Dear Sirs,

Sub.: Suzlon wins its FY26 largest order of 838 MW from Tata Power Renewable Energy.

This is to inform that Suzlon wins its FY26 largest order of 838 MW from Tata Power Renewable Energy. The press release in this regard is attached herewith.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

Geetanjali S.Vaidya,
Company Secretary.

Encl.: As above.

For Immediate Release | 16th September 2025

Suzlon wins its FY26 Largest Order of 838 MW from Tata Power Renewable Energy

Two Indian pioneers join forces to power 24/7 clean energy with innovative, “Made in India” wind solutions

Key Highlights of the Order

2 nd Largest Order till date	3 rd Order with Tata Power	266 Made in India S144 WTGs (3.15 MW) to be supplied	838 MW project to be executed across 3 states
--	--	--	---

Pune, India: Suzlon Group, India’s no.1 wind energy solutions provider, today announced that it has secured its FY26 largest order of 838 MW with Tata Power Renewable Energy Limited (TPREL), one of India’s largest renewable energy company, as part of its Firm and Dispatchable Renewable Energy (FDRE) project. This is also Suzlon’s second-largest order ever, following the 1,544 MW order from NTPC Green Energy, and demonstrates the growing role of FDRE projects in accelerating India’s energy transition.

As India accelerates its transition to round-the-clock, grid-stable clean power, FDRE wind-dominant systems are emerging as a transformative solution to meet the nation's ambitious clean energy goals. This collaboration highlights the synergy between Suzlon's next-generation technology and Tata Power's vision for scalable, grid-integrated clean energy, showcasing the power of "Made in India" innovation to deliver reliable and efficient power solutions.

The 838 MW project will comprise 266 of Suzlon's S144 wind turbines, each with a rated capacity of 3.15 MW, strategically located across Karnataka (302 MW), Maharashtra (271 MW), and Tamil Nadu (265 MW). The project is part of the FDRE bids awarded to SJVN and NTPC.

Girish Tanti, Vice Chairman, Suzlon Group, said, *"As Tata Power Renewable Energy embarks on a strategic transformation to achieve 100% clean power by 2045, we're proud to support this ambitious journey with our advanced, 'Made in India' wind technology. Our partnership, spanning over a decade and marked by the third repeat order, underscores our shared commitment to India's energy transition. We share a deep-rooted vision of creating innovative energy solutions that are not only reliable and cost-efficient but also designed to seamlessly integrate with India's One Grid system."*

JP Chalasani, Chief Executive Officer, Suzlon Group, stated, *"TPREL is a discerning partner that demands the highest standards of technology, reliability, and execution. They set benchmarks that push the entire industry forward, ensuring wind plays its rightful role in delivering round-the-clock, dispatchable clean power at scale. The fact that Suzlon continues to be their partner of choice reflects our ability to align with this vision through proven, 'Made in India' innovation and execution excellence."*

About The Suzlon Group

The Suzlon Group is a leading global renewable energy solutions provider, with 21+ GW* of wind energy capacity installed across 17 countries. Headquartered at Suzlon One Earth in Pune, India, the Group includes Suzlon Energy Limited (NSE: SUZLON, BSE: 532667) and its subsidiaries. A vertically integrated organisation, Suzlon has in-house R&D centres in Germany, the Netherlands, Denmark, and India, and world-class manufacturing facilities across India. With 30 years of operational excellence and a diverse workforce of 8,100+ employees, Suzlon is India's No. 1 Renewable Energy Solutions company, having an installed base of 15.2 GW of assets and an additional ~6 GW installed outside India. Its portfolio includes the advanced 2.x MW and 3.x MW series of wind turbines.

**Global installations of Suzlon-manufactured wind turbine generators. Data as of 30th June 2025*
