L&T and GA-ASI Announce Strategic Partnership for MALE RPAS Manufacture in India

Mumbai, October 31, 2025: L&T and the US-headquartered General Atomics Aeronautical Systems, Inc. (GA-ASI) have entered into a strategic partnership to manufacture Medium Altitude Long Endurance (MALE) Remotely Piloted Aircraft Systems (RPAS) in India, for the Indian armed forces.

GA-ASI, a global leader in advanced unmanned aerial systems, brings decades of operational expertise, L&T brings extensive engineering, precision manufacturing and system integration capabilities in defence and aerospace.

L&T and GA-ASI together will deliver the combat-proven MALE RPAS platforms, manufactured entirely in India. This program incorporates critical technology transfers and fulfilling indigenous content requirements aligned with Government of India's *Atmanirbhar Bharat* and Make in India initiatives.

Under this partnership, L&T will participate in the upcoming 87 MALE RPAS programme of the Ministry of Defence, where L&T will be the prime bidder and GA-ASI the technology partner. The collaboration will enable the production of GA-ASI's MQ-series RPAS that are combat proven. These are widely operational across the globe with millions of flight hours in surveillance and strike missions.

The partnership marks a significant milestone in India's pursuit of a self-reliant defence ecosystem, strengthening Indo-US defence collaboration and fostering a competitive, globally integrated aerospace manufacturing base.

Commenting on the development, S N Subrahmanyam, Chairman & Managing Director, L&T, said: "This partnership offers India a unique opportunity to manufacture state-of-the-art unmanned platforms indigenously. We are proud to join hands with GA-ASI, a recognised world leader in this domain, and are confident that this alliance will significantly enhance India's defence capabilities and advance self-reliance in aerospace technologies".

Dr Vivek Lall, Chief Executive, General Atomics Global Corporation, said: "We are honored to serve the Indian market in partnership with Larsen & Toubro, a trusted and capable leader in India's defence sector. This collaboration exemplifies our commitment to supporting India's vision for self-reliance and indigenous manufacturing in aerospace. By combining GA-ASI's proven technology with L&T's robust manufacturing expertise, we aim to deliver cutting-edge MALE RPAS solutions that will enhance the operational readiness of the Indian armed forces and contribute to a strong, sustainable defence ecosystem in India".

About L&T

L&T is a USD 30 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focussed approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

About GA-ASI

General Atomics Aeronautical Systems, Inc., is the world's foremost builder of Unmanned Aircraft Systems (UAS). Logging more than 9 million flight hours, the Predator® line of UAS has flown for over 30 years and includes MQ-9A Reaper®, MQ-1C Gray Eagle®, MQ-20 Avenger®, and MQ-9B SkyGuardian®/SeaGuardian®. The company is dedicated to providing long-endurance, multi-mission solutions that deliver persistent situational awareness and rapid strike.
