# All eyes on inventory liquidation; the moat remains unchanged

We recently had an interaction with Mr. Deepanjan Bandyopadhyay, the CFO of Page Industries (PAGE), to gain insight into industry trends and PAGE's long-term growth drivers. Please find below our key meeting takeaways along with our perspective on the business:

# Demand revival - a key monitorable

- According to our interaction with the management, the demand pressures appear to be stabilizing, and there should be a gradual recovery. However, the timing of full recovery remains uncertain, especially in normalizing the inventory levels. Industry demand is crucial during April to June as it will assist in reducing the high inventory levels. We will monitor the demand recovery in the next 60-90 days. Our initial checks suggest that the recovery has been marginal during the last 3-4 weeks. Within the high-channel inventory, no price hike is expected though yarn prices have experienced some inflation in the last few months.
- PAGE reported about 5% YoY decline in revenue during the last five quarters. It has slightly reduced its channel inventory, but inventory levels still exceed the desired levels. We are still awaiting more clarity on the near-term demand recovery. However, we expect that after a weak FY24 performance, the channel inventory should be normalized post-1QFY25.

# **Building a strong foundation for success**

- PAGE's business moat lies in its focused approach to its core innerwear business, emphasizing innovation, quality, and R&D to stay ahead. PAGE upholds the aspirational value of the 'Jockey' brand, while being mindful of customer price points and refraining from excessive discounts.
- PAGE stands out by manufacturing its products in-house, with 15 manufacturing units predominantly located in Karnataka and Tamil Nadu. Over 80% of production is conducted in-house, allowing meticulous oversight of the entire manufacturing process.
- PAGE strategically expanded its distribution network across India through various channels, including multi-brand outlets (MBOs), exclusive brand outlets (EBOs), large format stores (LFS), and ecommerce platforms. With over 1,13,688 MBOs and 1,390 EBOs serviced by 4,170+ distributors, PAGE has a wide reach spanning 2,750+ cities and towns. The company has seen rapid growth in EBOs, achieving an 18% CAGR over the past five years. Implementing a direct channel distribution model, PAGE ensures exclusivity on shelf space and maintains efficient cash conversion cycles through strong supply chain control.

Research Analyst: Pratik Prajapati (Pratik.Prajapati@MotilalOswal.com) | Tanu Jindal (Tanu.Jindal@MotilalOswal.com)

■ PAGE has among the most efficient cash conversion cycles in the innerwear market. The company gradually reduced its inventory days to 59 in FY22 from 101 in FY17. Due to weak demand in 2HFY23 and FY24, the company's inventory has piled up but it is still less than the peers. However, we expect inventory days to reduce due to PAGE's Automated Replenishment System (ARS). The ARS is a distributor management system that will improve the supply chain and help in having a better quality inventory, which will improve the inventory turn of distributors.

The company spends ~3% of sales on A&P and plans to increase its marketing spending to drive business growth. PAGE is also very particular about its capital allocation, investing primarily in core projects with a minimum threshold of 20% RoCE. Additionally, management maintains a high dividend payout ratio of over 50%.

#### **Our view**

- PAGE continues to experience a weakness in growth amid subdued demand in the apparel industry. Weak demand has resulted in excess inventory at channel partners. Management is taking several initiatives to optimize channel inventory. The industry is expected to continue facing demand-led headwinds in the near term.
- Margins of innerwear companies were affected by increased discounts and volatile raw material prices. Additionally, companies had to increase advertising and promotion (A&P) expenses to stimulate volume growth, which affected operating margins. However, with demand showing signs of improvement, management indicated that the contraction in operating margins has ceased. PAGE is witnessing a gradual inventory adjustment towards an optimal level. This will increase full-priced sales, thus improving margins.
- Raw material prices spiked during 2020-22, but since then, prices have softened. Although raw material prices have increased recently, they are still within a broad range. We expect stability in raw material prices to continue. We model a 55-56% gross margin during FY25/FY26.
- We expect PAGE's revenue to grow at 14% CAGR over FY24-26, with an EBITDA margin of ~20% (close to its long-term average).

#### Valuation and View

- PAGE has had a remarkable track record of revenue and earnings growth over the past decade. For the decade ending FY24E, PAGE's sales/EBITDA/PAT are likely to post a 15%/14%/15% CAGR despite a challenging period. Earnings growth was fueled by best-of-breed sales growth, coupled with reduced utilization of the margin lever.
- We model a gradual recovery with sales/EBITDA/PAT CAGR of 14%/17%/18% over FY24-26E.
- The industry is likely to continue facing demand-led headwinds in the near term. Additionally, it will be crucial to monitor the channel inventory optimization. Though efficient cost-control measure is a positive sign, earnings outlook is still uncertain. We reiterate our Neutral rating on the stock with a TP of INR36,500 (premised on 50x Mar'26E EPS).

