SPICES COMPLEX

Market Buzz

- NCDEX Turmeric futures jumped to 13-year high on robust demand and expectation of fall in acreage on Wednesday. Coriander futures too inched higher on firm demand, while profit booking continued in jeera futures, though it stayed in the vicinity of record highs.
- India's export of spices in the year ended March declined 8.3% on year to 1.4 million ton, according to data from the Spices Board India. However, in value terms, exports rose 4.7% to 317.6 billion rupees in 2022-23. While exports of most spices fell, those that registered a rise included turmeric, garlic and coriander. Garlic exports rose 159% on year to 57,346 ton in 2022-23. Exports of cumin declined 14% on year to 186,509 ton in 2022-23, while turmeric exports rose 11% on year to 170,085 tn. India exported 54,482 ton of coriander in 2022-23, up 12%, the data showed. Exports of small cardamom declined 30% on year to 7,352 ton and large cardamom fell 5% on year to 1,884 tn. Exports of chilli in 2022-23 declined 7% on year at 516,185 ton, while pepper fell 18% to 17,958 ton, according to the data.
- According to Gujarat government's third advance estimates released, jeera production is estimated to fall 9.3% on year to 200,780 tn. Gujarat is the second-largest producer of the commodity.
- Coriander production is seen to rise 81% on year to 376,090 tn in Gujarat, according to the state government's third advance estimates.

TECHNICAL VIEW

JEERA NCDEX AUG	Choppy trades with a mild positive bias expected. However, a direct fall below 58000 may call for profit booking.	
DHANIYA NCDEX AUG	Even as there prevails mild positive bias, dips to 7220/7140 ranges seems possible.	
TURMERIC NCDEX AUG	More upsides are in store, however, dips to 12630/12500 ranges may not be ruled out as well.	

Market Buzz

- The US Department of Agriculture has projected global cotton production in 2023-24 (Aug-Jul) to rise by 120,000 bales to 116.84 mln bales. The rise in output is on account of larger crops in Pakistan and Afghanistan, offsetting the reduced outlook for Australia and Argentina. Opening stocks of 2023-24 are seen higher by 1.1 mln bales at 94 mln bales due to higher production in 2022-23 over India and Brazil. Cotton production in India and Brazil in 2023-24 is seen steady at 25.5 mln bales and 13.2 mln bales, respectively. However, production in Pakistan is seen higher by 600,000 bales at 6.5 mln bales. The agency has projected global cotton consumption in 2023-24 to decline by 550,000 bales to 116.45 mln bales as reduced consumption in China, Bangladesh, Turkey, and Vietnam offset improved prospects for Pakistan. Consumption in India and Brazil is estimated to be steady at 24.5 mln bales and 3.3 mln bales, respectively. While in Pakistan it is projected to rise by 200,000 bales to 10.0 mln bales. The USDA has projected cotton exports from India in 2023-24 to decline by 200,000 bales to 2.2 mln bales from the previous month's projections. Cotton ending stocks in India is seen higher at 11.9 mln bales in 2023-24, up from the previous projection of 11.2 mln bales, the report said.
- Sowing of kharif crops have made good progress so far as rainfall over the country has picked up in the last one week. As of Friday, farmers have sown crops across 20.3 million ha in the 2023-24 (Jul-Jun) kharif season, which is slightly higher than 20.2 million ha sown in the corresponding period last year. So far, the total area under cotton is 4.0 million ha against 4.7 million ha a year ago.
- The Cotton Association of India scaled up its estimate for the country's cotton production in the current season ending September to 31.12 mln bales (1 bale = 170 kg) from 29.84 mln bales projected last month. Last year, cotton production in the country was at 29.92 mln bales, according to the association. Total supply of cotton in the country after factoring in imports is seen at 35.02 mln bales for the current season, up from 34.52 mln bales projected last month. Total supply was estimated at 38.50 mln bales in the 2021-22 season, the association said. On Jul 10, the crop association convened for a national committee meeting in Mumbai with all stakeholders, state associations, exporters, importers and others to discuss the crop estimate and the cotton balance sheet. "The meeting discussed the state-wise pressing data provided by each state association and other inputs by stakeholders," the association said in a release. The association sees domestic consumption of cotton by mills for the current season ending September at 28.0 mln bales, unchanged from the previous month's estimate. In the 2021-22 season, consumption was estimated at 29.3 mln bales. Total demand for cotton in the country, including non-mill consumption, is projected at 31.10 mln bales, unchanged from the previous projection. Further, the committee estimated all-India cotton pressing at 30.39 mln bales as of June-end, the release said.

