### Result highlights

**Revenue:** Consolidated revenue for the quarter stood at INR 18,723 Mn., down 15.7% YoY (-1.5% QoQ), coming in sharply below our estimates, primarily due to continued weakness in the exports portfolio and a slower-than-anticipated recovery across key global agrochemical markets. Domestic business saw moderate traction but remained insufficient to offset the sharp decline in international offtake.

**Margin and Profitability:** EBITDA came in at INR 5,413 Mn., down 13.8% YoY (+4.3% QoQ), below our expectations, driven by unfavorable operating leverage owing to a meaningful decline in topline, partially cushioned by gross margin expansion. Adjusted net profit declined 19.5% YoY (+2.3% QoQ) to INR 4,093 Mn., significantly below our estimates, led by weaker revenue conversion, softer other income, and higher-than-anticipated tax charge.

Gross profit margin expanded by 549 bps YoY (-18 bps QoQ) to 57.3%, supported by a richer mix of new and higher-value molecules, favorable input procurement cycles, and efficiency gains across CSM and domestic businesses. EBITDA margin improved by 63 bps YoY (+160 bps QoQ) to 28.9%, aided by gross margin improvement and tight cost controls, though partially dragged by higher employee cost and R&D-related expenses tied to the pharma and biologicals pipeline.

**Verticals/Segments:** Export revenue declined 16.3% YoY (-5.6% QoQ), reflecting continued volatility in customer offtake, elongated inventory correction cycles at global innovators, and muted demand across key agrochemical chemistries. While destocking trends showed early signs of stabilisation, order inflows during the quarter remained below historical averages.

Domestic revenue increased 17.7% QoQ (-13.4% YoY), supported by steady traction in branded formulations, improved monsoon spread, and strong performance from recently introduced products. Growth, however, was partly offset by regulatory bottlenecks in the biologicals portfolio, which impacted the pace of commercialisation in select categories.

**Outlook and Valuation:** Near-term growth is expected to remain soft as global agrochemical demand recovers gradually and customer destocking extends into the next few quarters. While domestic momentum remains healthy and margins should hold up supported by a richer product mix, the exports business is likely to witness a slow and uneven pickup, delaying a meaningful rebound. Progress in pharma and biologicals continues, but scale benefits are still some distance away. Overall, PI remains structurally strong, but earnings recovery will likely be back-ended, keeping the stock range-bound in the interim.

We have rolled forward our valuation to Sept'27 estimates. We value PI Industries at 32.0x Sept'27 EPS, implying a target price of INR 3,480.

We downgrade our rating from "ACCUMULATE" to "HOLD" on the stock as near-term earnings visibility remains muted, with export demand stabilising slower than expected and key growth platforms such as pharma and biologicals yet to reach scale. While margins are likely to remain resilient, the pace of topline recovery appears back-ended, limiting meaningful upside from current levels.

## **PI Industries Ltd**

### **Key Concall Highlights:**

#### **Exports**

- AgChem exports declined in line with customer delivery deferrals and destocking; this transitional softness was already built into the FY26 plan.
- Products commercialised in the last 3 years grew ~38% YoY in H1, with 5 new molecules commercialised in H1 and a total 8–10 planned for FY26, including some non-AgChem (electronic & specialty chemicals).
- CSM order book stands at about USD 1.25 bn, giving medium-term visibility; near-term growth is constrained by inventory normalisation at innovator customers.
- Management expects export recovery from Q4FY26, with normalisation of the global agchem cycle by H2CY26 as destocking completes and restocking begins.

#### **Pharma segment**

- Pharma platform revenue has roughly doubled vs H1 last year (H1 revenue up ~2x YoY), helped by deeper relationships with biotech and big pharma innovators; however, it is still in the investment phase, with higher overheads and some one-off costs impacting profitability.
- The company is investing in an integrated CRDMO platform – strengthening capabilities, people, and processes to drive accelerated growth over the next few years.
- 2 large pharma clients onboarded in H1; management is on track to reach 4 large clients by FY26 (expecting 1 each in Q3 and Q4). 6 late-stage programs (Phase II/III-type) are in the pipeline, plus additional late-stage opportunities being pursued.
- Management reiterated that this investment phase may continue for about a year, post which scale should support positive EBITDA and profitable growth.

#### **Domestic segment**

- H1 domestic business declined ~5% YoY; Q2 weakness offset the Q1 growth due to erratic and excessive rains (crop damage in Punjab & Maharashtra) and abrupt regulatory actions in biologicals.
- A temporary ban/restriction on biological sales in India significantly impacted domestic agri revenues; regulatory issues are now largely resolved, and sales are expected to resume as state-level approvals come through, with some recovery from Q4FY26.
- 3 new domestic brands launched in H1; 3 more planned for later in the year. 20+ new products are under development/registration for future launches.
- Rabi season key for H2: Management is positive but cautious – good reservoir levels and paddy crop support Rabi prospects, but fast-changing weather remains a risk.

