PRESS RELEASE

Tata Communications to Power India's GST Ecosystem with Digital Fabric of Solutions

Mumbai, INDIA, 29th September 2025 – [Tata Communications](#), a leading global communications technology player, today announced that it has been awarded a strategic project to deliver a comprehensive digital infrastructure - spanning network fabric, IoT, cloud, and security, with unified management across domains - for the Goods and Services Tax Appellate Tribunal (GSTAT) benches established by the Ministry of Finance, Government of India. This multi-crore, prestigious win reinforces Tata Communications' position as a trusted technology partner for mission-critical national initiatives.

GSTAT is a dedicated appellate tribunal to adjudicate GST related disputes with principal bench in New Delhi and 31 state benches. This initiative directly supports the Government's vision to reduce legal friction, simplify taxation, and enhance investor confidence.

Tata Communications will deliver a secure, scalable, and intelligent digital fabric of solutions for the GSTAT. The state-of-the-art infrastructure – spanning LAN, WAN, SDWAN, video conferencing, cloud services, and advanced security – will underpin the tribunal's operations.

The initiative will automate operations, strengthen transparency, and significantly enhance efficiency, by enabling predictive analytics and chatbots, creating a resilient and future-ready digital ecosystem. This integrated infrastructure will empower the tribunal to:

- Accelerate and streamline end-to-end operations of GSTAT
- Ensure seamless access across all GSTAT benches nationwide
- Safeguard tribunal's data transfer and ensure operational security
- Deliver a simplified and frictionless user experience

By modernising how stakeholders will engage with GSTAT, the project will enable the GSTAT to meet their vision and foster greater trust in India's GST framework.

Sumeet Walia, Executive Vice President and Chief Sales & Marketing Officer, Tata Communications, said: "We are honoured to partner with the Ministry of Finance and be entrusted with building and managing the digital backbone for GSTAT, a reformative institution in India's taxation landscape. This collaboration underscores our commitment to leveraging cutting-edge technology, deep domain expertise, and our customer-centric approach to strengthen India's digital governance ecosystem. With enhanced transparency and secure infrastructure for institution like GSTAT, which facilitate resolution for taxpayers, this project aligns perfectly with our purpose of supercharging progress and innovation and with the Government's vision of Digital India."

Tata Communications' selection for this high-impact initiative reflects its unmatched blend of deep domain expertise, technology leadership, and commitment to security and compliance. With a strong record of executing transformative projects of national importance, Tata Communications

continues to play a key role in building the foundational digital infrastructure envisioned under Digital India.

**Forward-looking and cautionary statements**

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports.

The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
