

PAG's Q3 EBITDA was 7-19% ahead of street/our estimates, largely led by 250-370bps better margin, as topline was 1-5% lower. Revenue growth moderated to 7% (vs 11% in Q2) due to muted demand environment. Demand commentary remained subdued, albeit growth trends may improve slightly as growth impact due to the ARS implementation is largely over. PAG attributed stronger margin to better Gross Margin (RM/sewing efficiencies) and cost savings, but expects EBITDA margin to remain in the 19-21% band, with higher IT/marketing spends hereon. Encouragingly, channel inventory is down by 5 days in 9M. Among channels, E-com/EBOs have led most of the growth, while physical channels have seen muted trends. We remain conservative due to uncertain trends/high valuation (65x 1YF), and maintain REDUCE with revised TP of Rs40,000 (-4%; 50x Dec-26E EPS). WC optimization (10 days) is encouraging but we would like to see sustained trends before building in a multiple re-rating.

Better GM/cost savings drive margin gains; demand remains muted: PAG saw moderation in topline growth to 7% (vs 11% in Q2), on ~5% volume growth. Realizations improved ~2.0%, led by premiumization and optical benefit of higher online market-place mix. Channel inventory improved by 5 days vs FY24-end and PAG expects complete bridging of gap between primary and secondary growth hereon. After a consolidation phase (Q1FY24-Q1FY25), the distribution expansion has started as MBO outlets inched up by ~2,500 in Q3, after ~3,000 additions in Q2. EBO additions have also picked-up with 49 additions in Q3 (vs 5 in H1). Gross margin was up by ~300bps to 56.3% amid stable yarn/cotton prices, higher online growth, and better sewing efficiencies. EBITDA margin at 23% was up by ~430bps, led by better gross margin and ~100bps saving in operating expenses. Despite the 21.6% EBITDA margin in 9M, PAG maintained its EBITDA guidance of 19-21% for FY25 and beyond, led by planned investments toward manpower, digital, and marketing.

Earnings-call KTAs: 1) PAG indicated that demand environment is sluggish, as there is no great improvement in LTL trends for the EBO channel (MoM); however, PAG exuded confidence that it is not losing market share across channels. 2) Among city tiers, Tier-3/4 regions are powering growth, led by both organic growth and distribution expansion, followed by Tier-1/2 and Metro towns; however, there is no significant difference in growth trends across regions. 3) 93% business for PAG is now on ARS (84% distributors), which is ensuring better availability of products and higher secondary sales. 4) Channel inventory for larger volume segments (Innerwear) has now been optimized, while there is still some scope to improve it for Athleisure, Junior, and Socks. Overall, in 9M there is a 5-day reduction in channel inventory (17.7mn pieces). 5) Medium-term growth should continue across categories, as market share is still low at 6% in Brassiers/Athleisure, 8% in Women IW, and 18% in Men's IW. 6) Athleisure has seen some revival in FY25, after some level of correction in FY24 on pent-up demand in FY23. 7) Among channels, e-com is growing the fastest, followed by EBOs, while GT is growing the slowest. 8) PAG highlighted that all categories have separate P&L, with separate sales, product, and marketing teams; EBITDA margin across categories is broadly similar. 9) PAG will have more clarity on FY26 price hikes after completion of ongoing budgeting exercise for FY26. 10) 2,000 sewing machines will be added across two new plants, which should suffice capacity requirement for the next 3 years; Orissa plant can work in 2 shifts and PAG will be getting state-level incentives on wages and other subsidies. 11) PAG plans to upgrade its ERP, DMS, and PLM softwares, which should prepare the organization for the next decade. 12) Inventory days have reduced to 59 vs 93 at FY24-end; Overall WC is at 65 days vs 75 days at FY24-end.
