# Margins continue to improve...

Tech Mahindra's (TechM) revenues increased 2.8% QoQ in constant currency terms (above our estimate of 1.6% QoQ in CC terms) mainly led by 4.5% QoQ growth in communication revenues and 2.7% QoQ growth in Enterprise revenues. The company also reported a healthy expansion in EBITDA margins (up 156 bps QoQ to 19.6%) mainly led by higher utilisation and gross margin expansion. The order book improved 8.1% QoQ to US\$455 million.

### 5G, digital, large deal wins to drive growth

The company reported healthy growth on the communication and enterprise side. Going forward, TechM expects communication to witness improved IT spends led by 5G, digital, customer experience, Al, cloud and network operations. The company is seeing healthy deal wins in 5G (north of US\$50 million) and is also seeing traction in small & medium size deals. In addition, from the enterprise side, TechM is seeing improving demand from artificial intelligence, machine learning, cybersecurity, customer experience and automation. The company is also seeing traction in 5G related deals on enterprise side across Middle East, Europe & Africa. TechM indicated a deal pipeline of US\$4.5 billion on enterprise side. This, coupled with pruning of low return geographies, acceleration in Europe and improving demand from large lift & shift deals, bodes well for longer term trend in revenues. Hence, although we expect revenues to be under pressure in FY21E, we expect an improved performance in FY22E & FY23E.

# Margins to witness gradual improvement

EBIT margins in the quarter improved 173 bps to 15.9%. Going forward, the company expects margins to achieve higher end of 14-15% margin band in FY22E. TechM believes that despite headwinds (like higher variable pay, staggered wage hike lower utilisation & travel cost) it has multiple levers in terms of sustaining and improving margins. Some levers are synergies in portfolio companies (like systems, back-end and process), automation, reduction of sub-contracting cost (from current 13%) higher offshoring, pruning of low return geographies and benefits of large deal won in the previous quarter. Hence, we expect EBIT margins to improve 217 bps YoY to 13.8% in FY21E and another 150 bps in FY21E-23E to 15.3%.

### Valuation & Outlook

Increase in large lift & shift deals, digital technologies, improving 5G spend (on communication & enterprise side), large deals and acceleration in Europe bode well for the company's revenue growth. This, coupled with improving margin trajectory and attractive valuation prompt us to be positive on the stock. Hence, we maintain BUY with a revised target price of ₹ 1,120 (16 x PE on FY23E EPS) (earlier target price was ₹ 1,105).

### Key Risk

- Lower than expected growth in vertical communication adversely impact financials
- We expect the company to register healthy improvement in margins led cost rationalisation, synergies in portfolio companies, automation and reduction of sub-contracting cost. However, if the company realises lower than expected cost savings it could adversely impact our margin expectation