#### **Guidance and outlook**

- Management anticipates a recovery in their domestic and agchem exports, particularly in Q4, to offset the decline in H1. They see the positivity coming through Q4 on the export side. They also expect "good potential for the H2 from the Rabi season" on the domestic side.
- Recover is expected in exports from Q4FY26. When asked about Q4 onwards, management confirmed they expect growth to revise. The regulatory issues impacting the biological segment domestically are expected to wind down in the coming quarter, with sales resuming from the fourth quarter.
- Management expects global agrochemical demand to recover in H2CY26, once destocking completes and restocking begins. Biologicals are seen as a structural growth driver, with potential for 3–4x scale-up over the next few years; margin focus will come only after scale is achieved.
- The focus is on growing late-stage programs, which in the next 2 to 4 years, potentially start giving us sustainable revenue. The company is on track to onboard four large pharma clients. Management expects to reach a scale in about 1 year or so that will allow them to sustain profitable growth and achieve positive EBITDA.
- EBITDA margins to be maintained within guided range, helped by product mix and cost discipline despite top-line pressure.
- The company expects the ETR to be in the range of 22%–23% for the next 2–3 years
- Pharma CRDMO is expected to scale meaningfully over the next 2–4 years, driven by late-stage programs and large-pharma onboarding.

## PI Industries Ltd

### Story in charts

Revenue trend weakens; YoY growth turns negative

Gross margin climbs from 52% to 57% YoY.

EBITDA rebounds on better product mix and operating leverage.

Profitability strengthens with steady improvement in adjusted NPM.

The information and opinions in this report have been prepared by DCFPL and are subject to change without any notice. The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of DCFPL. While I would endeavor to update the information herein on a reasonable basis, DCFPL is not under any obligation to update the information. Also, there may be regulatory, compliance or other reasons that may prevent DCFPL from doing so. Non-rated securities indicate that rating on a particular security has been suspended temporarily and such suspension is in compliance with applicable regulations and/or DCFPL policies, in circumstances where DCFPL might be acting in an advisory capacity to this company, or in certain other circumstances.

This report is based on information obtained from public sources and sources believed to be reliable, but no independent verification has been made nor is its accuracy or completeness guaranteed. This report and information herein is solely for informational purpose and shall not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. DCFPL will not treat recipients as customers by virtue of their receiving this report. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. The recipient should independently evaluate the investment risks. The value and return on investment may vary because of changes in interest rates, foreign exchange rates or any other reason. DCFPL accepts no liabilities whatsoever for any loss or damage of any kind arising out of the use of this report. Past performance is not necessarily a guide to future performance. Investors are advised to see Risk Disclosure Document to understand the risks associated before investing in the securities markets. Actual results may differ materially from those set forth in projections. Forward-looking statements are not predictions and may be subject to change without notice. Our employees in sales and marketing team, dealers and other professionals may provide oral or written market commentary or trading strategies that reflect opinions that are contrary to the opinions expressed herein, in reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest.

I submit that no material disciplinary action has been taken on DCFPL and its associates (Group Companies) by any Regulatory Authority impacting Equity Research Analysis activities.

DCFPL prohibits its associate, analysts, persons reporting to analysts and their relatives from maintaining a financial interest in the securities or derivatives of any companies that the analyst covers.

DCFPL or its associates (Group Companies) collectively or its research analyst, or relatives do not hold any financial interest/beneficial ownership of more than 1% (at the end of the month immediately preceding the date of publication of the research report) in the company covered by Analyst and has not been engaged in market making activity of the company covered by research analyst.

It is confirmed that, I, **Yogesh Tiwari** Research Analysts of this report have not received any compensation from the companies mentioned in the report in the preceding twelve months. Compensation of our Research Analysts is not based on any specific brokerage service transactions.

DCFPL or its Associates (Group Companies) have not managed or co-managed public offering of securities for the subject company in the past twelve months.

DCFPL or its associates (Group Companies) collectively or its research analyst, or relatives might have received any commission/compensation from the companies mentioned in the report during the period preceding twelve months from the date of this report for services in respect of brokerage services or specific transaction or for products and services other than brokerage services.

DCFPL or its associates (Group Companies) collectively or its research analyst, or relatives might have received any commission/compensation from the companies mentioned in the report during the period preceding twelve months from the date of this report other than investment banking or merchant banking or brokerage services from the subject company

DCFPL encourages the practice of giving independent opinion in research report preparation by the analyst and thus strives to minimize the conflict in preparation of research report. DCFPL or its analysts did not receive any compensation or other benefits from the companies mentioned in the report or third party in connection with preparation of the research report. Accordingly, neither DCFPL nor Research Analysts his associate or his relative, have any material conflict of interest at the time of publication of this report.
