DCX Systems Ltd.

Margin overhang overshadows future revenue growth

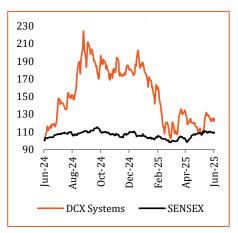

CMP	Target	Potential Upside	Market Cap (INR Mn.)	Recommendation	Sector
INR 310	INR 321	2.5%	INR 33,500	HOLD	Electronic- Component

Result Highlights of Q4FY25:

- DCX Systems' Q4FY24 results fell short of our expectations across all key metrics. Revenue stood at INR 5,500 Mn., down 26.3% YoY (+175.0% QoQ), sharply below our estimates (-32.2%). EBITDA came in at INR 102 Mn., down 73.0% YoY (+242.2% QoQ), sharply below our estimates (-66.7%) led by weaker revenue growth and contraction in gross margins. EBITDA margin contracted by 322bps YoY to 1.9%, below our estimates by 193bps. Net profit stood at INR 207 Mn., down 37.2% YoY (+ 106.8% QoQ), sharply below our estimates (-23.2%), led by weaker operational performance, partially offset by higher other income.
- We have revised our FY26E/FY27E EPS estimates by -25.8%/-13.6% respectively, to factor in persistent subdued gross margins stemming primarily from inability of the Company to raise an invoice for the excess bill of materials (BOM) supplied in the system integration segment. We believe, re-rating of the stock depends on improvement of the margin profile with expansion into higher-value and in-house developed products. We expect the Revenue/EBITDA/PAT to grow at 24.9%/314.4%/59.7% CAGR over FY25-27E.
- We value DCX at 36.0x FY27E EPS, implying a target price of INR 321. We downgrade our rating from "BUY" to "HOLD" on the stock.

Q4 performance impacted by persistent weaker gross margins

- DCX Systems reported a poor financial performance in Q4 FY25, with revenue falling 26.3% YoY INR to 5,500 Mn.
- EBITDA stood at INR 379 Mn., down 73.0% YoY, while net profit came in at INR 207 Mn., down 37.2% YoY. EBITDA margin contracted by 322bps YoY to 1.9%.
- Net Cash flow from operations stood at INR 4,435 Mn. supported largely by inflows from receivables and customer advances.
- Looking ahead, the company anticipates potential margin improvement led by robust order book of INR 28,550 Mn., which includes major orders from global players like Lockheed Martin and Elta Systems, and the strategic JV with Elta to manufacture radar systems under the 'Make in India' initiative, expected to become operational within 11 months.
- Additionally, inclusion under the RoDTEP scheme from June 2025 is expected to enhance export profitability. The company is transitioning from a build-to-print model to a product-based business, notably through NIART's railway safety systems, which offer better margins.
- Pending recoverable under the BOM guarantee clause, once cleared, are also expected to positively impact profitability.
- With no major CapEx planned for the core business, DCX is focused on leveraging its strong order pipeline and operational strengths to improve margins from FY26 onward.

DCX Systems Ltd.

Key Con-call Highlights

Order Book as of March 31, 2025

- > The company holds a consolidated outstanding order book of about INR 2,855 crores as of March 31, 2025. This order book is expected to be executed within approximately two years based on the delivery schedule.
- > They have received several new orders in the last six months, notably two orders from Lockheed Martin Global USA totaling about INR 840 crore and one from Elta Systems Israel for Close-in Weapon System module assemblies' worth about INR 483 crore.
- > Following recent events and proven Indian defense capabilities, DCX is experiencing a significant increase in inquiries from various countries and large companies.

EBIT margins fell; BOM costs delayed recovery, improvement expected

- > DCX reported an EBIT margin of 6.58% for FY25, a decrease from 8.74% in FY24. The low operating margins were primarily attributed to a business practice involving a Bill of Material (BOM) guarantee clause with customers. Under this clause, when raw material costs increase after the initial price is set, DCX initially bears the extra cost. This extra expense is reconciled and claimed back from the customer at the financial year-end, but this amount is not reflected in trade receivables or invoiced until cleared and approved by the customer.
- > The process for claiming these accumulated extra costs for past projects is ongoing. While it was hoped to be settled in the past, delays occurred due to factors like war situations, travel restrictions, and project closures.
- Management is actively working to get these claims settled, targeting for the recovery amount to be potentially reflected in the Q1 FY26 results. They stated that the FY25 revenue *does not* include last year's BOM claims.
- > Management mentioned that there is an improvement in the EBITDA margin on the new POs compared to the earlier ones.
- > Typical margin ranges for different business verticals were provided: Cable business has a double-digit margin. PCB assembly is within 10%. System Integration ranges from 5% to 12%. Kitting, electronic inspection, and casting are around 7% to 8%. These margins vary based on complexity and specific project requirements.

