PRESS RELEASE

Tata Communications Drives Pan-India launch of BSNL eSIM Services

Enabling millions of BSNL mobile users across the country to access seamless connectivity through next generation eSIM technology

Mumbai, INDIA, 1st October 2025 – [Tata Communications](#), a leading global communications technology player, today announced the successful deployment of its digital infrastructure solutions to power Bharat Sanchar Nigam Limited's (BSNL) newly launched eSIM services for millions of subscribers across India.

Tata Communications is powering BSNL's eSIM services through its state-of-the-art, GSMA-accredited eSIM Subscription Management platform – Tata Communications MOVE™ – delivered by Tata Communications Collaboration Services Private Ltd. (TCCSPL), a wholly owned subsidiary of Tata Communications Ltd. This platform will enable BSNL to facilitate eSIM provisioning for their pan-India mobile subscribers.

The launch of BSNL's eSIM services is a big step towards enhancing customer experience and future proofing mobile connectivity in India with increased convenience, flexibility and security in cellular services. Powered by Tata Communications MOVE™, BSNL eSIMs will enable remote provisioning of 2G/3G/4G connectivity service through a secure QR code, eliminating the need for a physical SIM. Moreover, users with devices supporting dual-SIM functionality can use an eSIM alongside a physical SIM, making it easier to securely connect with any local operator while travelling abroad.

A.S. Lakshminarayanan, MD and CEO, Tata Communications, said: “We are honoured to partner with BSNL to bring secure, scalable, and future-ready eSIM services to millions of citizens and enabling India's shift towards next-generation connectivity. This collaboration reflects Tata Communications' commitment to driving digital innovation and supporting sovereign infrastructure. Together, we are laying the foundation for a more connected and resilient India.”

A Robert Ravi, Chairman and Managing Director, BSNL said: “The launch of Pan-India eSIM service represents a strategic advancement in our national telecom capabilities. With Tata Communications' strong connectivity experience and forward-looking innovation, we are enhancing the flexibility, security, and efficiency of mobile services for citizens across India. It aligns with our commitment to fostering digital independence and ensuring robust infrastructure for the future.”

This partnership fosters Tata Communications' commitment to support the Government's vision of Digital India. While currently the launch is focussed on consumers, the Tata Communications MOVE™ platform is designed to scale for enterprise IoT applications supporting digital transformation of Indian enterprises.

**Forward-looking and cautionary statements**

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports.

The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