Market Buzz

- The National Agricultural Cooperative Marketing Federation of India has purchased 2.34 mln tn chana under the price support scheme in its ongoing rabi procurement operations, the agency said in a tweet. The agency said 1.02 mln farmers benefitted from the procurement and a sum of 125.10 bln rupees was paid to them. The government has set the minimum support price for chana at 5,335 rupees per 100 kg for the 2023-24 rabi marketing season. In this round of procurement, the agency purchased chana in Telangana, Gujarat, Andhra Pradesh, Karnataka, Maharashtra, Madhya Pradesh, Uttar Pradesh, and Rajasthan, it said. Madhya Pradesh recorded the highest procurement at 797,205.88 tn, followed by Maharashtra and Gujarat at 773,650.09 tn and 328,582.41 tn, respectively.
- According to the third advance estimate released by the farm ministry, pulses output is seen at 27.5 mln tn in the ongoing crop year, as against 27.3 mln tn in the previous year. Chana output for 2022-23 is pegged at 13.5 mln tn largely unchanged from 2021-22. Tur output is seen at 3.4 mln tn compared with 4.2 mln tn in the final estimate of last year.
- Agriculture and Agri-Food Canada has scaled down its estimate for chickpea prices in Canada for 2022-23 (Aug-Jul) to \$1,035 per tn from \$1,165 per tn projected in February. It has also lowered its estimates for mustard seed prices to \$2,365 per tn from \$2,525 per tn projected last month. In its March report, the farm agency said the average price of mustard seed is forecast to fall, but remain historically high due to expectations of increased carry-out stocks in Canada. The estimate for overall supply of chickpeas in Canada is unchanged from last month at 328,000 tn. The agency has also kept exports of chickpea steady at 200,000 tn. Similarly, estimates for overall supply and exports of mustard seed are unchanged at 177,000 tn and 115,000 tn, respectively. The agency left its price estimates for lentils, dry beans and dry peas unchanged from last month at \$800 per tn, \$1,165 per tn and \$460 per tn, respectively. Canada is one of the biggest exporters of lentils to India. Agriculture and Agri-Food Canada is responsible for policies governing production, processing and marketing of farm, food and agri-based products in Canada.
- According to 2nd Advance Estimates released by farm ministry, pulses output is seen at 27.8 mln tn in the ongoing crop year, as against 27.3 mln tn in the previous year. Chana output for 2022-23 is pegged at 13.6 mln tn compared with 13.5 mln tn in 2021-22. Tur output is seen at 3.7 mln tn compared to 4.2 mln tn in the final estimate of last year.
- In the month of April 2023, India's guar split exports saw a jump of 16% to 3,500 tonnes at an average FoB of US\$ 1489 per tonne, as compared to 3,010 tonnes in the month of March '23 at an average FoB of US\$ 1,646 per tonne. However, the guar split shipments went down by 13% as compared to the same period last year. This month, China was the only importer of guar split. The Guar gum exports in the month of April 2023 dropped down by 14.6% to 16,219 tonnes at an average FoB of US \$1,455 per tonne as compared to 19,001 tonnes in the month of March 2023 at a FoB of US \$1,558 per tonne. Further, the gum shipments also went down by 15% in April '23 as compared to the corresponding year. Among the total exported quantity, Russia purchased approximately 3,349 tonnes, the USA bought 2,990 tonnes, China acquired 1,961 tonnes, and Germany imported 1,808 tonnes.