# **Outlook and recent trends**

■ Long-term category growth potential intact: The innerwear category forms ~8% of India's domestic apparel industry and it is growing at a rapid pace. According to industry estimates, the innerwear category is likely to clock a 10% CAGR to reach USD107b in 2025 from USD67b in 2020. This growth will be fueled by favorable demographics (a higher proportion of youth population, etc.) and rising income levels, which will further increase the share of branded products.

- Weak growth over the last five quarters; PAGE reports 5% revenue decline:

  The innerwear and athleisure segments witnessed a healthy demand recovery post-Covid, but a higher supply-demand ratio led to an escalation in channel inventory. Due to high channel inventory, the primary growth was weak. PAGE reported a 5% revenue contraction in the last five quarters.
- Recent trend marginally positive; still uncertain about a meaningful near-term recovery: According to our discussion with the management, demand pressures appear to be stabilizing, and a gradual recovery is expected. However, the timing of full recovery remains uncertain, especially in normalizing the inventory levels. Industry demand is crucial during April to June as it will assist in reducing the high inventory levels. We will monitor the demand recovery in the next 60-90 days. Our initial checks suggest that the recovery has been marginal during the last 3-4 weeks. Within the high-channel inventory, no price hike is expected though yarn prices have experienced some inflation in the last few months.
- Outlook: PAGE reported about 5% YoY decline in revenue during the last five quarters. It has slightly reduced its channel inventory, but inventory levels still exceed the desired levels. We are still awaiting more clarity on the near-term demand recovery. However, we expect that after a weak FY24 performance, the channel inventory should be normalized post-1QFY25. We model 12% and 15% revenue growth in FY25 and FY26, respectively.

# **Innerwear category**

■ Men's innerwear: This category contributes 7% to the overall men's wear category, with the industry size close to USD2b in FY20. The industry is projected to grow at more than 10% over the medium term.

- PAGE's target consumers are close to 180m (>INR0.5m annual income). On average, they purchase four items per year, consisting of two bottoms and two tops. It generates a total market size of 720m pieces per year. In this total addressable market (TAM), PAGE commands a 20% market share.
- Despite the presence of several brands in the innerwear market, branded products still hold a small market share. PAGE has a 20% market share in men's innerwear. The target universe can grow at 10-11% in volume, 3% in realization mix, and 3% in price hike in the medium term. Therefore, sustainable revenue growth for PAGE can be 16-17% for men's innerwear in the medium term. Lux, Rupa, and Dollar combined contribute a 20% market share. The size of its comparable brand, Van Heusen, is small.

- Women's innerwear: The women's innerwear market is larger than the men's innerwear market, with the industry size of around USD4.5b in FY20. It is expected to grow at 14% CAGR over the medium term, especially in the premium segments.
- Although Jockey entered the women's wear segment later; it quickly gained momentum, outpacing the growth in men's innerwear. Black, white, and grey colors dominate, comprising 65-70% of the volume. Fashion innerwear, despite its popularity, presents inventory challenges due to lower stock turnover rates. Jockey's fashion innerwear constitutes ~10% of its total offerings.
- In the western market, Lovable dominates; Amante holds strong in the northern market, while Jockey stands out as the sole national brand. The brand loyalty is relatively low in women's wear, with consumers often preferring familiar channels. Overall, the women's innerwear market presents unique challenges compared to men's.

- Athleisure-wear: The Indian men's casual and activewear category size is close to ~USD8b in FY20 and is likely to clock a 14% CAGR; while women's casualwear category size is close to ~USD1b in FY20 and is expected to post a 16% CAGR over the medium term.
- The company offers a range of products across different categories, including loungewear (capris, pajamas, and boxers), casual wear (t-shirts), sportswear (track pants, shorts, muscle tees, socks), and thermal wear. Jockey holds a market share of 7-8% in the athleisure industry.
- Athleisure is a potentially high-growth business; therefore, the company is looking to reset the pricing strategy as the common perception is that it is slightly expensive.

16.1% over FY20-FY25

■ **Kidswear:** The Indian kidswear market is close to ~USD14b in FY20 and is expected to report a CAGR of 10%. The three major categories are uniforms, t-shirts/shirts, and bottomwear, which contribute 37%, 24%, and 18% of the overall kidswear market, respectively. The kids' denims segment is showing a rapid growth rate of 13% YoY.

# **Key growth drivers**

# In-house manufacturing - a key economic moat

Most of the Indian innerwear companies procure finished goods from third-party contractors, while PAGE, with more than 80% in-house production capacity (of 280m pieces per year), is well positioned to enjoy the benefits of in-house manufacturing. With its own setup, the company is able to monitor every stage of the manufacturing process, including designing, raw materials, production process, packaging, and final products. As of 9MFY24, PAGE had 15 manufacturing units (14 in Karnataka and 1 in Tamil Nadu), spread across 2.2m sqft. The company planned to establish a new plant in Odisha.

