

Demerger to enhance focus on respective businesses

Auto & Auto Ancillaries ▶ Company Update ▶ March 4, 2024

TARGET PRICE (Rs): 950

TTMT's board approved the proposal to demerge the company into two separate listed entities, viz a) CV and its related investments and b) PV, including India PV, EV, JLR, and related investments. This comes across as a logical progression of separate reporting of the CV and India PV financials run by their respective CEOs (since 2021). We believe this signifies management's confidence that the two businesses can operate independently with self-sustaining cash flows. While we do not envisage major fundamental changes (as both businesses were run independently), we upward revise our SOTP-based TP marginally to Rs950 (vs. Rs925 earlier) as we factor in 10% premium multiple to TTMT's CV business (vs AL IN) for potential pure-play optionality on CVs with higher scale. Downgrade to REDUCE as recent run-up leaves limited upside.

Demerger to help in better capitalizing on the respective opportunities with greater accountability

Management believes this demerger will help the company to better capitalize on the opportunities provided by the respective segments/companies by enhancing its focus and agility. This will also lead to a superior experience for customers, better growth prospects, and enhanced value for shareholders. The demerger will be implemented through an NCLT scheme of arrangement and all shareholders of TML shall continue to have identical shareholding in both the listed entities. The NCLT scheme of arrangement for the demerger shall be placed before the Board of Directors for approval in the coming months and will be subject to all necessary shareholder, creditor, and regulatory approvals, which could take 12-15 months to complete.

Demerger signifies management's confidence in generating sufficient FCF to operate independently

We believe this development signifies management's confidence that the two businesses (CVs and PVs) will continue to operate independently with greater agility and self-sustaining cash flows (particularly the PV business). Historically, while the CV business has been generating healthy cash flows, the PV business has witnessed challenges in consistent cash flow generation due to its high spending on product development and the re-building phase in its market positioning.

Upgrade TP, but downgrade to REDUCE on recent run-up and limited upside

While we do not envisage major changes in the fundamentals due to this demerger (as the two businesses were operating largely independently with separate reporting and their respective CEOs), we revise our SOTP-based TP upward to Rs950 (vs. Rs925 earlier) to factor in 10% higher multiple for the CV business to 10x EV/EBITDA vs 9x earlier (~10% premium to pure-play CV player Ashok Leyland) for potentially pure-play on CVs with higher scale and market share gains.