TECHNICAL VIEW

Market Buzz

- India's oilmeal exports fell 35% on year to 280,001 tn in June, data released by The Solvent Extractors' Association of India today showed. The fall in exports was primarily on account of lower shipments of mustard meal, rice bran meal and castor seed meal. In June, the country exported 140,506 tn mustard meal, significantly lower than 308,550 tn in the year-ago period. Exports of castor seed meal fell to 17,512 tn from 26,366 tn a year ago. However, exports of soymeal rose to 73,139 tn from 31,853 tn last year. The country's total oilmeal exports in Apr-Jun rose 20% to 1.2 mln tn. Exports of soymeal during the period rose 383% to 364,611 tn. However, during the quarter, the export of mustard meal fell to 620,738 tn from 706,906 tn in the year-ago period. In Apr-Jun, 285,032 tn oilmeals were exported from Kandla port against 408,665 tn a year ago. About 381,501 tn were exported from Mundra port against 246,400 tn last year. Exports from Mumbai port, including Jawaharlal Nehru Port Trust, in Apr-Jun were at 116,809 tn against 57,139 tn a year ago. Around 91,210 tn of oilmeals were shipped from Kolkata port compared with 108,619 tn a year ago, and 324,877 tn from other ports compared with 180,733 tn in the same period last year, the association said.
- India's vegetable oil imports rose sharply by 33% on year to 1.314 mln tn in June from 991,650 tn in the corresponding period last year, the Solvent Extractors' Association of India said. Vegetable oil imports in the first eight months of the oil year beginning November were at 10.5 mln tn as against 8.8 mln tn a year ago, marking a rise of nearly 20%. Meanwhile, edible oil imports for these eight months were at 10.4 mln tn as against 8.5 mln tn a year ago. The vegetable oil basket consists of edible and non-edible oils.
- The US Department of Agriculture has projected global oilseed output in 2023-24 (May-Apr) at 667.3 mln tn, lower from 671.4 mln tn forecast in June. Production of oilseed in the US has been scaled down by 5.6 mln tn to 127.6 mln tn this month, according to the agency's report. The agency has projected global soybean output at 405.31 mln tn, lower from 410.70 mln tn estimated in the previous forecast. Brazil's soybean crop is estimated at a record 163.0 mln tn, unchanged from last month, and Argentina's is seen at 48.0 mln tn, also unchanged, according to the report. The agency has estimated soybean production in the US at 117.0 mln tn, lower from 122.7 mln tn last month. Brazil is the world's top producer of soybean followed by the US and Argentina. "The U.S. season-average soybean price for 2023/24 is forecast at \$12.40 per bushel, up \$0.30 from last month," the agency said in its report. The estimate for global soybean production for 2023-24 has been further revised downwards this month to 62.1 mln tn from 62.4 mln tn projected in June. The estimate for global soybean exports in 2023-24, too, has been revised lower to 11.6 mln tn from 11.7 mln tn. The department projected global soymeal output for 2023-24 at 259.23 mln tn, down from 260.5 mln tn estimated last month. Soymeal is a derivative of soybean, manufactured by crushing the oilseed, and is mainly used in producing poultry feed.
- Farmers have sown soybean across 9.05 mln ha this kharif season so far, down 21% on year, according to a survey conducted by the Soybean Processors Association of India. According to the farm ministry, soybean acreage is 5.55 mln ha so far in the ongoing season. "We estimate that the total area under soybean this year may be slightly lower than last year because of delay in onset of monsoon and some minor shift to other crops," SOPA said.
- India's soymeal exports in June rose 31.6% on year to 50,000 tn, the Soybean Processors Association of India said. For Oct-Jun, soymeal exports increased to 1.57 mln tn from 564,000 tn a year ago. The 2022-23 kharif season began in October. Soymeal is primarily used as poultry and livestock feed. Indian soymeal is non-genetically modified and considered rich in protein. In June, production of soymeal rose to 602,000 tn from 539,000 tn a year ago. The output for Oct-Jun was 6.82 mln tn, up from 4.99 mln tn in the year-ago period, SOPA said. Soybean arrivals in spot markets totalled 800,000 tn in June, up from 500,000 tn last year. During Oct-Jun, arrivals rose to 9.9 mln tn from 7.5 mln tn in the year-ago period. By the end of June, mills, traders, and farmers were left with around 5.2 mln tn of soybean stock, the association said. Soybean, a kharif oilseed, is sown during Jun-Jul and harvested in Sep-Oct.
