----------------	-------------------	---------------------------	--------------------------------------	------------------------------	--

Synopsis:

Wipro Ltd (WPRO) Q1FY23 performance was lower than our estimate. Dollar Revenue was marginally up 0.5% QoQ in CC term to USD 2,736mn (KRChoksey est. USD 2,769Mn). Rupee revenue grew by 3.2%QoQ to INR 215,286Mn (KRChoksey est. INR 213,752Mn). Reported operating margin was down to 14.3% QoQ as the several initiatives were taken by the company to turn around the operations. Company reported a net profit of INR 25,636Mn with margin of 11.9%. Operational efficiencies (several levers such as utilization, fresher intake, pricing, sub-contracting, attrition & employee pyramid) in the next quarter will offset the impact of wage hikes but remains a higher chance of margin dilution due to Rizing integration. Increase in employee costs (including Products & ISRE business), rising procurement cost of hardware/software, increase in doubtful debt provisioning, higher travel/marketing expenses and increase in facility expenses are likely to keep margins under check in the near term. Our target price of INR 471 is based on 18x Mar-24E EPS with EPS CAGR of ~10.2% over FY22-24E.

Weak organic growth; led by telecom, consumer & BFSI

Dollar Revenue was marginally up 0.5% QoQ in CC term to USD 2,736mn (KRChoksey est. USD 2,769Mn). Rupee revenue grew by 3.2%QoQ to INR 215,286Mn (KRChoksey est. INR 213,752Mn), supported by growth in consulting and engineering services. Sequential growth performance was led by consumer (+5% QoQ CC) & BFSI verticals (+2.4% QoQ CC), which grew above the company average, while manufacturing declined sequentially. Digital engineering and application grew faster (+3.5% QoQ) than iCORE. In IT Services, EBIT margin fell 200bp QoQ to 15% due to lower utilization and higher investments in employees. The management guided that revenue to grow at a pace of 3-5% QoQ in Q2FY23 and double-digit USD revenue growth for the whole years. Macro concerns may play as a potential threat to both growth and profitability for consulting as it contributes over +10% of the topline. As of now management see no immediate impact but expects a slowdown on overall client spend on the industry in H2FY23 along with its recent acquisitions (Capco & Rizing) which may drag the consulting margin for a prolonged period which remains the key concern on the stock price.

Tailwind in mega deals; showed strength in deal wins/pipelines

Wipro closed 18 large deals, resulting in a TCV of USD 1.1bn in Q1FY23, indicated no slowdown in consulting business and had a strong order intake in Capco. Renewal component remains low. Overall TCV of deals grew by 32% YoY and was broad based. ACV was up by 18% YoY. Continued investment in large deals has helped increase the deal TCV. Pipeline is at an all-time high and has a mix of small, medium and large deals. Traditional deals are under pricing pressure while transformation-led deals witnessed better margins.

Margin requires payoff from investments

Management has clarified that they are expecting an improvement in margin in Q2 as it shifts the full impact of the wage hike to Q3FY23. EBIT margin stood at 14.3% and we expects Wipro to deliver the margin below the medium term guidance level due to increase in attrition & wage hike and unfavorable pricing environment. Wipro continues to invest heavily on talent and capabilities.

Wipro Limited.

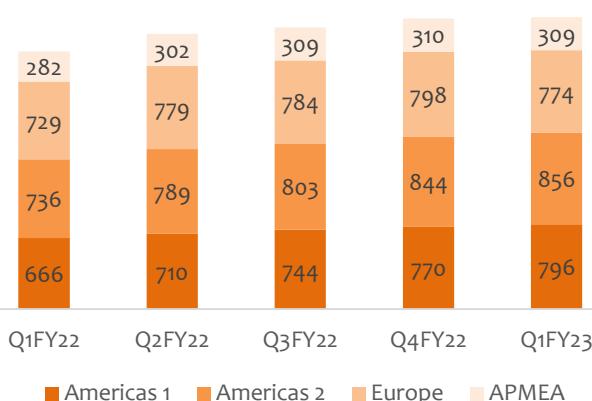

Key Concill Highlights:

(i) Organic growth witnessed softness in deal wins; BFSI, Consumer and Telecom Verticals are the key revenue drivers for the quarter (ii) Wipro won 18 large deals in Q1FY23; strong deal bookings/highest ever deal pipelines and elevated hiring validates the hypothesis of the near term good growth visibility (iii) Overall TCV of deals grew 32% YoY and ACV grew by 18% YoY. Deals were across verticals/geographies and the proportion of the deal wins are mostly new deals (iv) No near-term impact of weak macro environment on IT spending outlook of clients. No signs of slowdown in Europe. Clients are reprioritizing their budgets with more emphasis on cost efficiency (v) Capco revenues are currently not facing risk from slowdown/recessionary scenario given high demand for digital transformation (vi) Management has suggested that margin has bottomed out at 15% (vii) Wipro added +15k employees (Net) and on-boarded > 10k fresher in Q1 and has targeted acceleration of fresher addition in FY23 and has rolled out promotions effective from Jul'22 and wage hike effective from Sep'22.

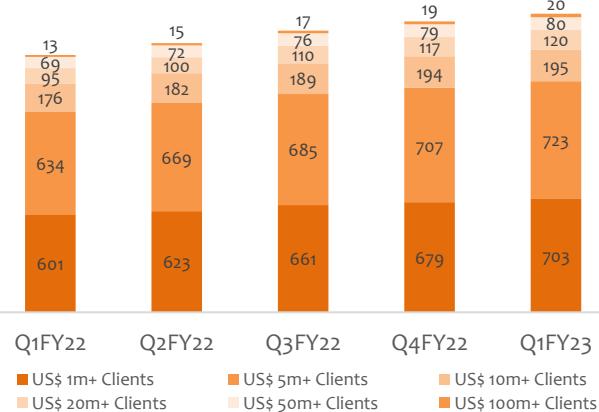

Valuation and view

Wipro is currently trading at a valuation with a P/E multiple of 18.3x/15.8x on FY23E/FY24E earnings. We expect a lower margin in the near term due to various headwinds along with protracted recovery in topline especially after execution of a difficult turnaround/managing large/recent acquisitions which has increased the risk profile of the business in the medium term. Hence we are assigning a P/E multiple of 18.5x to the FY24 estimated EPS of INR ~26.2 to arrive at a target price of INR 471 (Earlier Target price INR 602) per share, an upside of 14.1% over the CMP. Accordingly, we reduce our view to "ACCUMULATE" rating for the stock.
