### **Finolex Cables**

Margins to recover on better product mix; retaining a Buy

Finolex Cables delivered steady ~13.4%y/y Q1 revenue growth led by electrical volumes up 16% y/y, though margins were pressured by a weaker mix with higher project sales and subdued agri-wire demand. Communication cables were muted but backward integration through the new preform facility should aid profitability ahead. With wire demand expected to revive from Q3 on real-estate completions and Bharat Net Phase-3 providing near-term assurance, earnings recovery is likely as operating leverage and mix improve. We retain our Buy recommendation, with a 12-mth TP of Rs1,031.

**Steady Q1.** Q1 consolidated revenue rose 13.4% y/y to Rs13.95bn. Electric cable revenue grew 16.9% y/y to Rs12bn. Copper rods revenue was flat y/y at Rs4bn while communication cable revenue slid 8.7% y/y to Rs1.08bn. In Q1, peers Polycab/KEI/Havells saw 31/32/27% cable and wire growth y/y. The EBITDA margin dropped 53bps y/y to 9.8% owing to a 31bp dip in the gross margin and impacted by volatile commodity prices and a change in the product mix. PAT was 55% higher y/y to Rs1.36bn on the higher EBITDA; other income rose 17% y/y. The share of profit from Finolex Industries plunged 83% y/y to Rs262m, which led to net income also plunging 83% y/y.

**Optical-fibre cables.** Demand tailwinds from Bharat Net Phase-3, state-led fibre projects and 5G/FTTH rollouts would drive utilisation and margin expansions. Commissioning of the preform (key raw material for optical-fibre cables) plant reduces reliance on imports, enhances value-addition, and provides optionality to sell surplus preforms in the market.

**Outlook, estimate revision.** Post Q1, we tweak our FY26e/27e EBITDA 9/10% and PAT 11/9%. We model 12/11% revenue/net income CAGRs over FY25-28, which could result in the return ratio expanding. We introduce FY28e and roll over valuations to Sep'27. We retain a Buy, with a 12-mth TP of Rs1,031 (Rs1,293 earlier) on a sum-of-parts approach. We now assign 20x P/E to the core business. **Risks:** Fluctuation in RM prices could dent margins, a sharp compression in Finolex Industries' profitability could squeeze its net income. Timely capex commissioning and backward integration are critical to margin expansion in FY26/27.

## Q1 FY26 call highlights

- Consolidated revenue grew ~13.4% y/y to Rs13.95bn, on 16% volume growth in electrical wires, and power cables rising 96% y/y. Power cables outshone wires, while wires for agri applications were weak due to unseasonal rains. Within communication cables, both metal-based products and optic-fibre cable volumes were lower y/y owing to contract delays and slow execution of government projects.
- Demand in the agricultural wires sub-segment sharply declined (~50%y/y) owing to unseasonal rains in mid-May, partially offset by stronger project volumes. Growth was skewed toward project sales, which come at deeper discounts than retail (box) sales. The retail mix dropped from ~75–80% earlier to ~60% now, cutting margins. The EBITDA margin declined 53bps to 9.8% due to a weaker product mix, higher share of lower-margin projects, and copper price volatility.
- Management is optimistic about recovery in wire demand from Q3 FY26, driven by the completion of post-Covid real-estate projects and housing demand momentum, supporting double-digit volume growth for 4–6 quarters. It is also levering its retail network expansion and FMEG portfolio synergies to push wire sales, aiming for a healthier mix of retail demand to return margins closer to past levels.
- With volumes and value pressured, communication cables was subdued. Orders were delayed as some key customer contracts, expected to close, spilled over to Jul or were being negotiated. The segment heavily depends on government programs such as Bharat Net, where execution timelines significantly lagged announcements.
- Margins were a low 1–2% due to limited operating leverage and pricing pressure (global oversupply, particularly large-scale fibre dumping by China. Anti-dumping duties have been some support, but previously imported surplus fibre still weighs on domestic pricing.
- To structurally improve profitability, Finolex invested in backward integration through a preform manufacturing plant, completed in March and being ramped up. This will reduce dependence on raw material, enhance in-house value addition and allow for potential sales of surplus preforms in the market. FY26-27 margins are expected to improve with better capacity utilisation, which would reduce imports, as part of backward integration. The pre-form plant has been completed (production trials begun) and is now expected to go on-stream by Q4FY26.
- Management expects demand to improve toward end-CY25, as BharatNet Phase-3 execution begins and private telecoms operators, (Bharti Airtel, Reliance Jio), make progress on network expansions.
- FMEG. Growth since FY17 has been slower than expected. Expansion of retail footprint and product launches are planned, but pricing pressure in lighting has hurt topline growth.
- ~Rs3bn FY26 planned capex: Rs600m-800m for electric cables (mainly productivity enhancements), the rest for backward integration in communication cables. Electric cable capacities now can support ~Rs65bn turnover at present copper prices, the gross block at ~Rs7.5bn.
- Management acknowledged underperformance vs peers in recent years, attributing it partly to limited participation in the high-growth power cable sub-segment and a cautious approach to utility/ DISCOM orders. Pricing has been lower than competition, with more focus on margins than on volumes.