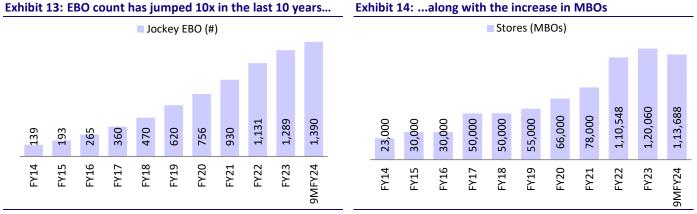

**Exhibit 12: Manufacturing units and location in India** 

Source: MOFSL, Company

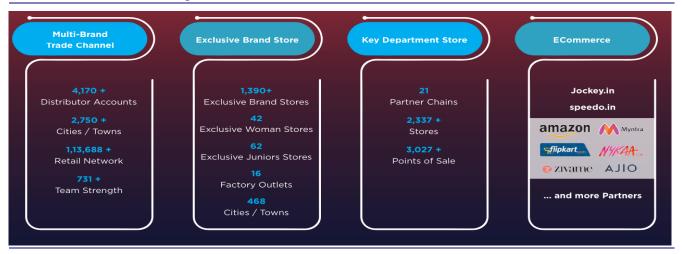

# **Retail footprint expansion**

- PAGE strategically expanded its distribution network across India through various channels, including multi-brand outlets (MBOs), exclusive brand outlets (EBOs), large format stores (LFS), and e-commerce platforms. This focused effort on distribution expansion has significantly contributed to robust growth. As of Dec'23, PAGE had 1,13,688 MBOs and 1,390 EBOs serviced by 4,170+ distributors. PAGE has a wide reach spanning 2,750+ cities and towns.
- The proportion of EBOs and online channels has been steadily increasing in recent years, despite the company's expansion into Tier 3 and Tier 4 towns. Jockey remains accessible in smaller centers due to its affordable pricing, although the product mix may not be as attractive compared to Metro and Tier 1 cities. Competition from brands, such as Rupa and Dollar, intensifies in these regions.
- PAGE has witnessed a faster CAGR in EBOs, at 18%, over the past five years.

Source: MOFSL, Company Source: MOFSL, Company

Exhibit 15: PAGE market coverage

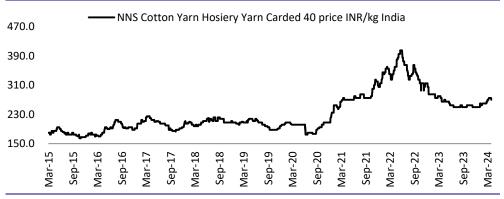

Source: MOFSL, Company

## **Headroom for margin expansion**

- Raw material prices spiked during 2020-22, but since then, prices have softened. Although raw material prices have increased recently, they are still within a broad range. We expect stability in raw material prices to continue. We model a 55-56% gross margin during FY25/FY26.
- Innerwear companies' margins were hit by higher discounts in the past few quarters. However, PAGE did not press the discount lever to drive volume. However, subdued demand and lower-than-expected revenue growth put pressure on PAGE's EBITDA margins. However, with demand uptick, the company will see a gradual inventory correction and settle to an optimum level. With stability in raw material prices, we believe PAGE will be able to sustain an EBITDA margin of ~20% for FY25E/FY26E.

# **Robust financial performance**

The strength of PAGE's business model is also reflected in its financials. However, in FY24, its performance was hit by subdued demand in the overall innerwear and athleisure markets. Despite a weak performance in FY24, PAGE delivered a CAGR of 15% in sales, 14% in EBITDA, and 15% in PAT over the FY14-24 period, which was characterized by challenging macro environment. The company has also posted a high-single digit volume CAGR in the same period.

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <a href="https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx">https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx</a>

MOFSL, it's associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

In the past 12 months, MOFSL or any of its associates may have:

- received any compensation/other benefits from the subject company of this report
- managed or co-managed public offering of securities from subject company of this research report, received compensation for investment banking or merchant banking or brokerage services from subject company of this research report, c)
- received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.
- . MOFSL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
- . Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.
- · Research Analyst may have served as director/officer/employee in the subject company.
- MOFSL and research analyst may engage in market making activity for the subject company.

MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:

a) a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.

(b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures. To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

#### Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement	Companies where there is interest

This report is distributed solely to persons who qualify as "Institutional Investors", of which some of whom may consist of "accredited" institutional investors as defined in section 4A(1) of the Securities and Futures Act of Singapore .Accordingly, if a Singapore person is not, or ceases to be, such an investor, they must immediately discontinue any use of this Report and inform MOCMSPL

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