Raneal, NIART, and JVs to expand DCX's defense, rail, MRO footprint

- Raneal Advanced Systems (Subsidiary): Raneal recently received a Defense Industrial License for highly classified projects. DCX and Raneal have established new Domestic Tariff Area (DTA) units to cater to increasing domestic requirements under the Make in India initiative. Commercial production at this facility is expected to start soon. Raneal did approximately INR 380 crore in external sales in FY25, mostly completed.
- > NIART Systems (Railway Product JV): This is a joint venture with Elta (where DCX has a 50.1% majority) focused on a radar-based obstacle reduction system for railway safety. The product is developed using Elta's radar/optics/algorithm technology and is a 100% OEM product. Trial deployments have been ongoing for one-and-a-half years. All tests are completed except for one fog test, which is pending the upcoming fog season. The product is ready, awaiting final certification. The market opportunity in India is estimated at 5,000 to 6,000 locos over the next five years, with tenders expected shortly.
- > The international market has visibility for about 1,750 units in the next three years in other countries, with proposals being submitted for around 240 systems to one global company shortly.
- Revenue from NIART is expected to start in FY27. The significant increase in intangible assets (INR 2800 Mn) is attributed to NIART's capitalized intangible property related to its development.
- ELTA Radar Systems JV: A joint venture agreement has been signed with Elta Systems Israel (DCX owning 37%) to develop, manufacture, and supply various radar and sensor systems for airborne and land-based applications under Make in India. The products are already proven worldwide. The target is to start operations within 11 months. The company is in the process of setting up the plant and finalizing the Capex, which is estimated to be around INR 150 crore to INR 200 crore.
- MRO Business (with Aerospace Services India ASI): An MOU has been signed with ASI to be a partner for electronic assemblies for MRO business. The business is expected to start shortly, with the process moving faster due to urgency. DCX is also expecting potential follow-up orders related to large orders secured by BEL/L&T/BLM, as DCX is an India supplier for specific electronic modules.

DCX Systems Ltd.

Valuation and view:

DCX Systems' Q4FY24 results fell short of expectations across all key metrics. EBITDA declined by 73.0% YoY led by weaker revenue growth and contraction in gross margins. The Company's inability to hold on its gross margins stems primarily from inability to raise an invoice for the excess bill of materials (BOM) supplied in the system integration segment. Net profit declined by 37.2% YoY led by weaker operational performance, partially offset by higher other income.

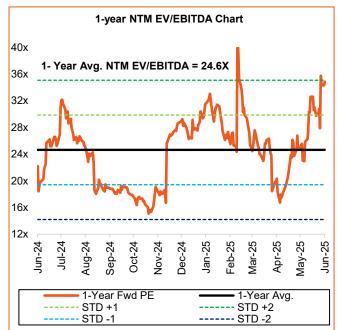

We have revised our FY26E/FY27E EPS estimates by -25.8%/-13.6% respectively, to factor in persistent subdued gross margins stemming primarily from inability of the Company to raise an invoice for the excess bill of materials (BOM) supplied in the system integration segment. We believe, re-rating of the stock depends on improvement of the margin profile with expansion into higher-value and in-house developed products.

Y/E March	New E	stimates	Old Es	stimates	Change (%)		
(INR Mn)	FY26E	FY27E	FY26E	FY27E	FY26E	FY27E	
Revenue	14,088	16,905	16,914	20,297	-16.7%	-16.7%	
EBITDA	391	791	991	1,339	-60.5%	-40.9%	
EBITDA margin (%)	2.8%	4.7%	5.9%	6.6%	-308 bps	-192 bps	
PAT	645	991	866	1,146	-25.5%	-13.5%	
EPS	5.8	8.9	7.8	10.3	-25.8%	-13.6%	

We expect the Revenue/EBITDA/PAT to grow at 24.9%/314.4%/59.7% CAGR over FY25-27E. The company is currently available at 62.3x/36.1x FY26E/FY27E EPS.

We value DCX at 36.0x FY27E EPS, implying a target price of INR 321. We downgrade our rating from "BUY" to "HOLD" on the stock.