## **Outlook Valuations**

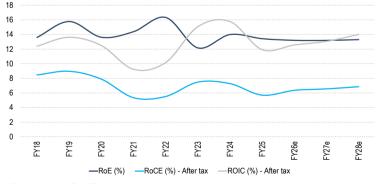

**Outlook, estimate revision**. Finolex cables' margins were pressured by a weaker mix with more project sales and subdued agri-wire demand. Management expects wire volumes to improve from Q3 FY26 as a large pipeline of housing and real-estate projects announced post-Covid near completion, driving sustained demand for 4–6 quarters. As Bharat Net Phase-3 orders begin to flow from end-CY25, rising utilisation in OFC and the preform plant will boost margins.

We are optimistic on Finolex Cables as greater participation in power cables and added opportunities from data-centre projects provide further growth avenues, volume boost from tenders floated by BharatNet and the opportunities expected from the 5G rollout, fibre-to-home infrastructure needs. Overall, the company is set to capture structural demand tailwinds in India's cables and wires sector, aided by its strong brand, retail network, and prudent balance sheet.

Post-Q1, we tweak our FY26e/27e EBITDA 9/10% and PAT 11/9%. We model 12/11% revenue/net income CAGRs over FY25-28, which could result in the return ratio expanding.

**Valuation and rating.** We introduce FY28e and roll over valuations to Sep'27. We retain a Buy, with a lower 12-mth TP of Rs1,031 (Rs1,293 earlier) on a sum-of-parts approach. To the company's core business, we now assign a P/E of 20x, much lower than those of Polycab (40x) and KEI Industries (38x).

Fig 10 – Sum-of-parts valuation	
(Rs m)	Sep' FY27e
Core business	6,702

### **Key risks**

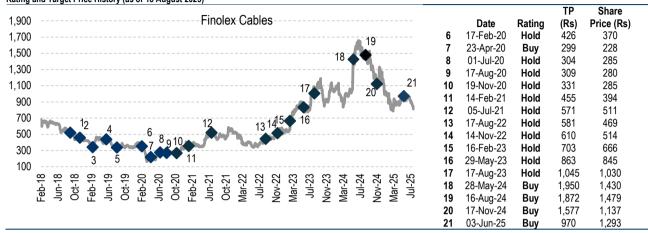

- Timely commissioning of capex and backward integration are critical to margin expansion in FY26/27. Major delays could pose a risk to our FY26e/27e.
- Any fluctuation in RM prices might impact the company's ability to supply products at competitive rates, which may hurt its market share and margins.
- A sharp compression in Finolex Industries' profitability could reduce Finolex Cables' net income. This is an important risk factor.
