L&T and Holtec Partner to Strengthen Heat Transfer Solutions for Nuclear Power Sector

Mumbai, November 03, 2025: The Heavy Engineering business vertical of L&T today signed a Memorandum of Understanding (MoU) with the US-based nuclear energy solutions provider Holtec International's Asia arm, to offer design & build solutions for Heat Transfer Equipment.

L&T is already into a partnership with Holtec for global deployment of SMR-300 (Small Modular Reactor) designed by Holtec. This is supported by the prestigious 810 Authorisation granted to L&T by the US's Department of Energy. The latest MoU builds upon this partnership.

The strategic collaboration will combine L&T's world-class nuclear manufacturing capabilities and Holtec's pioneering design expertise, to deliver cutting-edge solutions for nuclear and thermal power plants worldwide, especially Heat Transfer Solutions for conventional power plant island and balance of plant.

Together, L&T and Holtec will drive the development of reliable, resilient technology that can optimise thermal regulation, maximise cycle efficiency and ensure reliable operation of power plants, thus contributing to global energy transition.

Commenting on the partnership, **Mr Anil Parab, Whole-time Director & Senior EVP - Heavy Engineering & CE & IPDD, L&T, said:** "Post the COVID pandemic, energy security emerged as a strategic need, with more than 32 countries having committed to triple their nuclear power generation capacity. Our partnership with Holtec is a key strategic move to fast-track efficient energy systems and shape a sustainable energy future for both India and the world".

Background:

Larsen & Toubro is a USD 30 billion Indian multinational enterprise engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
