### L&T wins STATCOM and SCADA orders (Large\*) with growing emphasis on Grid stability and resilience

**Mumbai, September 17, 2025:** The Power Transmission & Distribution (PT&D) business vertical of L&T has won grid infrastructure orders in India and abroad. The orders include Distribution SCADA and Dynamic Reactive Power Compensation devices.

In India, the order pertains to revamping power distribution with SCADA and smart technology integration in two towns. Jobs pertaining to distribution transformer station and conversion of overhead electrical lines into underground cabling are also in the scope.

In UAE, the order pertains to design, delivery and construction of two  $\pm 300$  MVar STATCOM systems. These will be installed at the existing 400 kV substations for dynamic reactive power compensation. STATCOM provides automated and instantaneous response to deter system fluctuations, and the power quality improves as it injects or absorb reactive power in real time, thereby stabilising the voltage.

Another order has been received from Oman for establishing a 400/132 kV grid station, along with associated 400 kV transmission line segment.

These orders reinforce L&T's commitment to building future-ready grid infrastructure that supports energy transition and sustainability goals of its valued customers.

#### Background:

Larsen & Toubro is a USD 30 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

#### \* Project Classification

Classification	Significant	Large	Major	Mega	Ultra-Mega
Value in ₹ Cr	1,000 to 2,500	2,500 to 5,000	5,000 to 10,000	10,000 to 15,000	> 15,000
