC)**.

The project, secured under NHPC's BESS Tranche-I tender through a competitive bidding route for Kerala State Electricity Board Limited being the end user of the Battery Energy Storage System (BESS) asset, involves setting up a 30 MW / 120 MWh battery storage system at the 220 kV substation in Area code, Kerala.

The project will play a vital role in addressing peak power demand, enhancing grid flexibility, and enabling seamless integration of renewable energy in Kerala. It is part of NHPC's broader initiative to develop 125 MW / 500 MWh of standalone battery storage capacity in the state of Kerala, under a Tariff-Based Competitive Bidding framework supported by Viability Gap Funding.

The initiative supports the Government of India's goal of achieving 500 GW of non-fossil fuel capacity by 2030. Implemented under Ministry of Power guidelines, the project will operate under a 12-year BESPA. The project is slated for commissioning within 15 months, positioning storage as a key enabler of round-the-clock renewable power and grid resilience.

In addition to this upcoming project, TPREL is already operating a Solar and BESS project in Rajnandgaon, Chhattisgarh. This project comprises a 100 MW solar photovoltaic plant integrated with a 120 MWh utility-scale BESS, developed under an EPC contract awarded by the Solar Energy Corporation of India Limited.

The project with NHPC marks TPREL's first win in the standalone BESS segment, reinforcing its commitment to delivering cutting-edge, dispatchable, and sustainable energy solutions. With this addition, TPREL's total renewable capacity now stands at approximately 10.9 GW, including 5.6 GW of operational projects, comprising 4.6 GW of solar and 1 GW of wind, and 5.3 GW under various stages of development.

About Tata Power:

The Tata Power Company Limited, a leading integrated power company and a part of the Tata Group, India's largest multinational business conglomerate, owns a diversified portfolio of 15.7 GW. This portfolio spans the entire power value chain, from renewable and conventional energy generation to transmission, distribution, trading, storage solutions, and solar cell and module manufacturing. As a pioneer in India's clean energy transition, Tata Power has 6.9 GW of clean energy generation, constituting 44% of its total capacity. Committed to achieving carbon neutrality before 2045, Tata Power has successfully partnered with public and private entities across India's generation, transmission, and distribution sectors, serving approximately 12.8 million customers nationwide.