- The production of crude palm oil in Malaysia fell 4.6% on month to 1.45 mln tn in June, data from the Malaysian Palm Oil Board showed. Exports of palm oil in June rose 8.6% on month to 1.17 mln tn, while those of biodiesel fell 4.7% on month to 12,927 tn, the data showed. Palm oil is also used to make biofuel. Total stocks of palm oil in the country rose 1.9% on month to 1.72 mln tn as of June end, highest since February. Malaysia is the world's second-largest producer of crude palm oil, and India is the largest consumer of edible oils in the world.
- The National Agricultural Cooperative Marketing Federation of India has purchased 755,472 tn of mustard seeds under the price support scheme in its rabi procurement operations, the agency said in a tweet. As many as 325,213 farmers benefitted from the procurement and 41.17 bln rupees was paid to them, the agency said. The government has set the minimum support price for mustard at 5,450 rupees per 100 kg for the 2023-24 rabi marketing season, against 5,050 rupees per 100 kg last year. In this round of procurement, the National Agricultural Cooperative Marketing Federation of India purchased mustard in Haryana, Gujarat, Rajasthan, Uttar Pradesh, and Madhya Pradesh. In its third advance estimate, the government has pegged India's mustard production in the 2022-23 (Jul-Jun) crop year at 12.5 mln tn, against 12.0 mln tn in the previous year.
- The Department of Food and Public Distribution has asked domestic oil producers' associations to ensure that the maximum retail price of major edible oils is cut further by 8-12 rupees per ltr with immediate effect. Domestic edible oil associations informed the government they will further reduce retail prices at a meeting convened by the Department of Food and Public Distribution Secretary Sanjeev Chopra Friday. The government convened the second meeting with domestic oil producers' associations including the Solvent Extraction Association of India and the Indian Vegetable Oil Producers' Association to discuss further reduction in retail prices of edible oil amidst the fall in global prices. It was discussed in the meeting that the international prices of imported edible oils are continuing on a downward trend and the edible oil industry needs to ensure that the prices in the domestic market also drop commensurately. The associations informed that the global prices of different edible oils have fallen by \$150-\$200 per tn in the last two months and there is an element of time lag for reflection in the retail markets and the maximum retail prices are soon expected to drop further. Some major brands have cut the prices of refined sunflower and refined soybean oil by 5-15 rupees per ltr after a meeting with the department earlier. Similar reduction has been done in mustard oil and other edible oils as well. The reduction in oil prices came in the wake of reduction of international prices and reduced import duty on edible oils making them cheaper. The associations were then advised to ensure that the entire benefit of the reduced international prices be passed on to consumers invariably.

Trading signals is prepared based on statistical analysis and is purely on technical indicators like exponential moving averages (EMAs), Relative strength Index (RSI) and stochastic, putting altogether provides an idea about intraday, short, medium and long term trend of the commodities. It also signals the risk of an investment in both agricultural and global commodities as well. Based on all listed indicators above, investors were able to fix a daily, near-term and long term trends. However, must be cautious especially for real-time intraday traders/jobbers.

Trading Strategy based on EMA

Trading strategies mentioned in the report is mainly based on 3, 5, 13, 22, 45 & 60 days exponential Moving Averages. 3 and 5 day EMA has taken for developing Intraday trading strategy, 13 days and 22 days EMA for Short term and Medium term, while 45,60 days EMA for Long term. Here, we use EMAs for POSITIVE and NEGATIVE signals. POSITIVE signal is formed when a short-term moving average (eg: 30 day) crosses from below a longer-term average (eg: 60 day), which is considered bullish. Likewise, NEGATIVE signal is formed when a short-term moving average (eg: 30 day) crosses from above a longer-term moving average (eg: 60 day), which is considered bearish.

Intraday and Overall view The section is consist of both Intraday and Overall view. The Intraday view is calculated by netting out of POSITIVES/NEGATIVES/FLAT signals
