Macro headwinds lead to earnings cut

- Dixon's Q1FY23 revenue/EBITDA missed our estimates by 7%/15%. The sharp fall in the TV realizations led to 30% yoy revenue decline. Forex loss of Rs120mn dented operating performance. EBITDA margin was 3.5% vs. 4.0% in Q4FY22.
- The washing machine segment continued to deliver strong topline growth, driven by new customer wins and higher wallet share from an anchor customer. Though margin print should improve from Q2, the full benefits of benign commodity prices should reflect in Q3.
- In the wake of the macro weakness, management has lowered FY23 volume guidance for TV to ~3.6mn from 4mn. While the slowdown in the lighting segment has led to a 7% cut in FY23 topline. Management expects revenue normalization in lighting to start from Q4.
- We reduce our FY23-25 revenue estimates by 4-11% with higher cut in TV and non-mobile PLI revenue for FY23. We also lower our EBITDA assumptions for the same period by 3-11%. Maintain Hold with a revised Jun'23 TP of Rs3,860 (41x Jun'24E EPS).

Weak quarter: Revenues rose by 53% yoy to Rs28.6bn. Revenue growth was seen in all business segments, except for TV. The Mobile+EMS and Home appliances segments remained as the key revenue growth driver. Since Q4FY22, weak demand (flat volumes yoy) and a sharp correction in open cell prices have impacted the TV business. Lighting revenues were down 24% qoq due to muted demand and lower realizations stemming from heightened competitive intensity. Gross margin expanded by 170bps yoy but was stable qoq. EBITDA was up 109% yoy on a low base. EBITDAM were down 50bps qoq as it had the impact of Rs120mn forex loss. PAT increased by 151% yoy but declined 28% qoq to Rs455mn.

Outlook: Muted demand trends have led to a moderation in TV and lighting segment revenue guidance. Further, smartphone sales in the domestic market have also been weak. If this trend continues, it could also impact the mobile business growth in ensuing quarters. Amid these negatives, the positives are a strong order book visibility in washing machines and ramp-up in PLI segments. Management expects lighting revenue to recover in Q4FY23. The benefits of benign commodity prices should start to accrue from Q3FY23 as the company still has some high-cost inventory in the ODM segment. Potential large customer addition in the mobile segment, export opportunities in lighting, and realization of the full potential of PLI schemes (other than mobile) should provide confidence about strong earnings growth which is already reflected in our estimates. We continue to note that execution of various PLI-enabled business segments, scale-up in lighting exports and margin recovery are key to sustaining Dixon's premium valuations. **Key risks:** adverse currency movements and continued commodity price increases; customer losses and execution challenges; weak end-consumer demand; rise in competitive intensity in the contract manufacturing space; and adverse ruling against Xiaomi in the ongoing ED case.

Con-call highlights

Management said the progression toward achieving the revenue guidance of Rs170bn+ could be adversely affected by the current business environment. However, it maintained 4% EBITDA margin guidance. Forex loss was Rs120mn in Q1FY23.

Consumer electronics: Volume grew marginally yoy, while realizations dipped due to a decline in open cell prices (60-65% of BoM). Management does not expect further price erosion in open cell prices, though. ***The company is looking for exports with an anchor customer to the South-east Asian markets. It is also in advanced stages of discussions to close an agreement with Google for Android rights. FY23 volume target is 3.5-3.6mn vs. 3mn in FY22.***

- **Monitor:** The production for Dell started in April. Discussions with Samsung are ongoing and the deal is expected to be closed in 2-3 months.
- **Margin:** Improvement should be driven by increasing proportion of manufacturing and ODM/JDM solutions.

Lighting: Demand is recovering but normalization is expected in Q4FY23. ***Dixon received the first export order from the UAE market and is working on an RFQ for a US-based customer.*** Management is confident about concluding the discussions with a potential European customer for exports in Q2 itself.

- **Margins:** Component prices have started to cool off and its benefits should reflect from Q3. The competitive intensity has increased. The company had high-cost inventory in Q1, which impacted margins. Price erosion happened due to intense competition.
- The company has undergone a reorganization of senior-level management. It is also looking to acquire a lighting technology company (in the smart lighting domain) to strengthen its portfolio. This company has Bluetooth mesh technology and can develop Wi-Fi based technology as well.

Home Appliance: Monthly volumes stand at 20k units in the Fully Automatic (FA) category. The company is in the final stages of winning an order from a Japanese company for FA WMs.

- The order book is strong with new customer wins and higher wallet share from an anchor customer. In FY23, the company is expected to deliver 1.5-1.6mn units of Semi-Automatic WMs. For FA WMs, the target is 0.27mn units in FY23.
- **Margins:** Benign commodity prices should support margin improvement in the ensuing quarters. It should improve to 9% in the coming quarters.

Mobile: Motorola's monthly run-rate of 400k units/month was achieved in Q1 (lower than earlier expectations as production in April was impacted by the shutdown in China and overall slowdown). The order book is now for 500k units from Q2. The target is to reach 5-5.5mn units for Motorola and the company is also looking at some backward integration.

- Dixon started manufacturing feature phones for Nokia and is looking for additional smartphone volumes in the upcoming quarters. ***The company is confident about closing a deal with one large customer in the domestic market in Q3FY23.***
- The smartphone order book from Samsung stands at 2-2.5mn units per month and the company is trying for additional volumes as the feature phone business is expected to moderate significantly from Dec'22.
- The company is targeting revenues of Rs65-70bn in FY23. Margins are expected to improve from Q2-Q3FY23.

Telecom: Started manufacturing ONT for Airtel. The company has received a large order for STBs.

IT hardware: The company is in the final stages to close a deal with one of the large brand for tablets and motherboards for its notebooks. The manufacturing is likely to start in Q4FY23.

RAC PLI: The RAC PCBA facility is operational in Noida. Management believes that huge export opportunities can be tapped using this facility.

Wearables and Hearables: The company is manufacturing 0.5mn units/month and is in the process of ramping it up to 1.5mn units per month.

Refrigerator: Started the construction of the refrigerator plant in Noida and the machinery has been ordered. The company is in the final stages of closing a deal with a customer for 0.6mn units out of the total 1.2mn capacity

Capex: FY23 capex would be Rs3.1-3.2bn (incl. the potential acquisition of a lighting tech company).

Balance sheet: Net debt was Rs1.3bn at Q1FY23-end, while gross debt was Rs4.9bn. Bill discounting in Q1FY23 was Rs2.2bn. **Mobile PLI incentive (Dixon' part not shared with customer) accounted in Q1 was Rs10mn and Rs100mn in H1CY22.**
